Anderson, Lisa Kröger, 2016-05-20 The popularity of such widely known works as *The Lottery* and *The Haunting of Hill House* has tended to obscure the extent of Shirley Jackson s literary output which includes six novels a prodigious number of short stories and two volumes of domestic sketches Organized around the themes of influence and intertextuality this collection places Jackson firmly within the literary cohort of the 1950s The contributors investigate the work that informed her own fiction and discuss how Jackson inspired writers of literature and film The collection begins with essays that tease out what Jackson s writing owes to the weird tale detective fiction the supernatural tradition and folklore among other influences The focus then shifts to Jackson s place in American literature and the impact of her work on women s writing campus literature and the graphic novelist Alison Bechdel The final two essays examine adaptations of *The Haunting of Hill House* and Jackson s influence on contemporary American horror cinema Taken together the essays offer convincing evidence that half a century following her death readers and writers alike are still finding value in Jackson s words **Memoir Written During a Survey of the Roman Wall, Through the Counties of Northumberland**

**and Cumberland, in the Years 1852-1854** Henry MacLauchlan, 1858      **Roman Military Architecture on the Frontiers** Rob Collins, Matt Symonds, Meike Weber, 2015-11-30 The Roman army was one of the most astounding organizations in the ancient world and much of the success of the Roman empire can be attributed to its soldiers Archaeological remains and ancient texts provide detailed testimonies that have allowed scholars to understand and reconstruct the army's organization and activities This interest has traditionally worked in tandem with the study of Roman frontiers Historically the early imperial period and in particular the emergence of the frontiers has been the focus of research During those investigations however the remains of the later Roman army were also frequently encountered if not always understood Recent decades have brought a burgeoning interest in not only the later Roman army but also late antiquity more widely It is the aim of this volume to demonstrate that while scholars grappling with the late Roman army may want for a rich corpus of inscriptions and easily identifiable military installations research is revealing a dynamic less predictable force that was adapting to a changing world in terms of both external threats and its own internal structures The dynamism and ingenuity of the late Roman army provides a breath of fresh air after the suffocating uniformity of its forbears The late Roman army was a vital and influential element in the late antique empire Having evolved through the 3rd century and been formally reorganized under Diocletian and Constantine the *limitanei* guarded the frontiers while the *comitatenses* provided mobile armies that were fielded against external enemies and internal threats The transformation of the early imperial army to the late antique army is documented in the rich array of texts from the period supplemented by a perhaps surprisingly rich archaeological record      *Hadrian's Wall Path* Mark Richards, 2025-01-15 A guidebook to walking the Hadrian's Wall Path National Trail between Bowness on Solway in Cumbria and Wallsend Newcastle Covering 135km 84 miles this historic route takes around 10 days to hike Suitable for beginners it nevertheless requires a reasonable level of fitness to undertake as a multi day walk The route is described in 10 stages between 8 and 16km 5 10 miles in length and in both directions west east and east west An optional 2 stage extension through Newcastle to South Shields on the east coast is also provided Contains step by step description of the route alongside 1 100 000 OS maps Includes a separate map booklet containing OS 1 25 000 mapping and route line Handy route summary tables alternative walking schedules and accommodation listings help you plan your itinerary Packed with historical detail as well as maps marking locations of Roman milecastles and other archaeological sites on and near the wall Public transport by stage is listed for those wanting to break the trail into shorter sections

Hartley,Laura M. Popova,Adam T. Smith,2021-02-10 Social Orders and Social Landscapes marks a new direction in research for Eurasian archaeology that focuses on how people lived in their local environment and interacted with their near and distant neighbours rather than on overarching comparisons of archaeological culture complexes Stemming from the 2005 University of Chicago Eurasian Archaeology Conference the papers collected here reflect this new research agenda though the way in which each author addressed the theme of the conference and thus the book was strikingly varied This diversity arises out of the field s intellectual flux driven by the principled engagement of the rich analytical traditions of the Soviet CIS Anglo American and European schools Despite the variability in approaches and subject matter several key themes emerged 1 the reinterpretation culture categories by examining particular aspects of social life 2 the role social memory plays in the production of landscape and place 3 the influence of the built environment on societies and 4 the ways in which economic considerations affect social orders and landscapes The result is a book that helps to re image Eurasia as a complex landscape fragmented by historically contingent and shifting ecological and social boundaries rather than a bounded mosaic of culture areas or environmental zones Scholarly research on Eurasia was transformed by the collapse of the Soviet Union in 1991 Entire areas and fields of research became accessible to European and American scholars for the first time resulting in the emergence of new centers specializing in primary field investigations throughout the vast politically transformed landmass of Eurasia One such center is the University of Chicago that has recently sponsored two large international conferences on

