Other Worlds An Introduction To Religion:

Other Worlds Jill Raitt, 1986 *Other Worlds* Christopher G. White, 2018-03-16 Christopher White points to ways that both spiritual practices and scientific speculation about multiverses and invisible dimensions are efforts to peer into the hidden elements and even existential meaning of the universe Creatively appropriated these ideas can restore a spiritual sense that the world is greater than anything our eyes can see **Vast Universe** Thomas F. O'Meara, 2012 If we have learned anything from recent advances in cosmology and astronomy it is that we have only barely begun to comprehend the vastness of our universe and all that it contains For Christians this raises some fascinating questions If there are intelligent beings out there what would be their relationship to what Christianity claims is a special history on Earth of life with God Would the fact of persons on other planets banish or modify our understanding of God Would it reduce the importance of Jesus What role might goodness and evil play in extraterrestrial civilizations Might God have incarnated himself among other races of creatures as he became incarnate as Jesus among us Respectful of the sciences that disclose the reality of the universe Thomas O Meara wonders about good and evil intelligence and freedom revelation and life as they might exist in other galaxies In this book one possible aspect of the universe we live in meets the perspective of Christian revelation

Abolishing Man in Other Worlds Courtney Petrucci, 2021-01-13 This text investigates why C S Lewis brings humans into outer space in order to recover a Christian worldview during a time of war Lewis s science fiction trilogy was published throughout the WWII era and his readers were all too familiar with advances in technological warfare and the biological experimentation of the Nazi agenda To recover a Christian worldview during such a tumultuous time the first two installments of the trilogy bring humans into outer space in order to reconnect with the Cosmic Chain of Being Malacandra and Perelandra depict all beings coexisting in the Great Dance that Maleldil creates In the last installment Lewis s N I C E reflects experimentation carried out in some concentration camps during WWII Lewis s return to Earth in the last book of the trilogy calls for readers to acknowledge our broken Chain of Being and recover our faith in God rather than attempt to become gods ourselves Explore Lewis s science fiction through J R R Tolkien s Recovery lens for a connection between Lewis s Christian worldview the potential for human self abolition and recovering the Cosmic Chain of Being for modern humans

Jesuits in Science Fiction: Reason and Revelation on Other Worlds Richard Feist, 2025-01-07 From their founding in 1540 to this day Jesuits have been controversial Their centuries of missionary work have taken them to all corners of the world They have been accused of killing Kings and Presidents and contributing to colonization and destruction of cultures even participating in enslavement But the Jesuits have also been seen as bringers of light and education With their ferocity of purpose and intellectual rigor the Jesuits impact on world history cannot be ignored No surprise then that Jesuits appear in literature especially that literature of ideas exploration and social commentary otherwise known as science fiction This unique collection of essays explores how the Jesuit has long been part of science fiction s history and how Jesuit ideas and

characters are featured in some of science fiction's greatest works. In this collection we see Jesuits continue their missionary spirit as they take leave of the earth moving their missionary labors literally towards the heavens. Reason and revelation are now indeed on other worlds. In this collection we have explorations of philosophy, science, theology, and culture, all done in typical Jesuit fashion, always in various and foreign contexts. This collection is akin to others in its linking of religion and science fiction, but it is unique in its concentration on the Jesuits and science fiction. This collection will be of interest to scholars working and researching in the field of science fiction studies and would be suitable for courses on science fiction. But it will also be of interest and accessible to those of us who simply love science fiction for its power to explore other worlds and in this case to take some of the deepest human reflections, namely those on God, morals, and culture, lift them up and see what forms they may take on other worlds.

The Outline of Knowledge: The story of religion and philosophic thought. The personal romance of history James Albert Richards, 1924 Questing through the Riordanverse Carolyn M. Jones Medine, Nathan E. Fleeson, 2024-06-15

Questing through the Riordanverse Studying Religion with the Works of Rick Riordan examines the works of Rick Riordan and explores how these works relate to Religion and Theology. Despite the success and popularity of the works, scholars have not given the Riordanverse as much attention as other Young Adult and Middle Grade fantasy books published during the first part of the Twenty First Century. This volume begins to address that vacuum, drawing from a number of fields including Psychology, Media Studies, Queer Theory, and African American Studies to offer an interdisciplinary interpretation of Riordan's works and their impact on Religion and Theology. Contributors represent a diverse background, including perspectives from young scholars and students who grew up with the series to senior scholars considering where the series fits in the tradition of fantasy, religion, and literature.

