Duprat,Alison James,2024-07-31 Figures of Chance II Chance in Theory and Practice proposes a multidisciplinary analysis of
cultural phenomena related to notions of chance and contingency Alongside its transhistorical companion volume Figures of
Chance I it considers how the projective and predictive capacity of societies is shaped by representations and cultural models
of a reality that is understood by varying degrees to be contingent unpredictable or chaotic This volume reevaluates the role
played by figurative representations of chance in contemporary discourses about chance and contingency Written by seven
interdisciplinary teams and encompassing philosophy literature history of science sociology mathematics cognitive science
information science and art history this text puts scientific conceptions of chance into dialogue with their contemporary

Films of Fritz Lang Tom Gunning,2019-07-25 In this volume Tom Gunning examines the films of Fritz Lang not only as a
stylistically coherent body of work but as an attempt to portray the modern world through cinema The world of modernity in
which systems replace individuals is conveyed by Lang s mastery of cinematic set design composition and editing Lang
presents not only a decades long vision of cinematic narrative which can be compared to that of Alfred Hitchcock or Jean
Renoir but a view of modernity that relates strongly to the ideas of Adorno Brecht Benjamin and Kracauer From the sweeping
allegorical films of the 20s to the chilly and abstract thrillers of the 50s Lang s films Gunning claims are among the most

precious records of the twentieth century The Films of Fritz Lang immeasurably enriches our understanding of a great artist and in so doing reimagines what a film artist is an author who fades away even in being recognised and interpreted an enigmatic figure at the junction of aesthetics history biography and theory **Fat No More - Long Term Success**
