understanding of these questions policymakers and advocates may find themselves reinventing the region This book provides an important understanding of how regionalism has played out in the past how policies shape places and the possibilities and limits of regional action Bruce J Katz director of the Brookings Institution Center on Urban and Metropolitan Policy was formerly chief of staff at the U S Department of Housing and Urban Development [Critical Reflections on Regional Competitiveness](#) Gillian Bristow,2010-04-05 Since the early 1990s governments and development agencies have become increasingly preoccupied with the pursuit of regional competitiveness However there is considerable confusion around what exactly regional competitiveness means how it might be achieved whether and how it can be measured and whether it is a meaningful and appropriate goal for regional economies The central aim of this book is to provide a comprehensive and critical account of these debates with reference to theory policy and practice and thus to explore the meaning and value of the concept of regional competitiveness The book is structured into three parts Part one introduces the concept of regional competitiveness by tracing its origins and exploring its different meanings in regional economic development This will critically engage with political economy approaches to understanding the nature and dominance of the competitiveness discourse Part two interrogates the pursuit of regional competitiveness in policy and practice This critically evaluates the degree to which the pursuit of competitiveness is encouraging convergence in policy agendas in regions through an examination of key determinants of policy sameness and difference notably benchmarking and devolved governance Part three explores the limitations to regional competitiveness and explores whether and how its predominance in the policy discourse might be challenged by alternative agendas such as sustainable development and wellbeing This focuses on the developing qualitative character of regional development This volume critically engages with the theory and policy of regional competitiveness thus providing the first integrated critique of the concept for undergraduate and postgraduate students as well as academics interested in regional development and policy It will unpack the concept of regional competitiveness and explain its usefulness limitations and policy appeal as well as examining its sustainability in the light of evolving governance structures and the imperatives of broadening regional development agendas **Reflections on Regionalism** Charles J. Chinese Foreign Relations: Reflections On Knowledge Production Ming Wan,2024-11-12 With China's global ascendancy Chinese foreign policy has become a popular area of study for scholars around the world Rather than simply contributing to this subject this book sets out to reflect on the field itself using as samples some of the author's previous work both published and unpublished covering different areas of Chinese foreign policy and adopting different approaches In doing so it examines how knowledge about Chinese foreign policy has developed focusing on areas such as traditions values perspectives and regionalism The field of Chinese foreign policy has evolved along with international relations and foreign policy analysis Studies on specific topics have generally been of high quality thanks to the competitive and extensive nature of academic research and exchange despite a perceived failure to predict Beijing's current assertive foreign policy

orientation Looking forward this book reflects on how certain current tendencies excessive focus on national security narrowing of academic exchange and access between China and the West and a shift to rivalry driven analysis threaten to lower the quality of future Chinese foreign policy studies in Western countries **Reflections on Regionalism** Margaret Kingsland, Montana State University--Bozeman, 1992 **Architectural Regionalism** Vincent B. Canizaro, 2012-03-20 In this rapidly globalizing world any investigation of architecture inevitably leads to considerations of regionalism But despite its omnipresence in contemporary practice and theory architectural regionalism remains a fluid concept its historical development and current influence largely undocumented This comprehensive reader brings together over 40 key essays illustrating the full range of ideas embodied by the term Authored by important critics historians and architects such as Kenneth Frampton Lewis Mumford Sigfried Giedion and Alan Colquhoun Architectural Regionalism represents the history of regionalist thinking in architecture from the early twentieth century to today **The New Politics of Regionalism** Ulf Engel, Heidrun Zinecker, Frank Mattheis, Antje Dietze, Thomas Plötze, 2016-10-04 This edited volume approaches regionalism as one potential pattern in a changing global order Since the end of the Cold War different forms of territorialization have emerged and we are confronted with an increasing number and variety of actors that are establishing regional projects This volume offers an innovative contribution to the study of this new complexity by exploring constellations of regional actors spatial scales and imaginations beyond state centred perspectives as well as on multiple often overlapping levels The chapters analyse the emergence trajectories and outcomes of regionalisms from the perspective of the Global South specifically concentrating on regional projects in Latin America and Africa but also in the Asia Pacific They attempt to identify the specific conditions and junctures of different forms of region making in their external global and internal local national dimensions The volume also places special emphasis on interactions spatial entanglements and comparisons between regionalisms in different parts of the world By expanding beyond the perspective of North South transfers this book seeks to better understand the dynamics and diversity of interregional interactions This volume will appeal to scholars of global studies international political economy international relations human geography and development studies as well as area studies specialists who focus on Latin America and Africa Reflections on Architecture, Society and Politics Graham Cairns, 2016-10-04 Reflections on Architecture Society and Politics brings together a series of thirteen interview articles by Graham Cairns in collaboration with some of the most prominent polemic thinkers and critical practitioners from the fields of architecture and the social sciences including Noam Chomsky Peggy Deamer Robert A M Stern Daniel Libeskind and Kenneth Frampton Each chapter explores the relationship between architecture and socio political issues through discussion of architectural theories and projects citing specific issues and themes that have led to and will shape the various aspects of the current and future built environment Ranging from Chomsky s examination of the US Mexico border as the architecture of oppression to Robert A M Stern s defence of projects for the Disney corporation and George W Bush this book places

