The Foreign Encounter in Myth and Religion Kees van der Pijl, 2010-03-05 How do we think about international relations There is no question that society is based upon its cultural foundations yet this mode of understanding the world is seemingly absent from IR The second volume of Modes of Foreign Relations and Political Economy a three volume project changing the way we think about international relations traces the key characteristics of foreign encounters over time It shows that myth religion and ethical philosophies have always informed the way that societies have interacted with outsiders from tribal relations to the imperial frontiers Acceptance of this points us towards the future state of international relations A truly masterful work The Foreign Encounter In Myth And Religion is a must for upper undergraduates and academics at the cutting edge of international relations theory
