Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of

architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this

encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types

movements styles and building practices across traditional geographic and cultural boundaries **Modern Architecture**

Otto Wagner, 1988 In 1896 Otto Wagner's Modern Architecture shocked the European architectural community with its

impassioned plea for an end to eclecticism and for a modern style suited to contemporary needs and ideals utilizing the

nascent constructional technologies and materials Through the combined forces of his polemical pedagogical and

professional efforts this determined newly appointed professor at the Vienna Academy of Fine Arts emerged in the late 1890s

along with such contemporaries as Charles Rennie Mackintosh in Glasgow and Louis Sullivan in Chicago as one of the

leaders of the revolution soon to be identified as the Modern Movement Wagner's historic manifesto is now presented in a

new English translation the first in almost ninety years based on the expanded 1902 text and noting emendations made to the

1896 1898 and 1914 editions In his introduction Dr Harry Mallgrave examines Wagner's tract against the backdrop of

nineteenth century theory critically exploring the affinities of Wagner's revolutionary plan with the German eclectic debate of

the 1840s the materialistic tendencies of the 1870s and 1880s and the emerging cultural ideology of modernity Modern

Architecture is one of those rare works in the literature of architecture that not only proclaimed the dawning of a new era but

also perspicaciously and cogently shaped the issues and the course of its development it defined less the personal aspirations

of one individual and more the collective hopes and dreams of a generation facing the sanguine promise of a new century

Early Planning Utopias Dorina Pojani, Cathy Keys, Rory Little, 2025-07-15 There is little doubt that urban planning has

historically failed women To liberate the profession from patriarchal influences it is necessary to revisit the preconceptions

that shaped early efforts to design new cities or improve existing ones This book critiques the work of twenty male planning

luminaries who proposed urban models interventions and approaches on both sides of the North Atlantic during the Second

Industrial Revolution These early visions often presented as emancipatory or utopian set European and North American cities

as well as their colonial counterparts on an inexorable masculinist path The grand urban plans and projects of the late 19th and early 20th centuries were largely bankrolled by wealth extracted from colonial enterprises in Africa Asia and Latin America A reverence for geometry order and standardization alongside a monumental scale reflected a hegemonic and monolithic vision of the city with little tolerance for cultural or physical difference Limitless urban growth and the rapid effortless movement of people were valorised and for the first time in history roads became more important than homes Many of these same planners indifferent to cultural and physical differences readily accepted the continuation of class divisions in cities Comprehensive plans for both small and large settlements were hierarchical with the wealthiest or most powerful occupying central positions of power Functional segregation later institutionalized as zoning enforced spatial divisions between the public male and private female spheres Even as the planning agenda prioritized men's issues related to industry and commerce domestic ideology was promoted during this period The book also highlights the work of several female activists and reformers from the same era Although these women rarely envisioned full blown urban utopias or produced extensive writings on planning they worked to improve built environments for all Female reformers were more attuned to the lived experiences of city dwellers than male planners architects and engineers While men focused on structures and infrastructure women were concerned with the human condition Rather than expanding or clearing out the existing urban fabric women sought to restore it Practically women extended their reproductive duties from the home to the entire city envisioning it as a collective living space where everyone shared responsibility for one another's daily welfare This book calls for a return to that planning philosophy at a time when numerous techno utopias are being imagined and built often backed by major private corporations or individual male billionaires **Architecture** Henry-Russell

Hitchcock,1987-01-01 This book examines a period which is far more than a prelude to the age of steel and concrete The first half century culminated in the bold iron and glass of the Crystal Palace There follows the creation of the modern styles of the era based on traditions of the past and finally in the 20th century Art Nouveau and the modern architects in their generations Perret Wright Gropius Corbusier Mies van der Rohe and others in many parts of the world The Architectural and Furniture Designs of Otto Wagner, 1841-1918 Carole Cable,1990 Art Books Wolfgang M. Brandow-Faller,Laura Morowitz,2022-09-23 Erasures and Eradications in Modern Viennese Art Architecture and Design challenges the received narrative on the artists exhibitions and interpretations of Viennese Modernism The book centers on three main erasures the erasure of Jewish artists and critics erasures relating to gender and sexual identification and erasures of other marginalized figures and movements Restoring missing elements to the story of the visual arts in early twentieth century Vienna authors investigate issues of gender race ethnic and sexual identity and political affiliation Both well studied artists and organizations such as the Secession and the Austrian Werkbund and iconic figures such as Klimt and Hoffmann are explored as are lesser known figures and movements The book s thought provoking chapters expand the chronological contours and canon of artists surrounding Viennese Modernism to offer original nuanced and rich readings of individual works while offering a more diverse portrait of the period from 1890 through World War II and into the present The book will be of interest to scholars working in art history history design history architectural history and European studies **Architect's Drawings** Kendra Schank Smith,2006-08-11 The sketch is a window into the architects mind As

