A State of Environmental Justice focuses attention on the byproducts of growth and development in the state of Michigan and describes who wins and who loses. Over the years while growth and development have been good for some it has been devastating for others the byproducts of growth and development have threatened the lives of people who breathe polluted air who are exposed to contaminated water and whose children play on polluted soil. People affected by toxins must organize to protect themselves their families and their communities from environmental harm. Let us be clear right from the beginning We are not against economic growth and development we are against certain kinds of economic growth and development i.e. growth and development that expose people to unnecessary harm. We feel it is possible to have economic growth and development with environmental protection. All of this is explored in Michigan A State of Environmental Justice

In the Spirit of a New People Randy J. Ontiveros, 2014. Reexamining the Chicano civil rights movement of the 1960s and 1970s. In the Spirit of a New People brings to light new insights about social activism in the twentieth century and new lessons for progressive politics in the twenty first. Randy J. Ontiveros explores the ways in which Chicano artists and activists used fiction, poetry, visual arts, theater and other expressive forms to forge a common purpose and to challenge inequality in America. Focusing on cultural politics, Ontiveros reveals neglected stories about the Chicano movement and its impact: how writers used the street press to push back against the network news; how visual artists such as Santa Barraza used painting, installations and mixed media to challenge racism in mainstream environmentalism; how El Teatro Campesino's innovative actos or short skits sought to embody new, more inclusive forms of citizenship; and how Sandra Cisneros and other Chicana novelists broadened the narrative of the Chicano movement. In the Spirit of a New People articulates a fresh understanding of how the Chicano movement contributed to the social and political currents of postwar America and how the movement remains meaningful today.

Ecological Borderlands Christina Holmes, 2016-10-13. Environmental practices among Mexican American women have spurred a reconsideration of ecofeminism among Chicana feminists. Christina Holmes examines ecological themes across the arts, Chicana activism and direct action groups to reveal how Chicanas can craft alternative models for ecofeminist processes. Holmes revisits key debates to analyze issues surrounding embodiment, women's connections to nature and spirituality's role in ecofeminist philosophy and practice. By doing so she challenges Chicanas to escape the narrow frameworks of the past in favor of an inclusive model of environmental feminism that alleviates Western biases. Holmes uses readings of theory, elaborations of ecological narratives in Chicana cultural productions, histories of human and environmental rights struggles in the Southwest and a description of an activist exemplar to underscore the importance of living with decolonizing feminist commitment in body, nature and spirit.

Break Through Michael Shellenberger, Ted Nordhaus, 2009-03-10. Two of Time magazine's Heroes of the Environment reject the status quo of liberal politics and offer a bold vision for addressing climate change. Michael Shellenberger and Ted Nordhaus triggered a firestorm of controversy with their self-published essay The Death of Environmentalism which argued that the existing model of

environmentalism cannot adequately address global warming and that a new politics needs to take its place In this follow up to their essay the authors give an expansive and eloquent manifesto for political change American values have changed dramatically since the environmental movement s greatest victories in the 1960s And while global warming presents exponentially greater challenges than any past pollution problem environmentalists continue to employ the same tired and ineffective tactics Making the case for abandoning old categories nature versus the market left versus right the authors articulate a new pragmatism that has already found champions in prominent figures such as Hillary Clinton and Barack Obama Seeing a connection between the failures of environmentalism and the failures of the entire left leaning political agenda the authors point the way toward an aspirational politics that will resonate with modern American values and be capable of tackling our most pressing challenges To win Nordhaus and Shellenberger persuasively argue environmentalists must stop congratulating themselves for their own willingness to confront inconvenient truths and must focus on building a politics of shared hope rather than relying on a politics of fear The New York Times [Break Through](#) Ted Nordhaus,Michael Shellenberger,2007 Publisher description *America's Changing Coasts* Diana M.
