Pustogarov,2000-04-17 The rule of law peace disarmament human rights these are no longer empty words but legal concepts steadily gaining force among nations If the slow but sure codification of international law that began with the first Geneva Convention of 1864 has put down roots against all odds it is because of the passionate determination of a few visionary but practical actors on the world s stage Pre eminent among these workers in the dawn was the Russian jurist diplomat and arbitrator F F Martens 1845 1909 Although Marten s reputation suffered during the Soviet era and on both sides of the Cold War the lasting effect of his ideas and initiatives can be traced all the way from his early years as a Law Professor at Petersburg University when his writing attracted the attention of the Czar through his direct participation in the great Peace Conferences at Brussels and The Hague to the legal underpinnings of the human rights regime embodied in today s international conventions and tribunals His sense of community and the individual in a global context andndash a difficult notion for lawyers to grasp in a world of competing nation states andndash has now become a widely accepted norm with increasingly effective enforcement mechanisms And even his contributions to procedural theory in areas such as extradition of political criminals and transnational enforcement of administrative law persist in coming to the forefront of today s international legal practice This English translation of the first major biography of Martens is in fact the most complete text in any language as the Russian author at the translator s request took the opportunity to revise his original work and even supplied two whole chapters missing from the original Russian edition of 1993 and subsequent editions and translations Pustogarov was among the first scholars to gain access to the near legendary Archive of the Foreign Policy of Russia and his biography of Martens contains a wealth of hitherto unavailable information on the more or less secret political maneuvers of the Great Powers in Martens time This is an important book for all international lawyers to read and study exposing as it does the deepest currents of the mainstream of international law in our time **Our Martens** Vladimir Vasil'evich

Illegal Annexation and State Continuity Lauri Mälksoo, 2021-10-18 The depth and intensity of the transformation in Eastern and Central Europe in the 1980 s and 1990 s took most diplomats and political commentators by surprise Needless to say European politics now looks completely different from how it did during the stale years of the Cold War This volume is an in depth analysis of one aspect of the transformation namely the Baltic States struggle to regain the statehood they had lost in the Soviet occupation in June 1940 It analyses the claim of illegality of the Soviet occupation arguments about possible prescription the legal consequences of illegality as well as the restoration of the statehood of the three Baltic States after 1990 The relevant facts are clearly described and the application of the legal rules is skillfully based

Rewriting Histories of the Use of Force Agatha Verdebout, 2021-09-23 It is commonly taught that the prohibition of the use of force is an achievement of the twentieth century and that beforehand States were free to resort to the arms as they pleased International law the story goes was indifferent to the use of force Reality as it stems from historical sources however appears much more complex Using tools of history sociology anthropology and social psychology this monograph offers new insights into the history of the prohibition of the use of force in international law Conducting in depth analysis of nineteenth century doctrine and State practice it paves the way for an alternative narrative on the prohibition of force and seeks to understand the origins of international law's traditional account In so doing it also provides a more general reflection on how the discipline writes rewrites and chooses to remember its own history

Mestizo International Law Arnulf Becker Lorca, 2015-01-01 The development of international law is

conventionally understood as a history in which the main characters states and international lawyers and events wars and peace conferences are European Arnulf Becker Lorca demonstrates how non Western states and lawyers appropriated nineteenth century classical thinking in order to defend new and better rules governing non Western states international relations By internalizing the standard of civilization for example they argued for the abrogation of unequal treaties These appropriations contributed to the globalization of international law With the rise of modern legal thinking and a stronger international community governed by law peripheral lawyers seized the opportunity and used the new discourse and institutions such as the League of Nations to dissolve the standard of civilization and codify non intervention and self determination These stories suggest that the history of our contemporary international legal order is not purely European instead they suggest a history of a mestizo international law
