Other Macdonald Report The Consensus On Canadas Future That The Macdonald Commission Left Out:

The Other Macdonald Report Daniel Drache, Duncan Cameron, 1985-01-01 In 1982 the Macdonald Commission began its 20 million mission to find a consensus on Canada's future. The commission held hearings in 28 towns and cities met with 700 concerned parties and assembled nearly 40 000 pages of testimony. In his Report Commission chair Donald S Macdonald announced Canada must make a leap of faith and embrace free trade with the U S apparently signalling the victory of a globalizing corporate vision of the country's development. The Other Macdonald Report reopens the debate presenting twenty key submissions to the Commission by organizations such as the Canadian Conference of Catholic Bishops the United Auto Workers the National Action Committee on the Status of Women the Canadian Mental Health Association and the National Farmers Union. Together these groups offer a vision of Canada where human needs take priority over capital and technology. The Other Macdonald Report offers alternatives to the corporate vision for Canada's future alternatives forged during the vibrant free trade debates of the mid 1980s.

Other Macdonald Report Duncan "" "" Cameron, 2000 *Escape from the Staple Trap* Paul Kellogg, 2015-10-06 From fur and fish to oil and minerals Canadian development has often been understood through its relationship to export staples. This understanding argues Paul Kellogg has led many political economists to assume that Canadian economic development has followed a path similar to those of staple exporting economies in the Global South ignoring a more fundamental fact as an advanced capitalist economy Canada sits in the core of the world system not on the periphery or semi periphery. In *Escape from the Staple Trap* Kellogg challenges statistical and historical analyses that present Canada as weak and disempowered lacking sovereignty and economic independence. A powerful critique of the dominant trend in Canadian political economy since the 1970s. *Escape from the Staple Trap* offers an important new framework for understanding the distinctive features of Canadian political economy.

Shifting Gears Stephanie Ross, Larry Savage, 2024-09-03 In the decades following the Second World War autoworkers were at the forefront of the labour movement. Their union urged members to rally in the streets and use the ballot box to effect change for all working class people. But by the turn of this century the Canadian Auto Workers union had begun to pursue a more defensive political direction. *Shifting Gears* traces the evolution of CAW strategy from transformational activism to transactional politics. Class based collective action and social democratic electoral mobilization gave way to transactional partnerships as relationships between the union employers and governments were refashioned. This new approach was maintained when the CAW merged with the Communications Energy and Paperworkers Union in 2013 to create Unifor Canada's largest private sector union. Stephanie Ross and Larry Savage explain how and why the union shifted its political tactics offering a critical perspective on the current state of working class politics.

Continentalizing Canada Gregory J. Inwood, 2005-01-01 Free trade has been a highly contentious issue since the Conservative government of Brian Mulroney negotiated the first deal with the United States in the 1980s. Tracing the roots of Canada's contemporary involvement in North American free trade back to the Royal

Commission on the Economic Union and Development Prospects for Canada in 1985 also known as the Macdonald Commission Gregory J Inwood offers a critical examination of the commission and how its findings affected Canada's political and economic landscape including its present day reverberations Using original research including content analysis interviews archival information and surveys of relevant literature Inwood argues that the Macdonald Commission created an atmosphere and political discourse that made the continentalization of Canada possible by way of free trade agreements with the U S and Mexico Through the use of a suspect research program and with the aid of a select oligarchy within the Commission and the government bureaucracy opposition to continentalism from both the majority of the Canadian population and even several commissioners was ignored Accessible to readers interested in Canadian politics policy or economy

Continentalizing Canada offers a thorough examination into the Macdonald Commission and the resulting discourse in the Canadian political economy *How Ottawa Spends, 1994-95* Susan D. Phillips, 1994-06-15 *Defying Conventional Wisdom* Jeffrey McKelvey Ayres, 1998-01-01 The first major study on the origins strategies and activities of movements and coalitions in opposition to free trade that arose in Canada and spread across North America it captures an important developmental period in Canadian political life

Commissions of Inquiry and Policy Change Gregory J. Inwood,Carolyn M. Johns,2014-01-01 This collection brings together leading Canadian scholars working in political science public policy and law to explore fundamental questions about the relationship between commissions of inquiry and public policy for the first time What role do commissions play in policy change Would policy change have happened without them Why do some commissions result in policy changes while others do not Social Policy and Practice in Canada Alvin Finkel,2012-05-09 Social Policy and Practice in Canada A History traces

the history of social policy in Canada from the period of First Nations control to the present day exploring the various ways in which residents of the area known today as Canada have organized themselves to deal with or to ignore the needs of the ill the poor the elderly and the young This book is the first synthesis on social policy in Canada to provide a critical perspective on the evolution of social policy in the country While earlier work has treated each new social program as a major advance and reacted with shock to neoliberalism s attack on social programs Alvin Finkel demonstrates that right wing and left wing forces have always battled to shape social policy in Canada He argues that the notion of a welfare state consensus in the period after 1945 is misleading and that the social programs developed before the neoliberal counteroffensive were far less radical than they are sometimes depicted Social Policy and Practice in Canada A History begins by exploring the non state mechanisms employed by First Nations to insure the well being of their members It then deals with the role of the Church in New France and of voluntary organizations in British North America in helping the unfortunate After examining why voluntary organizations gradually gave way to state controlled programs the book assesses the evolution of social policy in Canada in a variety of areas including health care treatment of the elderly child care housing and poverty **The State,**