The Cambridge Companion to Religious Studies Robert A. Orsi, 2012

Informative and provocative, this book introduces readers to debates in the contemporary study of religion and suggests future research possibilities.

Astrophilosophy, Exotheology, and Cosmic Religion Andrew M. Davis, Roland Faber, 2024-01-22

Astrophilosophy, Exotheology, and Cosmic Religion Extraterrestrial Life in a Process Universe applies Alfred North Whitehead's process philosophy and the associated process philosophies of Henri Bergson, Teilhard de Chardin, and others to the interdisciplinary layers of astrobiology, extraterrestrial life, and the impact of discovery. This collection, edited by Andrew M. Davis and Roland Faber, asks questions such as: How have process thinkers imagined universal creative evolution and its implications for philosophies, theologies, and religions beyond earth? How might their claims as to the primacy of organism, temporality, novelty, value, and mind enrich current discussions and debates across disciplines? As experts in their fields, the contributors are informed by but not limited to process conceptualities. The chapters not only advance recent discussions in astrobiology, cosmology, and evolution but also consider a constellation of philosophical topics from shared extraterrestrial knowledge and values to the possibilities or limitations afforded by AI technology, the Fermi Paradox, the Drake Equation, and the increasing need to nurture the cosmic dimensions of theological

and religious traditions Learning from Other Worlds Patrick Parrinder, 2001 A definite look at the state of science fiction studies today that surveys the field from Hugo Gernsback to the present **The Bookseller**, 1913 What is Religion? Aaron W. Hughes, Russell T. McCutcheon, 2021 Controversies over how to define the word religion have persisted for decades It is a term of art and of academic study but also one of governance technologies and of networks it is a concept whose diversity is often its own worst enemy Religion is as much a fuzzy set of conceptualizations and generalizations about a range of human activities as it is an authorizing system of persons ideas and practices What is Religion Debating the Academic Study of Religion invites readers to eavesdrop on scholarly debates over the limits of and uses for a word commonly used but infrequently defined in a precise manner This volume takes the temperature of the modern field of Religious Studies by inviting a diverse group of scholars to offer their own substantive contribution that builds on the shared opening prompt Religion is Their essays document the current state of the field and its various sub fields assess the progress that has been made over the past generation and propose new directions for future work Seventeen of the international field s leading scholars show how they work with each other s definition or sometimes the lack of a definition Of interest to students scholars and general readers alike What is Religion will provoke debate and provide insights into the state of the field

Science Fiction Patrick Parrinder, 2014-09-25 First published in 1979 This volume presents Science Fiction as a coherent system not as a collection of facts or random sequence of individual voices The contributors are concerned with less with surveying the bare facts of the genre than with interpreting their significance They attempt to establish the common properties of Science Fiction writing whether in the treatment of a theme or in SF of a given period or nationality

Islamic and Comparative Religious Studies William Albert Graham, 2010 William A Graham a leading international scholar in the field of Islamic Studies gathers together his selected writings in this volume under three sections 1 History and Interpretation of Islamic Religion 2 The Qur an as Scripture and 3 Scripture in the History of Religion This invaluable resource will be of primary interest to students of the Islamic tradition especially in regard to Qur anic piety Muslim ritual practice and fundamental structures of Islamic thought It will also be of interest to students of the comparative history of religion especially as regards the phenomenon of scripture and its analogs Graham s work in Islamic studies focuses largely on the analysis and interpretation of the religious dimensions of ritual action scriptural piety textual authority revelation tradition and major concepts such as grace and transcendence His work in the comparative history of religion has focused in particular on the problem of scripture as a cross cultural religious phenomenon that is more complex than simply sacred text This invaluable resource will be of primary interest to students of the Islamic tradition especially as regards Qur anic piety Muslim ritual practice and fundamental structures of Islamic thought and to students of the comparative history of religion especially as regards the phenomenon of scripture and its analogs **Christianity and Controversies over**

Homosexuality in Contemporary Africa Ezra Chitando, Adriaan van Klinken, 2016-05-12 Issues of homosexuality are the

subject of public and political controversy in many African societies today. Frequently these controversies receive widespread attention both locally and globally such as with the Anti Homosexuality Bill in Uganda. In the international media these cases tend to be presented as revealing a deeply rooted homophobia in Africa fuelled by religious and cultural traditions. But so far little energy is expended in understanding these controversies in all their complexity and the critical role religion plays in them. Complementing the companion volume *Public Religion and the Politics of Homosexuality in Africa*, this book investigates Christian politics and discourses on homosexuality in sub-Saharan Africa. The contributors present case studies from various African countries from Nigeria to South Africa and from Cameroon to Uganda focusing on Pentecostal Catholic and mainline Protestant churches. They critically examine popular Christian theologies that perpetuate homophobia and discrimination but they also discuss contestations of such discourses and emerging alternative Christian perspectives that contribute to the recognition of sexual diversity, social justice and human rights in contemporary Africa.

