Robert A. M. Stern, 1965-1980 Robert A. M. Stern, 1981

After the Future Gary Shapiro, 1990-01-01 This book

brings together diverse aspects of postmodernism by philosophers literary critics historians of architecture and sociologists It

addresses the nature of postmodernism in painting architecture and the performing arts and explores the social and political implications of postmodern theories of culture The book raises the question of whether postmodernism is to be seen as one more epoch or period within a succession of eras or as a challenge to the modernist practice of periodization itself The nature of the subject and of subjectivity is explored in order to resituate and contextualize the autonomous subject of the modern literary traditions Postmodern approaches to philosophy both analytical and continental including the work of Deleuze Derrida Foucault Rorty and Cavell are scrutinized and compared with a view to the question of foundationalism and with respect to philosophy's historical reflection on its own exclusionary practices After the Future discusses the ramifications of technology and programs for the renewal of community in a radically pluralistic society It also discusses the question of language and the diverse ways of distinguishing the articulate from the inarticulate *Contemporary Architects* Ann Lee Morgan, Colin Naylor, 1987 To strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day Editor's note **Design Book Review**, 1984 **The Making of Virginia Architecture** Charles E. Brownell, 1992 The long tradition of architecture in Virginia begins with the earliest structures at the Jamestown settlement in 1607 and continues today with some of the most advanced buildings yet completed anywhere In its legendary landmarks Mount Vernon Monticello the Virginia Capitol building in Richmond the James River plantation mansions the Reynolds Metals headquarters building in Richmond Washington National Airport and Dulles International Airport as well as in homes churches stores and office buildings across the state Virginia's architecture is a mirror of the many expressions of America's built environments This book invites the readers on a journey through the eye and mind of the architect from the very drawings that give shape and form to the idea through the tracks and traces found in long lost letters office records and other primary sources You will never see the buildings around you anywhere in the same way again From publisher's description □□□□□, 1988-05 Architecture, 1993