Eurasian archaeology *Social Orders and Social Landscapes* is the product of the second Chicago conference held in spring 2005. The editors of the volume should be proud of their efforts that have resulted in such a broad ranging and prompt publication. The articles encompass a variety of disciplinary perspectives including archaeology, history, art history, palynology and zooarchaeology, extending chronologically from Neolithic and Bronze Age times to the formation of national identity in Turkey in the early 20th century and range geographically from Europe to China. Several articles reconstruct basic subsistence activities, others analyze distinctive settlement types and political and cultural frontiers including the assimilation and emergence of new self defined ethnic groups and the selective adoption of new systems of religious belief. What unites this diverse collection is their consistent emphasis on the social construction of reality and the production of social landscapes and memories that altered perceptions of the physical world and mediated the practical activities that here have been convincingly reconstructed from the archaeological record. In so doing, rigid stereotypes are questioned and novel interpretations persuasively advanced. Early Bronze Age pastoralism on the south Russian steppes did not consist exclusively of herding animals nor was it combined as it was later in the Iron Age with the pursuit of agriculture. Rather, D. Anthony and D. Brown suggest that at least in the Samara river valley the herding of animals occurred alongside the intensive gathering of wild nutritionally rich plants. The *kalas* of ancient Chorasnia are not cities nor even proto urban formations but rather are large heavily fortified enclosures meant to repel attacks of armed nomadic cavalry. They represent a continuation of a distinct Central Asian settlement pattern that began in the Bronze Age and that formed the center of a landscape divided into contiguous self contained oases. The Mongols not only herded livestock but also farmed, fished, hunted and traded throughout the vast area that they had conquered, uniting most of Eurasia into a single economically integrated system. New perspectives proliferate throughout this richly detailed and extremely broad ranging collected volume.

Phil Kohl, Professor of Anthropology and the Kathryn W. Davis Professor of Slavic Studies at Wellesley College, *Social Orders and Social Landscapes* is a stimulating addition to the still small literature in English, making the rich datasets from the archaeology of Eurasia widely accessible to Western scholars. The authors of the eighteen chapters analyze data from China to the Mediterranean from the fourth millennium BCE through the fourteenth century CE with the tools of art and architectural history, text analysis, paleobotany and paleozoology and anthropological theory among others. The product of a conference at the University of Chicago, this book fulfills the goal of the graduate student organizers to apply interdisciplinary approaches to understanding the archaeology and history of the Eurasian landmass in local terms through a focus on how people lived in their local environments. In the decade and a half since the end of the Soviet Union, scholarly communication has broadened and the mutual influences have stimulated many new and thought provoking views on the Eurasian past. This book is an exemplary product of the new scholarly discourse.

**Israelis and Palestinians in the Shadows of the Wall** Stéphanie Latte Abdallah,Cédric Parizot,2016-03-09 Shedding light on the recent mutations of the Israeli separation policy whose institutional and spatial configurations are increasingly complex this book argues that this policy has actually reinforced the interconnectedness of Israelis and Palestinian lives and their spaces Instead of focusing on the over mediatized separation wall this book deals with what it hides its shadows Based on fieldwork studies carried out by French Italian Israeli Palestinian and Swiss researchers on the many sides of the Israeli Palestinian divide it highlights a new geography of occupation specific forms of interconnectedness and power relations between Israeli and Palestinian spaces It offers a better understanding of the transformation of people s interactions their experiences and the ongoing economy of exchanges created by the separation regime This heterogeneous regime increasingly involves the participation of Palestinian and international actors Grounded in refined decryptions of territorial realities and of experiences of social actors daily lives this book goes beyond usual political media and security representations and discourses on conflict to understand its contemporary stakes on the ground
