Road To A Free Economy Shifting From A Socialist System The Example Of Hungary:

The Road to a Free Economy János Kornai, 1990 The socialist world of Eastern Europe is undergoing its second revolution of the 20th century moving away from a centralized government to one which is more democratic One of the central questions of this transition is how economic mechanisms may be used to help effect the change **Bulletin of the Atomic Scientists**, 1990-11 **The road to a free economy** János Kornai, 1990 **The Transformation Of Communist Systems** Bernard Chavance, Charles Hauss, Mark Selden, 2019-06-26 In the confrontation between the two main economic systems that has marked the twentieth century capitalism has been declared the winner by default over its adversary socialism Today establishing a market economy has become the primary goal of the formerly socialist countries The history of economic reform helps explain this remarkable turning point Attempts to improve the old centralized system by expanding enterprise autonomy in Poland the Soviet Union and East Germany and more radical reforms that limited the role of central planning in Yugoslavia Czechoslovakia Hungary and China encountered social and political obstacles or had unexpected and undesired effects During the 1980s the idea of a socialist market economy which had been seen as a third way between capitalism and centralized socialism was abandoned as economists gradually came to support a free market rather than the dogma of planning Through a comparative and historical analysis of change in socialist and post socialist systems this timely and original book clarifies the policies and pitfalls in this extraordinary transition Bernard Chavance provides a succinct introduction and analysis of the politics and economics of Eastern Europe from the creation of the Stalinist system in the Soviet Union through what he argues have been three major waves of reform since the 1950s to the dismantling of most socialist governments in the 1990s Exploring the link between the one party regime and the growing rigidity of socialist economic systems the author analyzes the failure of both incremental and radical reforms to adapt to new economic challenges thus leading to the ultimate collapse of communist regimes in Europe *The Institutional Economics of Russia's Transformation* Anton N. Oleinik, 2017-11-30 This book applies institutional theory to the analysis of the post Soviet Russian economy to bring to light the reasons why reforms have gone awry Emphasis is put on the elements missed in the early blueprints of reforms constraints embodied in formal and especially informal institutions Other aspects considered include the dominant model of power relationships and the networks of localized and personalized relationships among economic actors The first part provides a general description of the core concepts of institutional theory including both the old institutionalism of T Veblen and J Commons and the new institutional economics of R Coase O Williamson and D North and in the second part an institutional model of the post Soviet Russian economy is developed In the course of the analysis the authors discuss such unresolved issues as post privatization development in Russia and validity of the Coase theorem in the post Soviet institutional context Rich empirical data grounds the discussion throughout [Liberalization in the Developing World](#) Alex E. Fernandez Jilberto, Andre Mommen, 2012-10-12 Liberalization in the Developing World compares the success of

liberalization strategies in Asia Africa and Latin America over the past decade Three models emerge corresponding to the three continents covered which reflect the degree of state intervention in the economy and the success of the liberalization policies adopted The conclusions drawn demonstrate that economic and political liberalization do not have to go hand in hand On the contrary the case studies presented in this volume show that the role of the state can be crucial in mobilizing both the human and capital investment needed to be able to compete in international economy

Dynamics of the Mixed Economy Sanford Ikeda, 2002-09-11 Dynamics of the Mixed Economy applies the insights of modern Austrian political economy to examine economic policy in mixed economies It compares and contrasts standard approaches to the growth of the state including public choice with that of modern Austrian political economy examines in detail the nature and operation of the interventionist process in the context of nationalization regulation and the welfare state analyzes conditions that produce instability under laissez faire capitalism argues that the interventionist process is a spontaneous order and offers several pattern predictions regarding the character and behaviour of really existing economies

The Political Economy of Asian Transition from Communism Sujian Guo, 2017-11-28 A comparative study of the political economy of the transition from communism in East and Southeast Asian countries China North Korea Vietnam Laos and Cambodia addressing the key theoretical questions generated from the debate between shock therapists and gradualists While accurately defining the pre reform model this book explores the causal variables that have contributed to reform efforts within Asia examining the significance of the sequencing of political and economic transition and the interplay between politics and the economy in determining variations in transition outcomes Comparing the real world experiences of transition nations in communist Asia with Eastern Europe prominent questions are brought to the fore will market capitalism or market socialism prevail after the grand failure of communism This book makes an important contribution to the political economy theory of comparative communist and post communist studies and provides detailed analytical insights that will prove influential in future theoretical work

