Beyond the Atmosphere Homer Edward Newell,1980 **Energy Resources for Human Settlement in the Solar System and Earth's Future in Space** William A. Ambrose,James F. Reilly II,Douglas C.

Peters,2013-03-14 The book's purpose is to provide the quantitative foundation for beginning to think about developing energy and minerals outside of Earth's atmosphere that are necessary to support scientific missions space and extra terrestrial scientific stations and permanent colonies and ultimately expand Earth's economy beyond the near earth environment to include space resources We cannot envision a situation where all resources required for future space activities are exported from Earth therefore this book clearly illustrates that an effective economy is possible beyond Earth's surface when we consider the resources available in near Earth space Our first audience is members of AAPG American Institute of Mining Metallurgical and Petroleum Engineers AIME and other professionals engaged in energy and resource development As energy professionals we are concerned on a daily basis with providing the necessary energy and minerals required for our growing world population and the increasing standard of living that comes with ample energy availability And more than anything else AAPG members are explorers We are the professionals who have pushed back the boundaries of our resource base from capturing petroleum resources from surface seeps to drilling onshore wells to extract oil and gas and to venturing offshore into increasingly difficult and hostile environments to supply the cheap and abundant energy made available by our advances in technology There are more similarities than differences between deepwater exploration and development and space exploration Beyond our own members however our audience is every rational human being who understands human health and well being quality of life education and freedom are dependent on the energy and minerals that support our advanced civilization Space is the next frontier and as the world civilization expands beyond Earth's surface we hope this publication serves to illustrate there are abundant opportunities to support and maintain and in fact allow to prosper civilization's expansion into space Publisher's website