Smith,2002-08-15 Globalization and Resistance brings together cutting edge theory and research about how global economics and politics alter the way ordinary people engage in contentious political action The cases range from nineteenth century Irish immigrant networks to protests against World Bank projects in the Amazon to contemporary transnational organizing for the environment to the battle of Seattle The volume illuminates the reciprocal effects between globalization processes and social movements **The Mediation of Poverty** Joanna Redden,2014-02-19 The Mediation of Poverty The

News New Media and Politics discusses the influence of the increasing use of digital technologies on media and political

responses to poverty in the United Kingdom and Canada Considering poverty politics at symbolic and structural levels Joanna Redden uses a frame analysis of mainstream and alternative news content to identify which narratives dominate poverty coverage what is missing from mainstream news coverage and what can be learned by looking at alternative sources of news and information The Mediation of Poverty argues that news coverage privileges and embeds neoliberal approaches to the issue of poverty in Canada and the United Kingdom Interviews with journalists politicians researchers and activists enable discussion on a micro level of the changing nature of news politics and activism and how these changes influences poverty politics Redden raises concerns about how the speed of digitally mediated working environments is reshaping even foreclosing opportunities for communication reflection and contestation in a way that reinforces the dominance of market based thinking and limits political responses to poverty Capacity for Choice George Hoberg,2002-01-01 Examines North American integration and its potential future impact on Canadian life in eight areas trade the labour market the brain drain macroeconomics federalism social welfare the environment and culture Madaraka Wanyee Kinuthia,2014-02-15 Madaraka is the Swahili word for self determination Article 2 of the United Nations 1960 Declaration on the Granting of Independence to Colonial Countries and Peoples states all peoples have the right to self determination by virtue of that right they freely determine their political status and freely pursue their economic social and cultural development This book goes beyond the simplistic explanations that are routinely provided regarding the failure of corporate globalization and draws attention to the political economy of this exploitative system in order to effectively address it The book is divided into four parts The first part is comprised of the author s Master s thesis which is accessible online through the University of Ottawa Ottawa Canada as well as Library and Archives Canada This section serves as the foundation of the book by providing a critique of the political economy of corporate globalization as seen through the lens of the exploitative global corporate extractive industry which is marked by increasing inequality oppression and the exploitation of both people and the natural environment exclusively for the pursuit of profit The second part of the book focuses on Africa and provides an overview of the impact of corporate globalization on the continent The African experience also demonstrates the contemporary relevance of dependency theory and how the continent s dependence on export led growth is enforced via Africa s illegitimate debt burden This explains why African states have been unable to diversify from their dependence on natural resources and chart independent economic paths The third part of the book discusses the securitization of U S foreign economic policy corporate globalization via the U S led War on Terror and explores a number of initiatives along the security development nexus These include the U S s National Security Strategy NSS and the Millennium Challenge Account MCA This section also discusses the subject of fragile failed states and explains the basic rationale behind U S foreign economic policy that fragile failed states need to embrace neoliberal economic corporate globalization through market led policies in order to overcome poverty and cease being threats to the more ordered parts of the world The final part of the book critiques The 9 11 Commission Report

which contains the official account of the 9 11 terrorist attacks and is used to justify the U S led War on Terror However this key document lacks sufficient evidence and cannot be used to support a prosecutable case in any court of law The final part of the book goes a step further and explores the use of state terrorism by Northern countries particularly the U S in its efforts to spread its foreign economic policy corporate globalization worldwide This section also discusses the historical use of false flag terrorism by Northern countries in order to further their foreign policy objectives including well known and documented examples such as Operation Northwoods Operation Gladio and The Lavon Affair The book concludes by proposing a radical but necessary solution to the crisis of corporate globalization that we challenge the authenticity of The 9 11 Commission Report and therefore the legitimacy of the U S led War on Terror More specifically that we demand a new and independent investigation into the events surrounding 9 11 as this is an indispensable prerequisite to de securitizing U S foreign economic policy corporate globalization 9 11 is the Achilles Heel of the entire system of economic exploitation and oppression via neoliberal economic corporate globalization a system whose main objective is to open up the economies of developing countries to corporations which are mostly based in Northern countries so that these corporations can increase their market share and thereby the wealth of Northern elites Website www.madaraka.net **Praxis and Politics** Janet M. Conway, 2013-10-14 Praxis and Politics explores the knowledge arising from activist praxis and its significance for reimagining radical and democratic politics It is based on five years of direct involvement in the Toronto based Metro Network for Social Justice and their work in coalition building campaign organizing and economic and political literacy work in the aftermath of the signing of the Canada US Free Trade Agreement The book breaks new theoretical and methodological ground in social movement studies in drawing on a wide range of traditions including cultural studies urban studies political economy and feminism Free Traders Malcolm Fairbrother, 2020 Today's global economy was largely established by political events and decisions in the 1980s and 90s when scores of nations opened up their economies to the forces of globalization In Free Traders Malcolm Fairbrother argues that politicians embrace of globalization was much less motivated by public preferences than by the agendas of businesspeople and other elites Drawing on over one hundred interviews with decision makers and analyses of archival materials from Canada Mexico and the U S Fairbrother tells the story of how each country negotiated and ratified two agreements that substantially opened and integrated their economies the 1989 Canada U S and trilateral 1994 North American Free Trade Agreement Contrary to what many commentators believe these agreements like free trade elsewhere were based less on mainstream neoclassical economics than on the informal self serving economic ideas of business While the stakes in the globalization debate remain high Free Traders uses a comparative historical approach to sharpen our understanding of how globalization arose in the past to provide us with clearer trajectory for how it will develop in the future **Canadian Book Review Annual** , 1986