The Routledge Handbook of Comparative Economic Systems Bruno Dallago, Sara Casagrande, 2022-12-19 The Routledge Handbook of Comparative Economic Systems examines the institutional bases of economies and the different ways in which economic activity can function be organized and governed It examines the complexity of this academic and research field assessing the place of comparative economic studies within economics paying due attention to future perspectives and presenting critically important questions analytical methods and relative approaches This complements the recent revival of the systemic view of economic governance which was accelerated by the COVID 19 pandemic and likely even more the renewed East West clash epitomized by the Russian invasion of Ukraine and the West's reaction to it The Handbook is divided into five parts Each part deals with an issue of relevance for the discipline The first and second parts look at the subject content and approach of the discipline and its comparative method The third part looks at the idiosyncratic nature of different economic systems and their constituent elements The fourth part considers the

outcomes that different economic systems generate and how these outcomes change following the evolution and transformation of economic systems The last part takes stock and looks ahead at the challenges from a theoretical and applied perspective and the exogenous and endogenous factors promoting the advancement of the discipline including the interaction between and competition among varied approaches and opposing paradigms The Handbook brings together leading international contributors to reflect on the relevant debates and case or country studies provides a balanced overview of the results achieved and current knowledge as well as evolving issues and new fields of research The book provides researchers students and analysts with a complete critical and forward looking presentation and analysis of the content development challenges and perspectives of comparative economic studies Chapters 4 and 22 of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com Chapter 4 has been made available under a Creative Commons Attribution 4.0 license and Chapter 22 has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Commodifying Communism David L. Wank, 1999
 Commodifying Communism is an ethnographically grounded account of the institutional organization and political consequences of China's historically unprecedented market growth Drawing upon almost two years of ethnographic fieldwork this book challenges conventional views of post communist emerging markets being tied to the retreat of the state David Wank shows how entrepreneurs running private trading companies in Xiamen City Fujian Province one of China's five special economic zones maximize profit and security through patron client networks with local state agents The book examines how processes of opportunity exchange expectations and advantage are constrained by both statist and popular institutions in market clientelism It also considers the implications of market clientelism for the dynamism of China's emerging market economy relative to Eastern European post communist economies and its political consequences for state society and center local relations

The Radiant Past Michael Burawoy, János Lukács, 1992
 Communism once heralded as the radiant future of all humanity has now become part of Eastern Europe's past What does the record say about the legacy of communism as an organizational system Michael Burawoy and Janos Lukacs consider this question from the standpoint of the Hungarian working class Between 1983 and 1990 the authors carried out intensive studies in two core Hungarian industries machine building and steel production to produce the first extended participant observation study of work and politics in state socialism A fascinating and engagingly written eyewitness report on proletarian life in the waning years of goulash communism A richly rewarding book one that should interest political scientists in a variety of subfields from area specialists and comparativists to political economists as well as those interested in Marxist and post Marxist theory Elizabeth Kiss American Political Science Review A very rich book It does not merely offer another theory of transition but also presents a clear interpretive scheme combined with sociological theory and vivid ethnographic description Ireneusz Bialecki Contemporary Sociology Its informed skepticism of post Communist liberal euphoria its concern for workers and its fine

ethnographic details make this work valuable kos R na Tas American Journal of Sociology

On the Sequencing of Reforms in Eastern Europe Mr.Hans Genberg,1991-02-01 This paper discusses issues related to the sequencing of the reforms that are necessary to transform the economies in Eastern Europe into market economies It is first argued that the transition path of these economies will be smoother and less costly if a clear statement of the ultimate goals of the reforms is made at the outset Interdependence between different aspects of the reforms implies that an appropriate strategy is to move on a broad front from the very beginning of the transformation process dealing simultaneously with macroeconomic stabilization price reforms and convertibility and privatization of state enterprises It is also argued that a rapid reform process is preferable to a gradual one

Soviet Politics Richard Sakwa,2012-11-12 Soviet Politics in Perspective is a new edition of Richard Sakwas successful textbook Soviet Politics an introduction Thoroughly revised and updated it builds on the previous editions comprehensive and accessible exploration of the Soviet system from its rise in 1919 to its collapse in 1991 The book is divided into five parts which focus on key aspects of Soviet politics They are historical perspectives beginning with the Tsarist regime on the eve of Revolution the rise and development of Stalinism through to the decline of the regime under Brezhnev and his successors and Gorbachev s attempts to revive the system institutions of Government such as the Communist Party security apparatus the military the justice system local government and participation theoretical approaches to Soviet politics including class and gender politics the role of ideology and the shift from dissent to pluralism key policy areas the command economy and reform nationality politics and foreign and defence policy an evaluation of Soviet rule and reasons for its collapse Providing key texts and bibliographies this book offers the complete history and politics of the Soviet period in a single volume It will be indispensable to students of Soviet and post Soviet politics as well as the interested general reader

The International Political Economy of Transition Stuart Shields,2014-10-03 This book explores the role played by state and multinationals in shaping transition It uniquely integrates issues of globalisation and transnationalism into the analysis of post communism This book will be of interest to students and researchers of transition postcomunism political economy and European politics

