Malcolm Newson,2008-09-17 Water is newsworthy there is or will be a world water crisis Aggravated by climate change we are approaching the limits of human exploitation of freshwater resources notably in growing essential food The complexities and uncertainties associated with improving our management of fresh water take the potential remedies out of the hands of simple local hard engineering and into much larger units the basin the ecosystem and the global context and also require longer term perspectives The Third Edition follows the same structure as its predecessors presenting the historical and scientific backgrounds to land water interactions and establishing the links with development processes and policies Throughout its two major messages are that our new philosophy should be one of humans in the ecosystem and that the guidance from science being uncertain and contested must be operationalized in a participatory system of governance based on participation Following a review of progress towards these elements in the developed world the international case studies update the situation in the developing world following the Millennium Development Goals our new emphasis on poverty and on global food supplies This book covers the multitude of scientific research findings development of tools and spatial temporal scale challenges which have emerged in the last decade Tensions are highlighted in the current and future role of large dams country studies are retained and considerably updated and development contexts are explored in greater depth as a dividing line in capacity to cope with land and water stress Technical issues have been expanded to cover major droughts environmental flows and the restoration of rivers and wetlands A separate chapter picks up these themes under terms of their relationship with uncertainty and the widespread perception that a new ethos of adaptive management is needed in the water sector For students of geography environmental science hydrology and development studies this innovative edition provides a reasoned academic basis of evidence for sustainable adaptive management of rivers and related large scale ecosystems using more than 600 new sources It will also prove invaluable for lecturers and practitioners

*Restoring Colorado River Ecosystems* Robert W. Adler,2012-06-22 Over the past century humans have molded the Colorado River to serve their own needs resulting in significant impacts to the river and its ecosystems Today many scientists public officials and citizens hope to restore some of the lost resources in portions of the river and its surrounding lands Environmental restoration on the scale of the Colorado River basin is immensely challenging in addition to an almost overwhelming array of technical difficulties it is fraught with perplexing questions about the appropriate goals of restoration and the extent to which environmental restoration must be balanced against environmental changes designed to promote and sustain human economic development *Restoring Colorado River Ecosystems* explores the many questions and challenges

surrounding the issue of large scale restoration of the Colorado River basin and of large scale restoration in general Robert W Adler evaluates the relationships among the laws policies and institutions governing use and management of the Colorado River for human benefit and those designed to protect and restore the river and its environment He examines and critiques the often challenging interactions among law science economics and politics within which restoration efforts must operate Ultimately he suggests that a broad concept of restoration is needed to navigate those uncertain waters and to strike an appropriate balance between human and environmental needs While the book is primarily about restoration of Colorado River ecosystems it is also about uncertainty conflict competing values and the nature pace and implications of environmental change It is about our place in the natural environment and whether there are limits to that presence we ought to respect And it is about our responsibility to the ecosystems we live in and use
