Robert Owen Ian L. Donnachie,2000 The hagiography generated by his disciples did neither his name nor reputation much good since they transformed the Social Father of their movement into the Father of Socialism a sobriquet that ill fits him yet it sticks to this day Ian Donnachie s study is the first full biography of Owen for over fifty years BOOK JACKET

Robert Owen and his Legacy Chris Williams,Noel Thompson,2011-11-15 J F C Harrison has written that for each age there is a new view of Mr Owen which is proof of the fertility and continuing relevance of his ideas Not just in Britain and America but today around the world anti poverty campaigners birth controllers collectivists communitarians co operators ecologists educationalists environmentalists feminists humanitarians internationalists paternalistic capitalists secularists campaigners for social justice trade unionists urban planners utopians welfare reformers can all find something to admire and inspire in the treasure trove that is the thought and actions of Robert Owen Owen was a creative genius of global significance a radical writer and activist of international reputation and reach who has inspired those seeking to change human society for the better The contributors to this volume include not only many of the recognized experts on the life work and legacy of Owen but also work from younger scholars or scholars coming to the field afresh The volume presents the most recent and original research on Owen Owen notoriously and impressively dabbled in many spheres and this is reflected in the its breadth of content The unifying themes are Owen s profile in his own time and the relevance of his ideas for the generations that followed His importance for educational and social philosophy for political economy and for the political theory of socialism are all discussed as are his contribution as a philanthropic employer his political activities and the specificities of his historical context *Address Delivered by Robert Owen, of New-Lanark, on Wednesday, the 27th of April, 1825, on the New Church of New-Harmony, Indiana* Robert Owen,1825 **The Individual and Utopia** Clint Jones,Cameron Ellis,2016-03-09 Central to the idea of a perfect society is the idea that communities must be strong and bound together with shared ideologies However while this may be true rarely are the individuals that comprise a community given primacy of place as central to a strong communal theory This volume moves away from the dominant current macro level theorising on the subject of identity and its relationship to and with globalising trends focusing instead on the individual s relationship with utopia so as to offer new interpretive approaches for engaging with and examining utopian individuality Interdisciplinary in scope and bringing together work from around the world The Individual and Utopia enquires after the nature of the utopian as citizen demonstrating the inherent value of making the individual central to utopian theorizing and highlighting the methodologies necessary for examining the utopian individual The various approaches employed reveal what it is to be an individual yoked by the idea of citizenship and challenge the ways that we have traditionally been taught to think of the individual as citizen As such it will appeal to scholars with interests in social theory philosophy literature cultural studies architecture and feminist thought whose work intersects with political thought utopian theorizing or the study of humanity or

A Life of Alexander Campbell Douglas A. Foster, 2020-06-02 The first critical biography of Alexander Campbell one of the founders of the Stone Campbell Movement A Life of Alexander Campbell examines the core identity of a gifted and determined reformer to whom millions of Christians around the globe today owe much of their identity whether they know it or not Douglas Foster assesses principal parts of Campbell's life and thought to discover his significance for American Christianity and the worldwide movement that emerged from his work He examines Campbell's formation in Ireland his creation and execution of a reform of Christianity beginning in America and his despair at the destruction of his vision by the American Civil War A Life of Alexander Campbell shows why this important but sometimes misunderstood and neglected figure belongs at the heart of the American religious story How Children Learn (New Edition) Linda Pound, 2019-10-08
An ideal introduction to the pioneers of educational theory for anyone studying childcare child development or education whether at further or higher education level The first edition of this book has been a best seller for almost a decade identified as one of the top ten books for students of child development or early childhood care and education In this new edition there is an increased emphasis on both what practice based on particular theories of learning looks like and on criticisms of each theory A glossary is included in sections highlighting words and concepts particular to the theorist in question Full colour photographs are used to illustrate some aspects of each theory or approach How Children Learn looks at a wide range of theorists and practitioners who have influenced current understandings of how children learn and what this means for work with young children The book summarises the findings and ideas of famous giants such as Montessori and Piaget as well as the more recent ideas of writers and thinkers such as Howard Gardner and Margaret Donaldson It begins by looking at the work and life of Comenius who is widely described as the father of modern education and looks at the theory behind different approaches to early childhood care and education such as Steiner Waldorf education HighScope and Te Whariki You will find this book invaluable in giving you a clearer picture of how ideas about children's learning have developed over the past four centuries *Unbuilt Utopian Cities 1460 to 1900: Reconstructing their Architecture and Political Philosophy* Tessa Morrison, 2016-03-09 Bringing together ten utopian works that mark important points in the history and an evolution in social and political philosophies this book not only reflects on the texts and their political philosophy and implications but also their architecture and how that architecture informs the political philosophy or social agenda that the author intended Each of the ten authors expressed their theory through concepts of community and utopian architecture but each featured an architectural solution at the centre of their social and political philosophy as none of the cities were ever built they have remained as utopian literature Some of the works examined are very well known such as Tommaso Campanella's *Civitas Solis* while others such as Joseph Michael Gandy's *Designs for Cottages* are relatively obscure However even with the best known

