these theoretical models even as she employs them to illuminate the texts under discussion. The study's approach leads to insights about the contemporary family and about the present state of literature and literary criticism. Cohen concludes by suggesting that the modern period marked the demise of an ideology favoring closed systems. The result has been both a nostalgia for those systems and a redefinition of experience and relationship as open and subject to endless interpretation. Such an ideological reformulation helps explain the present insistence by literary theorists on the inescapability of the text and the reality of representation.

It also focuses on key works by Browning, Auden and Beckett and concludes with a critique of contemporary ideas about art, sympathy and community.

Novel and Romance Hubert McDermott, 1989-06-18. McDermott argues that the novels of the 18th century should be seen as part of an age-old European tradition going back to Homer rather than as a unique English event. He examines European fictional narratives and romance and their influence on authors such as Richardson and Fielding.

Contemporary alchemist Dale Pendell completes his poetic study of botany, chemistry, spirituality, psychology, and history in a volume covering the composition and uses of visionary plants. Chapters including Phantastica, Hypnotica, and Telephorica explore the hallucinogenic plants, the bringers of sleep, and the bearers of distance.

Hidden Rivalries in Victorian Fiction Jerome Meckier, 1987. Victorian fiction has been read and analyzed from a wide range of perspectives in the past century. But how did the novelists themselves read and respond to each other's creations when they first appeared? Jerome Meckier answers that intriguing question in this ground-breaking study of what he terms the Victorian realism wars. Meckier argues that nineteenth-century British fiction should be seen as a network of intersecting reactions and counteractions in which the novelists rethought and rewrote each other's novels as a way of enhancing their own credibility. In an increasingly relative world.
