Using Think-Aloud Interviews and Cognitive Labs in Educational Research Jacqueline P. Leighton, 2017-01-17 The field of education is rife with calls to action and for research to improve higher level thinking and learning outcomes in primary secondary and tertiary education With the No Child Left Behind Act and even more recently the Every Student Succeeds Act policymakers are acknowledging the need for accountability and for an education system that works for everyone Thankfully psychologists and educators are coming together to share best methods for how to design better learning environments assessments and tests but are also probing learners for how they process the content material with which they are faced Jacqueline P Leighton s Using Think

Aloud Interviews and Cognitive Labs in Educational Research provides the first volume focused on distinguishing related but specific methods for probing these distinct forms of student cognition Unlike volumes focused on interview techniques for questionnaire design and analysis this book builds on the seminal 1993 work of psychologists K Anders Ericsson and Herbert A Simon for using think aloud and protocol analysis to generate evidence of student problem solving in education while also distinguishing this work from cognitive interviews used to generate evidence of human understanding comprehension within the educational and psychological settings Here Leighton not only presents the theoretical basis for the two interview and analytical techniques but also advances how to use cognitive models in the planning of interviews collecting data training those who work with this data and generating evidence for claims about higher level thinking and learning Using Think Aloud Interviews and Cognitive Labs in Educational Research includes sample instructions cautions and schematic visuals to help readers identify these distinct procedures while also integrating the work with established standards such as the 2014 Standards for Educational and Psychological Testing published by the American Educational Research Association the National Council on Measurement in Education and the American Psychological Association **Mosaic** ,1974 Using Social Science to Understand and Improve Wildland Fire Organizations Gregory Larson,2007 The wildland fire community has spent the past decade trying to understand and account for the role of human factors in wildland fire organizations Social research that is relevant to managing fire organizations can be found in disciplines such as social psychology management and communication However such research has been published primarily for scientific and business audiences and much of the fire community has not been exposed to it Here we have compiled and organized knowledge from a variety of social science disciplines so that it can be used to improve organizational practices related to firefighter and public safety to assess the effectiveness of safety campaigns and to improve firefighter safety trainings This annotated reading list summarizes approximately 270 books articles and online resources that address scientific and management concepts helpful for understanding the human side of fire management The first section Human Factors and Firefighting introduces readers to key workshops and writings that led to the recognition that human factors are prime ingredients of firefighter safety The second section Foundations for Understanding Organizations consists of social science research that provides a foundation for understanding organizational dynamics This section includes readings on decision making and sensemaking organizational culture identification and identity leadership and change organizational learning and teams and crews The third section Understanding Organizations in High Risk Contexts explores organizations that deal regularly with risk uncertainty and crisis This section includes readings on risk and uncertainty high reliability organizing and crisis communication The publication concludes with Internet resources available for those interested in the management of fire organizations **Cognitive Remediation for Psychological Disorders** Alice Medalia,Tiffany Herlands,Alice Saperstein,Nadine Revheim,2017-10-16 Individuals with serious and persistent mental illnesses including schizophrenia and

affective disorders often experience cognitive deficits that make it challenging to perform everyday tasks For example they may have difficulty paying attention remembering and learning thinking quickly and solving problems and this may interfere with functioning at work school and in social and living situations Cognitive remediation is an evidence based behavioral treatment for people who are experiencing cognitive impairments that interfere with role functioning Cognitive Remediation for Psychological Disorders contains all the information therapists need to set up a cognitive remediation program that helps clients strengthen the cognitive skills necessary for everyday functioning The program described is called Neuropsychological and Educational Approach to Remediation NEAR an evidence based approach that utilizes carefully crafted instructional techniques which promote learning The goals of NEAR are to provide a positive learning experience and to promote independent learning and optimal cognitive functioning in daily life The second edition of this popular Therapist Guide provides step by step instructions on how to implement NEAR techniques with patients Guidelines for setting up and running a successful cognitive remediation program are laid out in an easy to follow format Therapists will learn how to choose appropriate cognitive exercises recruit and work with clients perform intakes and create treatment plans This Guide comes complete with all the tools necessary for facilitating treatment including program evaluation forms and client handouts

Assessing Judgment Proficiency in Army Personnel Hannah Foldes,2010 Because of the unpredictable nature of the Army s current conflicts operational requirements demand that Soldiers and leaders become proficient in military judgment and decision making This research presents an analysis of military judgment proficiency MJP which is judgment and decision making in environments characterized by cultural legal ethical and tactical complexity We reviewed relevant literature in the areas of judgment decision making and problem solving to present a sound theoretical foundation for the MJP construct We defined MJP as a complex skill and argued that in ambiguous novel rapidly changing situations in which there is limited time information and resources Soldiers demonstrating MJP are more likely to select an effective course of action by appropriately identifying the nature of the situation recognizing relevant situational factors and forecasting the best overall outcome s given the situation We describe also the initial stages of development of an assessment tool that will distinguish among Soldiers on MJP and lay out future plans for test validation with Special Forces and non Special Forces Soldiers
