interpreting human picture making Rather than focus exclusively on pictures as they are embodied in various media such as painting sculpture or photography he links pictures to our mental images and therefore our bodies The body is understood as a living medium that produces perceives or remembers images that are different from the images we encounter through handmade or technical pictures Refusing to reduce images to their material embodiment yet acknowledging the importance of the historical media in which images are manifested An Anthropology of Images presents a challenging and provocative new account of what pictures are and how they function The book demonstrates these ideas with a series of compelling case studies ranging from Dante s picture theory to post photography One chapter explores the tension between image and medium in two media of the body the coat of arms and the portrait painting Another central chapter looks at the relationship between image and death tracing picture production including the first use of the mask to early funerary rituals in which pictures served to represent the missing bodies of the dead Pictures were tools to re embody the deceased to make them present again a fact that offers a surprising clue to the riddle of presence and absence in most pictures and that reveals a genealogy of pictures obscured by Platonic picture theory Reframing America Andrei Codrescu,1995 **Art and the Subway** Tracy Fitzpatrick,2009 Explores artistic production surrounding the world s most famous public transportation system from just before its opening in 1904 onwards Using images this work offers perspectives on ways in which the subway has been used as a subject about which to make art as a site within which to make art and as a canvas upon which to make art