creative designers architects are interested in how other architects particularly successful ones think through the use of drawings to approach their work Historically designers have sought inspiration for their own work through an insight into

the minds and workings of people they often regard as geniuses This collection of sketches aims to provide this insight Here for the first time a wide range of world famous architects sketches from the Renaissance to the present day can be seen in a single volume The sketches have been selected to represent the concepts or philosophies of the key movements in architecture in order to develop an overall picture of the role of the sketch in the development of architecture The book illustrates the work of designers as diverse as Andrea Palladio Erich Mendelsohn Sir Edwin Lutyens Gianlorenzo Bernini Le Corbusier Michelangelo Alvar Aalto Sir John Soane Francesco Borromini Walter Gropius and contemporary architects Tadao Ando Zaha Hadid and Frank Gehry to name but a few Each chronologically placed sketch is accompanied by text providing details about the architect s life a look at the sketch in context and the connection to specific buildings where appropriate Style media and meaning are also discussed developing an explanation of the architect s thinking and intentions As creative designers themselves architects are interested in how other architects particularly successful ones think and draw and approach their work Historically designers have sought inspiration for their own work through an insight into the minds and workings of people they often regard as geniuses This collection of sketches aims to provide this insight Listed chronologically each sketch will be accompanied by a text which provides A short synopsis history of the architect s life a look at the sketch in this context the connection to a specific building where appropriate techniques of the sketch style and media meaning what the sketch shows about the architect s thinking and intentions followed by a select bibliography for each section

European Culture in the Great War Aviel Roshwald,Richard Stites,2002-02-14 It is

commonplace to refer to the First World War as an historical watershed but the nature of that great cataclysm's impact upon European society and culture remains a hotly debated topic. Many recent works have dealt with the Great War's role in shaping artistic and intellectual modernism and with the social history of the war. Yet the English language literature remains dominated by a disproportionate emphasis on the western European experience. This book redresses the balance by giving equal attention to the countries of eastern and central Europe and distinguishes itself by focusing specifically on cultural change during the course of the war as distinct from the after effects and memories of the conflict. The Viennese Waltz Danielle Hood, 2022-06-01. Satirized by Strauss II to highlight the deceptive aristocratic class under Schoenberg, Mahler and Webern, the waltz became the pivot between the conscious and unconscious, forcing a paralytic second state analogous with the stagnation of the Habsburg Empire. The Viennese Waltz shows how between 1864-1928 the waltz altered from signifier of upper class artifice to the link between man and nature and between Viennese and Other. Hood wields the Freudian concepts of the uncanny and the doppelgänger to explain this revolution from the simple signification of a dance to the psychological anxiety of a subject's place in society. Vienna Tag Gronberg, 2007. In Vienna at the turn of the twentieth century the question of what it meant to be modern was a heated topic of debate. Focusing on interior design, fashion and photography as well as on painting and architecture, this study casts fresh light on the vital role of the arts in these debates. The new art and literature was crucial in defining a distinctive Viennese modernity while at the same time challenging preconceptions about modern urban life. Many artists and writers produced work that questioned and undermined oppositions between city and country, interior spaces and panoramic views, masculinity and femininity. Issues of gender and the representation of the body were particularly important in establishing professional identities for some of Vienna's most prominent figures, including the Secessionist painters Gustav Klimt and Carl Moll, designers such as Adolf Loos and Emilie Flöge as well as the poet and feuilletonist Peter Altenberg. Intellectual life in turn of the century Vienna has often been characterised as a retreat from the public sphere. This book demonstrates how even in its ostensibly most private manifestations Viennese Modernism involved a highly performative set of practices aimed at an international audience.
