Our Earth Matters B.H. Desai, 2021-06-21 On 21 May 2019 it was officially recognized that we are now living in the Anthropocene our earth's latest geological epoch named for the unmistakable imprint of human activities This announcement came almost 60 years after the publication of Rachel Carson's landmark work of environmental writing *Silent Spring* and next year 2022 it will be 50 years since the first UN Conference on the Human Environment held in Stockholm in June 1972 This book *Our Earth Matters*

Pathways to a Better Common Environmental Future is a special issue of the journal Environmental Policy and Law which was first published in 1975. It presents 21 invited contributions by outstanding scholars from around the world which examine existing global regulatory approaches, processes, instruments and institutions for the protection of the global environment. The articles are grouped under four headings: Prognoses, Processes, Problematique and Prospects, and in them the authors have sought to explore answers to the existential environmental crisis. They urge us to ponder our reckless destruction of natural spaces, endangering of plant and animal species, poisoning of the environment and general disturbance of our essential ecological processes. The primary objective of the book is to raise the awareness of the global audience by inspiring scholars and decision makers to re-examine current global approaches to environmental issues and explore the future trajectory with new ideas and frameworks for international environmental governance in the 21st century and beyond. The book will be of interest to all those working to secure the sustainable future of the human race on our only abode, planet Earth.

Bharat H. Desai is Professor of International Law and Jawaharlal Nehru Chair in International Environmental Law, Centre for International Legal Studies, School of International Studies, Jawaharlal Nehru University, New Delhi. Editor in Chief of the journal Environmental Policy and Law, Amsterdam, IOS Press, and of the Yearbook of International Environmental Law, Oxford, OUP.

OUR FRAGILE WORLD: Challenges and Opportunities for Sustainable Development - Volume II M. K. Tolba, 2001-08-23. This publication, *Our Fragile World: Challenges and Opportunities for Sustainable Development*, presents perspectives of several important subjects that are covered in greater detail and depth in the Encyclopedia of Life Support Systems (EOLSS). The contributions to the two volumes provide an integrated presentation of knowledge and worldviews related to the state of Earth's natural resources, social resources, institutional resources, and economic and financial resources. They present the vision and thinking of over 200 authors in support of efforts to solve the complex problems connected with sustainable development and to secure perennial life support on The Blue Planet. These contributions are holistic, informative, forward-looking, and will be of interest to a broad readership. This volume presents contributions with focus on the Economic and Institutional Dimensions of Sustainable Development in two sections: KNOWLEDGE, TECHNOLOGY AND MANAGEMENT; Knowledge, Technology and Management; Economics, Finance and Trade; POLICY AND INSTITUTIONAL IMPLICATIONS FOR SUSTAINABLE DEVELOPMENT; Policy Issues; Institutional implications; Regional Analysis.

Beyond the World's End T. J. Demos, 2020-08-03. In *Beyond the World's End*, T. J. Demos explores cultural practices that provide radical propositions for living in a world beset by environmental and political crises. Rethinking relationships between aesthetics and an expanded political ecology that foregrounds just futurity, Demos examines how contemporary artists are diversely addressing urgent themes, including John Akomfrah's cinematic entanglements of racial capitalism with current environmental threats, the visual politics of climate refugees in work by Forensic Architecture and Teddy Cruz and Fonna Forman, and moving images of Afrofuturist climate justice in projects by Arthur Jafa and Martine Syms. Demos considers video and mixed media art that

responds to resource extraction in works by Angela Melitopoulos Allora Calzadilla and Ursula Biemann as well as the multispecies ecologies of Terike Haapoja and Public Studio Throughout Demos contends that contemporary intersections of aesthetics and politics as exemplified in the Standing Rock NoDAPL campaign and the Zad's autonomous zone in France are creating the imaginaries that will be crucial to building a socially just and flourishing future *Living in an Environmentally Traumatized World* Darlyne G. Nemeth, Judy Kuriansky, Robert B. Hamilton, 2012-09-20 This book follows environmental changes including those caused by human actions as well as those resulting from natural circumstances and provides a process to manage their impact on the future Whenever environmental damages are caused by natural or human made events there are long term effects for people This eye opening and unprecedented book explains the ongoing turmoil in the environment while presenting ways to alleviate its effect on humankind's physical and mental health *Living in an Environmentally Traumatized World* Healing Ourselves and Our Planet discusses recent environmental events and examines the reasons why the resulting changes are inevitable The authors assert that people experience six universal stages when they suffer from environmental trauma shock survivor mode basic needs awareness of loss spin and fraud and resolution The book presents coping strategies for navigating negative ecological shifts and provides a plan of action for responsibly managing our environment Additionally profiles of indigenous people who endure under environmental adversity provide real world examples of survival **Earth Polyphony** Suhasini Vincent, 2024-02-19 In *Earth Polyphony* Suhasini Vincent analyzes the theory of ecocriticism in its entirety and its existence in the global paradigm of climate change Vincent shows how a polyphony of voices can affect law and decision making in the era of the Anthropocene and aptly shows how voices can coexist as in Bakhtinian polyphony where multiple perspectives coexist despite contradictions and differences Vincent argues that both material and non material worlds are endowed with storied forms of knowledge that prompt ecocritical writers to engage in new experimental modes of expression She explores the material turn the animal turn and the narrative turn to highlight how law meets literature prompts eco activism and how these crisscrossing narratives influence each other to spark judicial activism in forums around the planet **Eco-critical Literature** Ogaga Okuyade, 2013 *Eco Critical Literature* Regreening African Landscapes critically examines the representations constructions and imaginings of the relationship between the human and non human worlds in contemporary African literature and culture It offers innovative incisive and critical perspectives on the importance of sustaining a symbiotic relationship between humans and their environment The book thus carries African scholarship beyond the mere analysis of themes and style to ethical and activist roles of literature having an impact on readers and the public It is a scholarship geared towards rectifying ecological imbalance that is prevalent in many parts of the continent that forms the setting context and thematic discourse of the works or authors studied in this book Besides sensitizing the African readership to the need for the restoration of harmony between man and the environment this book equally aims to further familiarize scholars and students working on African literature and culture
