Learning from the Student's Perspective Alison Cook-Sather, Brandon Clarke, Daniel Condon, Kathleen Cushman, Helen Demetriou, Lois Easton, 2015-11-17 Much has been written about how to engage students in their learning but very little of it has issued from students themselves Compiled by one of the leading scholars in the field of student voice this sourcebook draws on the perspectives of secondary students in the United States England Canada and Australia as well as on the work of teachers researchers and teacher educators who have collaborated with a wide variety of students Highlighting student voices it features five chapters focused on student perspectives articulated in their own words regarding specific approaches to creating and maintaining a positive classroom environment and designing engaging lessons and on more general issues of respect and responsibility in the classroom To support educators in developing strategies for accessing and responding to student voices in their own classrooms the book provides detailed guidelines created by educational researchers for gathering and acting upon student perspectives To illustrate how these approaches work in practice the book includes stories of how pre service and in service teachers school leaders and teacher educators have made student voices and participation central to their classroom and school practices And finally addressing both practical and theoretical questions the book includes a chapter that outlines action steps for high school teachers school leaders and teacher educators and a chapter that offers a conceptual framework for thinking about and engaging in this work Bringing together in a single text student perspectives descriptions of successful efforts to access them in secondary education contexts concrete advice for practitioners and a theoretical framework for further exploration this sourcebook can be used to

guide practice and support re imagining education in secondary schools of all kinds and the principles can be adapted for other educational contexts **The Oxford Handbook of Social Media and Music Learning** Janice L. Waldron, Stephanie Horsley, Kari K. Veblen, 2020-09-23 The rapid pace of technological change over the last decade particularly the rise of social media has deeply affected the ways in which we interact as individuals in groups and among institutions to the point that it is difficult to grasp what it would be like to lose access to this everyday aspect of modern life The Oxford Handbook of Social Media and Music Learning investigates the ways in which social media is now firmly engrained in all aspects of music education providing fascinating insights into the ways in which social media musical participation and musical learning are increasingly entwined In five sections of newly commissioned chapters a refreshing mix of junior and senior scholars tackle questions concerning the potential for formal and informal musical learning in a networked society Beginning with an overview of community identity and the new musical self through social media scholars explore intersections between digital musical and social constructs including the vernacular of born digital performance musical identity and projection and the expanding definition of musical empowerment The fifth section brings this handbook to full practical fruition featuring firsthand accounts of digital musicians students and teachers in the field The Oxford Handbook of Social Media and Music Learning opens up an international discussion of what it means to be a musical community member in an age of technologically mediated relationships that break down the limits of geographical cultural political and economic place

The Other Side of Pedagogy

T. R. Johnson, 2014-10-15 Delineates Lacan's theory of the four discourses as a practical framework through which faculty can reflect on where their students are developmentally and where they might go University classrooms are increasingly in crisis though popular demands for accountability grow more insistent no one seems to know what our teaching should seek to achieve This book traces how we arrived at our current impasse and it uses Lacan's theory of the four discourses to chart a path forward via an analysis of the freshman writing class How did we forfeit a meaningful set of goals for our teaching T R Johnson suggests that by the 1960s the work of Bergson and Piaget had led us to see student growth as a journey into more and more abstract thought a journey that will happen naturally if the teacher knows how to stay out of the way Since the 1960s we've come to see development in turn only as a vague initiation into the academic community This book however offers an alternative tradition one rooted in Vygotsky and the feminist movement that defines the developing student writer in terms of a complex intersubjective ecology and then through these precedents proposes a fully psychoanalytic model of student development To illustrate his practical use of the four discourses Johnson draws on a wide array of concepts and a colorful set of examples including Franz Kafka Keith Richards David Foster Wallace Hannah Arendt and many others Graceful provocative thoughtful and well researched The Other Side of Pedagogy connects theory and teaching in compelling ways This is a groundbreaking book that scholars of writing will want to read reread and teach Joseph Harris author of A Teaching Subject Composition Since 1966

Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning

Niess, Margaret L., Gillow-Wiles, Henry, 2021-06-25 The COVID 19 pandemic drastically transformed the classroom by keeping students and teachers apart for the sake of safety As schools emptied remote learning rapidly expanded through online services and video chatrooms Unfortunately this disrupted many students and teachers who were not accustomed to remote classrooms This challenge has forced K 12 teachers to think differently about teaching Unexpectedly and with little time to prepare they have been confronted with redesigning their curriculum and instruction

from face to face to online virtual classrooms to protect students from the COVID 19 virus while ensuring that these new online initiatives remain sustainable and useful in the post pandemic world As teachers learn to take advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction their instruction both in online and face to face will impact what and how students learn in the 21st century The Handbook of Research on Transforming Teachers Online Pedagogical Reasoning for Engaging K 12 Students in Virtual Learning examines the best practices and pedagogical reasoning for designing online strategies that work for K 12 virtual learning The initial section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the unique strengths and opportunities while avoiding the weaknesses and threats of the online world The following chapters present instructional strategies for multiple grade levels and content areas best practices that work clearly describing why they work and the teachers pedagogical reasoning that supports online implementations The chapters provide ways to think about teaching in virtual environments that can be used to guide instructional strategy choices and recognizes the fundamental differences between face to face and virtual environments as an essential design component Covering such topics as K 12 classrooms pedagogical reasoning and virtual learning this text is perfect for professors teachers students educational designers and developers instructional technology faculty distance learning faculty and researchers interested in the subject

Virtual Learning Environments in Higher Education Mario Barajas,2003 Learning and Practice Patricia Murphy,Kathy Hall,2008-07-18 By examining ideas about learning that transcend typical boundaries such as school workplace or home school this book emphasies the socially negotiated and embedded nature of meaning making and how learners learn to use the cognitive tools of their cultural community through participation in social activity The editors argue that this is the means by which individual agency is extended and learners identities as forms of competency are transformed The book locates sociocultural understanding in a wide theoretical frame and demonstrates its implications for learning and assessment generally covering a range of educational and workplace setttings The contributions challenge ways of understanding learning and thinking about practice both teaching and assessment Drawing on the international literature this book is essential reading for students of curriculum learning and assesment in all sectors from pre primary to further and higher education It is suitable as a core text for masters and taught doctorate programmes It will be of interest to a range of professionals involved with curriculum learning and the practice of teaching and assessment It is also relevant to those in work based and professional education and training and informal educational settings A unique collection in a field that is underrepresented it will also be of interest to an acadmeic audience **Learning a Living** Valerie Hannon,Sarah Gillinson,Leonie Shanks,2013-05-15 The book of the 2013 World Innovation Summit for Education highlights the most innovative programs worldwide successfully preparing students for the world of work **Teaching Practices and Equitable Learning in Children's Language Education** Giannikas, Christina Nicole,2021-03-26 Educating children and
