Our Canal Population A Cry From The Boat Cabins With Remedy:

Our Canal Population George Smith, P. A. L. Vine, 1974 **Our Canal Population** George Smith, 1880 **Our Canal Population** George Smith (of Coalville, Leicester.), 1880 *Tracing Your Canal Ancestors* Sue Wilkes, 2020-01-31 Britain's industrial revolution depended on canals for the cheap movement of materials and goods until the coming of the railways. Canal companies struggled to compete and went into a long decline but much of the canal network is still with us today and interest in the history and heritage of canals and those who worked on them is strong. That is why Sue Wilkes's well researched and highly readable handbook on the subject is so valuable. She concentrates on the people who lived and worked on the waterways: the canal boatmen, their families, and their way of life; and those who depended on the canal trade for a living: the lock keepers, toll collectors, and canal company clerks. She provides a thorough practical guide to the sources: the archives, books, websites, societies available for researchers if they are studying our inland waterways or trying to find out about an ancestor who worked on the canals or was connected with them. Her book is essential reading for anyone interested in this aspect of the industrial past.

Gipsy Life George Smith, 1880 **The Degeneracy Crisis and Victorian Youth** Thomas Edward Jordan, 1993-01-01 A book in the ecology of child development. The Degeneracy Crisis and Victorian Youth studies stress in the lives of children in the Victorian age 1837-1901. The term degeneracy is pursued in the context of biosocial problems, especially those involving the young. The book begins by presenting an overview of the nineteenth century, noting the changes in population, urbanization, the reform movement, and the rise of Darwinism. It next examines the social and health contexts in which human development took place, considering genetics, nutrition, health, mortality, and climate. Jordan then addresses empirically the nature of growth in Victorian children and young adults, presenting height and health data and using them as the dependent measure for descriptive and multivariate analysis of the Victorian economy. The concept of degeneracy, the evolution of social policy, and the efforts of specific reformers are discussed with attention to the role of government policy toward the end of the period.

George Smith of Coalville: a chapter in philanthropy George SMITH (of Coalville, Leicester.), 1881 **Gipsy Politics and Social Change** Thomas Acton, 2022-02-01 This book first published in 1974 analyses the position of the Gypsies in Britain in the twentieth century and assesses its significance in their overall history. Two dramatic shifts in Government policy towards the Gypsies are examined in the 1880s and the 1960s as are the changes in the stereotype of the 'true Gypsy'. Dr Acton traces the developments of attitudes and economic conditions that gave rise to the 1970s increase in interest in Gypsies and discusses the concomitant political and pressure group activity. He gives an account of the historical background to modern Gypsy politics, describes the postwar situation of the Gypsies in England and Wales, including pro Gypsy pressure group activity up to 1965, and goes on to cover the campaigns of the Gypsy Council, including a sociological assessment of its work. He considers these aspects of Gypsy life in the light of modern sociological theory on minorities and race relations.

Pioneers in Public Health Jill Stewart, 2017-04-21 The public health

movement involved numerous individuals who made the case for change and put new practices into place. However, despite a growing interest in how we understand history to inform current evidence-based practice, there is no book focusing on our progressive pioneers in public health and environmental health. This book seeks to fill that gap. It examines carefully selected public and environmental health pioneers who made a real difference to the UK's health, some with international influence. Many of these pioneers were criticised in their life times, yet they had the strength of character to know what they were doing was fundamentally right and persevered often against many odds. Including chapters on Thomas Fresh, John Snow, Duncan of Liverpool, Margaret McMillan, George Cadbury, Christopher Addison, Margery Spring Rice and others. This book will help readers place pioneers in a wider context and to make more sense of their academic and practitioner work today, how evidence and what was historically understood by it underpins modern day practice and how these visionary pioneers developed their ideas into practice, some not fully appreciated until after their own deaths. *Pioneers in Public Health* sets the tone for a renewed focus on research into evidence-based public and environmental health, which has become subject of growing international interest in recent years.
