Power and Politics After Financial Crises J. Robertson,2007-11-20 Foreign exploitation of economic crises in the developing world has been a central claim of neoliberal critics This important and recurring international theme is the subject of closer scrutiny in this new collection where contributors offer competing interpretations of the interaction between international and domestic forces after crises Reinventing Financial Regulation Avinash Persaud,2015-06-22 Reinventing Financial Regulation offers an analysis of the fundamental flaws that plague the current system of financial regulation one built around ideas of risk sensitivity and capital adequacy Author Avinash Persaud argues that while some sensible reforms have been introduced a fresh approach centered on risk capacity is required When the entire regime is compromised simply slapping bandages on each new wound will do nothing to cure the underlying disease Reinventing Financial Regulation goes beyond an urgent call to fix our profoundly troubled and damaged financial markets It is a blueprint for an effective financial regulation system that could very well save the future of finance What would a well regulated financial system look like Until now policymakers financial experts and leading academics have been content to avoid facing this question head on We have

been offered piecemeal reforms that ultimately leave the global financial system exposed to different versions of the same risks that so recently brought it to its knees The world economy literally cannot afford to dodge this question any longer Persaud's goal to bring clarity and a powerful simplicity to the financial regulation process results in a systematic and apolitical framework for fixing the world's fractured financial industry and transforming its regulation not just for today's financial climate but once and for all

The New Global Rulers Tim Büthe, Walter Mattli, 2013-07-21 Global private regulations who wins who loses and why Over the

past two decades governments have delegated extensive regulatory authority to international private sector organizations. This internationalization and privatization of rule making has been motivated not only by the economic benefits of common rules for global markets but also by the realization that government regulators often lack the expertise and resources to deal with increasingly complex and urgent regulatory tasks. The New Global Rulers examines who writes the rules in international private organizations as well as who wins who loses and why. Tim B the and Walter Mattli examine three powerful global private regulators: the International Accounting Standards Board which develops financial reporting rules used by corporations in more than a hundred countries and the International Organization for Standardization and the International Electrotechnical Commission which account for 85 percent of all international product standards. B the and Mattli offer both a new framework for understanding global private regulation and detailed empirical analyses of such regulation based on multi country multi industry business surveys. They find that global rule making by technical experts is highly political and that even though rule making has shifted to the international level domestic institutions remain crucial. Influence in this form of global private governance is not a function of the economic power of states but of the ability of domestic standard setters to provide timely information and speak with a single voice. B the and Mattli show how domestic institutions abilities differ particularly between the two main standardization players: the United States and Europe.
