Based on a comprehensive study of textual and contextual sources, including a significant amount of hitherto undiscovered or unpublished manuscripts of poems and letters, this volume offers the most complete and informative edition of works that are central to Browning's achievement. In addition, Browning's most important work of critical prose, the Essay on Shelley, is presented in an appendix with full annotation, and poems which refer to specific works of painting or sculpture are illustrated with colour plates. Volume four presents the poetry Browning produced during the decade following the death of his wife, including Dramatis Personae, which heralded a re-evaluation of his critical reputation, and The Ring and the Book, which many consider to be his greatest work. The Poems of Browning represents the most informative and up-to-date edition of the works of one of England's greatest poets.

English Literature, 1832-1890 Paul Turner, 1989. This volume continues the story of English literature through most of the Victorian period, a period that in religion and politics, science and technology, sociology, social life, and its physical environment, witnessed the often painful development of modern England. Paul Turner studies not only traditional genres like poetry, drama, and history, but also scientific and technical writing, art criticism, and religious controversy, biography, autobiography, travel books, and books for children. With over 170 authors discussed, the book is a complete survey of the field as seen in the light of present-day scholarship and against the context of classical and established precedents. Also included is a chronological table of contemporary events, historical background, and a bibliography.