Asante,2016-07-27 A critical appraisal of regionalism as a key strategy in Africa s development explaining the failures thus far of attempts at regional integration on the continent This is the first text to highlight the main features of the new post 1990 regional initiatives such as the all embracing African Economic Community and World Bank IMF African Development Bank EC and French initiatives and the challenges to Africa from trading blocs elsewhere in the post Uruguay Round environment **Liquid Regionalism in the Americas** Karina L. Pasquariello Mariano,Regiane Nitsch Bressan,Bruno

Theodoro Luciano,2025-02-25 This book develops a comprehensive analysis of contemporary regionalism in the Americas which the authors characterise as Liquid Regionalism given its unstable flexible and loose characteristics It innovates by introducing a new concept to assess regional initiatives in the American continents contributing to Latin American and comparative regionalism research agendas The book analyses major regional projects in the Americas and develops these into a novel typology of consultation cooperation and integration This typology helps explain the level of commitments and institutional depth of regional initiatives across the continent The book is for scholars postgraduate and undergraduate students interested in the regional and political dynamics of the Americas across the social sciences including international relations political science sociology international political economy international trade and history **Regional Worlds:**

Advancing the Geography of Regions Martin Jones,Ansari Paasi,2017-10-02 A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of region This idea prioritises both the intellectual and the practical development of regional studies This book drives the discussion further It stresses the complex forms of agency advocacy involved in the production and reproduction of regional spaces and space of regionalism as well as the importance of geohistory and context The book moves beyond the territorial relational divide that has characterized debates on regions and regional borders since the 1990s The contributors answer key questions from

different conceptual and concrete contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by various actors to maintain or transform the contested spatialities of societal power relations This book was based on a special issue of Regional Studies **Restructuring the Philadelphia Region** Carolyn Adams, 2008-08 Restructuring the Philadelphia Region offers one of the most comprehensive and careful investigations written to date about metropolitan inequalities in America's large urban regions Moving beyond simplistic analyses of cities versus suburbs the authors use a large and unique data set to discover the special patterns of opportunity in greater Philadelphia a sprawling complex metropolitan region consisting of more than 350 separate localities With each community operating its own public services and competing to attract residents and businesses the places people live offer them dramatically different opportunities The book vividly portrays the region's uneven development paying particular attention to differences in housing employment and educational opportunities in different communities and describes the actors who are working to promote greater regional cooperation Surprisingly local government officials are not prominent among those actors Instead a rich network of third sector actors represented by nonprofit organizations quasi governmental authorities and voluntary associations is shaping a new form of regionalism **The Uruguay Round and Beyond** Jagdish N. Bhagwati, Mathias Hirsch, 1999 Key players in world trade policy formation discuss the origins of the World Trade Organization and where it is going