Mysticism and Experience Alex S. Kohav, 2020-08-31 *Mysticism and Experience: Twenty First Century Approaches* embarks on an investigation of the concept of mysticism from the standpoint of academic fields including philosophy, anthropology, religious studies, mysticism studies, literary studies, art criticism, cognitive poetics, cognitive science, psychology, medical research and even mathematics. Scholars across disciplines observe that although it has experienced both cyclical approval and disapproval, mysticism seems to be implicated as a key foundation of religion along with the highest forms of social, cultural, intellectual and artistic creations. This book is divided into four sections: The Exposure, The Symbolic, The Cognitive and The Scientific, covering all fundamental aspects of the phenomenon known as mysticism. Contributors taking advantage of recent advances in disciplinary approaches to understanding mystical phenomena address questions of whether progress can be made to systemically enrich, expand and advance our understanding of mysticism.

Dreaming, Religion and Society in Africa M.C. Jedrej, Rosalind Shaw, 2023-11-20 The contributors to this investigation of dreaming in a diversity of African cultures and settings have each approached the matter with a respect for an indigenous discourse which does not necessarily subscribe to Western evaluations of the objective and subjective. The matter of dreaming is not so much a psychological constant as ultimately sociological and historical. Dream discourse as a strategy deploys contingencies in the elaboration of social relationships and the defence, restoration and promotion of identities. Dreaming is therefore prominent in such critical settings as sickness and healing, artistic inspiration and craftwork, election to religious office, conversion to Islam or Christianity.

Religion and Retributive Logic Carole M. Cusack, Christopher Hartney, 2010 Garry Winston Trompf b. 1940 in his outstanding academic career has inspired scholars in the fields of Studies in Religion and the History of Ideas. In this volume his colleagues and students critique and expand upon the world of this outstanding academic. The book is divided into four parts: Melanesia, Ancient World Studies, Philosophical and Methodological Considerations and Historiography. Authors address Trompf's research in works such as *The Idea of Historical Recurrence in Western Thought*, *Early Christian Historiography* and themes

of Melanesian religion that Trompf address in Payback No study in the religions of Oceania or ideals of millennialism should ignore this critical assessment of Garry Trompf's work Science, Religion and Society Arri Eisen, Gary

Laderman, 2015-03-04 This unique encyclopedia explores the historical and contemporary controversies between science and religion. It is designed to offer multicultural and multi-religious views and provide wide-ranging perspectives. Science, Religion and Society covers all aspects of the religion and science dichotomy from humanities to social sciences to natural sciences and includes articles by theologians, religion scholars, physicians, scientists, historians, and psychologists among others. The first section, General Overviews, contains essays that provide a road map for exploring the major challenges and questions in science and religion. Following this, the Historical Perspectives section grounds these major questions in the past and demonstrates how they have developed into the six broad areas of contemporary research and discussion that follow. These sections: Creation, the Cosmos, and Origins of the Universe; Ecology, Evolution, and the Natural World; Consciousness, Mind, and the Brain; Healers and Healing; Dying and Death; and Genetics and Religion, organize the questions and research that are the foundation of the enormous interest and controversy in science and religion today **Intersections of Religion and**

Astronomy Chris Corbally, Darryl Dinell, Aaron Ricker, 2020-11-01 This volume examines the way in which cultural ideas about the heavens shape religious ideas and are shaped by them in return. Our approaches to cosmology have a profound effect on the way in which we each deal with religious questions and participate in the imaginative work of public and private world building. Employing an interdisciplinary team of international scholars, each chapter shows how religion and cosmology interrelate and matter for real people. Historical and contemporary case studies are included to demonstrate the lived reality of a variety of faith traditions and their interactions with the cosmos. This breadth of scope allows readers to get a unique overview of how religion, science, and our view of space have and will continue to impact our worldviews. Offering a comprehensive exploration of humanity and its relationship with cosmology, this book will be an important reference for scholars of Religion and Science, Religion and Culture, Interreligious Dialogue and Theology, as well as those interested in Science and Culture and Public Education.
