Normative Theories of the Media Clifford G Christians, Theodore Glasser, Denis McQuail, Kaarle Nordenstreng, Robert A. White, 2010-10-01 In this book five leading scholars of media and communication take on the difficult but important task of explicating the role of journalism in democratic societies Using Fred S Siebert Theodore Peterson and Wilbur Schramm's classic *Four Theories of the Press* as their point of departure the authors explore the philosophical underpinnings and the political realities that inform a normative approach to questions about the relationship between journalism and democracy investigating not just what journalism is but what it ought to be The authors identify four distinct yet overlapping roles for the media the monitorial role of a vigilant informer collecting and publishing information of potential interest to the public the facilitative role that not only reports on but also seeks to support and strengthen civil society the radical role that challenges authority and voices support for reform and the collaborative role that creates partnerships between journalists and centers of power in society notably the state to advance mutually acceptable interests Demonstrating the value of a reconsideration of media roles *Normative Theories of the Media* provides a sturdy foundation

beginning can be understood as governed by the Mannheimian concepts of ideology and utopia and the power play between them. The close relationship between these two concepts resulted in a bias in knowledge production contributed to dominant narratives of generational conflicts and to the demarcation of Insiders and Outsiders. By focusing on a generation at the forefront of comparative communications at this pivotal time in the 20th century, this book challenges orthodoxies in the intellectual histories of communication studies.
