white and Black magazines often in dialogue with one another differently engaged memory work to either reinforce or upend white supremacy during a period of both Black advancement and white backlash Further the book suggests lines of connection between the construction of public memory in the past to those taking place today across an array of media platforms Popular debates whether appearing in early 1900s magazines or on twenty first century social media sites shape a culture s collective knowledge of what counts as true important and worthy of attention

Lessons from the Black Working Class Lori Latrice Martin, Hayward Derrick Horton, Teresa A. Booker, 2015-10-21. This book enables readers to better understand, explain, and predict the future of the nation's overall economic health through its examination of the black working class, especially the experiences of black women and black working class residents outside of urban areas. How have the experiences of black working class women and men residing in urban, suburban, and rural settings impacted U.S. labor relations and the broader American society? This book asserts that a comprehensive and critical examination of the black working class can be used to forecast whether economic troubles are on the horizon. It documents how the increasing incidence of attacks on unions, the dwindling availability of working class jobs, and the clamoring by the working class for a minimum wage hike is proof that the atmospheric pressure in America is rising and that efforts to prepare for the approaching financial storm require attention to the individuals and households who are often overlooked: the black working class. Presenting information of great importance to sociologists, political scientists, and economists, the authors of this work explore the impact of the recent Great Recession on working class African Americans and argue that the intersections of race and class for this particular group uncover the state of equity and justice in America. This book will also be of interest to public policymakers as well as students in graduate level courses in the areas of African American studies, American society and labor, labor relations, labor and the Civil Rights Movement, and studies on race, class, and gender.