Networks and Institutions in Europe's Emerging Markets Roger Schoenman,2014-05-29 Do ties between political parties and businesses harm or benefit the development of market institutions The post communist transition offers an unparalleled opportunity to explore when and how networks linking the polity and the economy support the development of functional institutions A quantitative and qualitative analysis covering eleven post socialist countries combined with detailed case studies of Bulgaria Poland and Romania documents how the most successful post communist countries are those in which dense networks link politicians and businesspeople as long as politicians are constrained by intense political competition This combination allowed Poland to emerge with stable institutions while Bulgaria demonstrates

that in developing economies intense political competition alone is harmful in the absence of dense personal and ownership networks. Indeed, as Romania illustrates, networks are so critical that their weakness is not mitigated even by low political competition. This title is available as Open Access on Cambridge Books Online and via Knowledge Unlatched. **Highway and Byways** János Kornai, 1995. Hungarian economist János Kornai first used the metaphor of a single path to postsocialist transition in his earlier book *The Road to a Free Economy*. The new metaphor that frames this collection of eight recent studies reflects a broader perspective and understanding of the complexities of transition: every highway and byway leads eventually to capitalism, Kornai observes, but to what kind, how fast, and at what cost? Who wins and who loses? Kornai draws from his experiences of Hungarian reform as well as from countries of the former Soviet Union to make several major points. The first three studies describe what went wrong in countries that tried to mix elements of planned and market economies. Efforts made by communist countries to introduce market socialism, the middle road, contained an inherent contradiction between the logic of socialism and the logic of a free enterprise system and were doomed to failure. In the studies that follow, Kornai analyzes the on-going dilemmas. The transition from communism to free enterprise is filled with daunting hurdles; it requires no less than redefining ownership, changing values concerning the distribution of wealth, transferring the control of political power, creating financial institutions and enforcing financial discipline, and making deep economic sacrifice. Kornai closes with an overall survey of postsocialist transition, describing the stages that countries tend to go through that will be particularly useful to scholars of comparative economic systems. **European Economics at a Crossroads** John Barkley Rosser, Richard P. F. Holt, David C. Colander, 2010-01-01. As Europe moves toward an integrated academic system, European economics is changing. This book discusses that change along with the changes that are happening simultaneously within the economics profession. The authors argue that modern economics can no longer usefully be described as neoclassical but is much better described as complexity economics. The complexity approach embraces rather than assumes away the complexities of social interaction. The authors also argue that despite all the problems with previous European academic structures, those structures allowed for more diversity than exists in US universities and thus were often ahead of US universities in exploring new cutting-edge approaches. The authors further argue that by trying to judge themselves by US-centric measures and to copy US universities, the European economics profession is undermining some of the strengths of the older system, strengths on which it should be building. While the authors agree that European economics needs to go through major changes in the coming decade, they argue that by building on Europe's strengths rather than trying to follow a US example, Europe will be more likely to become the global leader in economics in the coming decades rather than a second-rate copy of the US. The book begins with two chapters spelling out the authors' view of the changes in economics and European economics. This is followed by 11 interviews with a diverse set of innovative European economists from a range of European countries. In the interviews, these European economists reflect on the ongoing changes in economics generally and

in European economics specifically These interviews demonstrate how the economics profession is moving away from traditional neoclassical economics into a dynamic set of new methods and approaches incorporating work in behavioral economics experimental economics evolutionary game theory and ecological approaches complexity and nonlinear dynamics methodological analysis and agent based modelling that the authors classify as complexity economics This fascinating and easy to read book will prove a stimulating and thought provoking read for those with an interest in economics European education and the nature of academic disciplines generally

The European Economy Since 1945 Barry Eichengreen, 2008-07-21 In 1945 many Europeans still heated with coal cooled their food with ice and lacked indoor plumbing This book presents an account of the extraordinary development of Europe's economy since the end of World War II It argues that the continent's history has been critical to its economic performance

Populating No Man's Land János Mátyás Kovács, 2018-09-15 This edited volume opening the new series Revisiting Communism Collectivist Economic Thought in Historical Perspective focuses on the concepts of ownership the cornerstone of political economy in Soviet type societies The authors main objective is to contribute to the still unwritten chapter on collectivism in the history books of modern economic thought They trace the lengthy evolution of economic ideas of property reform under communism leading from the doctrine of blanket nationalization to projects of moderate privatization in eight countries of Eastern Europe and China The comparative analysis sheds light upon the tireless attempts of reform minded economists in communist countries to populate the no man's land of social property with quasi private economic actors such as bodies of workers self management and managers of state owned companies For a long time these were expected to crowd out the communist nomenklatura from its actual ownership position without challenging the primacy of collective property rights The fact that even the most radical reformers came to the conclusion that such surrogate owners would not be able to break the power of the ruling elite only on the eve of the 1989 revolutions demonstrates the immense strength of collectivist ideas The authors coin the term trap of collectivism to warn those demanding nationalization or other forms of non private ownership today it is rather easy even with the best intentions to walk into this trap but it may take long decades to break out from it