works this volume offers new insights by focusing on the architecture of the cities and how that architecture represents the author's political philosophy. It reconstructs the cities through a 3D computer program ArchiCAD using Artlantis to render. Plans, sections, elevations, and perspectives are presented for each of the cities. The ten cities are Filarete's Sforzina, Albrecht Dürer's Fortified Utopia, Tommaso Campanella's The City of the Sun, Johann Valentin Andreae's Christianopolis, Joseph Michael Gandy's An Agricultural Village, Robert Owen's Villages of Unity and Cooperation, James Silk Buckingham's Victoria, Robert Pemberton's Queen Victoria Town, King Camp Gillette's Metropolis, and Bradford Peck's The World a Department Store. Each chapter considers the work in conjunction with contemporary thought, the political philosophy, and the reconstruction of the city. Although these ten cities represent over 500 years of utopian and political thought, they are an interlinked thread that had been drawn from literature of the past and informed by contemporary thought and society. The book is structured in two parts.

The Last Utopians Michael Robertson, 2020-04-28. The Last Utopians delves into the biographies of four key figures: Edward Bellamy, William Morris, Edward Carpenter, and Charlotte Perkins Gilman, who lived during an extraordinary period of literary and social experimentation. The publication of Bellamy's *Looking Backward* in 1888 opened the floodgates of an unprecedented wave of utopian writing. Morris, the Arts and Crafts pioneer, was a committed socialist whose *News from Nowhere* envisions a workers' Arcadia. Carpenter boldly argued that homosexuals constitute a utopian vanguard. Gilman, a women's rights activist and the author of *The Yellow Wallpaper*, wrote numerous utopian fictions, including *Herland*, a visionary tale of an all-female society. These writers, Robertson shows, shared a belief in radical equality, imagining an end to class and gender hierarchies and envisioning new forms of familial and romantic relationships. They held liberal religious beliefs about a universal spirit uniting humanity. They believed in social transformation through nonviolent means and were committed to living a simple life rooted in a restored natural world. And their legacy remains with us today as Robertson describes in entertaining firsthand accounts of contemporary utopianism, ranging from Occupy Wall Street to a Radical Faerie retreat.

Manufacturing a Socialist Modernity Kimberly Elman Zarecor, 2011-04-10. Eastern European prefabricated housing blocks are often vilified as the visible manifestations of everything that was wrong with state socialism. For many inside and outside the region, the uniformity of these buildings became symbols of the dullness and drudgery of everyday life. *Manufacturing a Socialist Modernity* complicates this common perception. Analyzing the cultural, intellectual, and professional debates surrounding the construction of mass housing in early postwar Czechoslovakia, Zarecor shows that these housing blocks served an essential function in the planned economy and reflected an interwar aesthetic derived from constructivism and functionalism that carried forward into the 1950s. With a focus on prefabricated and standardized housing built from 1945 to 1960, Zarecor offers broad and innovative insights into

the country's transition from capitalism to state socialism. She demonstrates that during this shift architects and engineers consistently strove to meet the needs of Czechs and Slovaks despite challenging economic conditions, a lack of material resources, and manufacturing and technological limitations. In the process, architects were asked to put aside their individual creative aspirations and transform themselves into technicians and industrial producers. *Manufacturing a Socialist Modernity* is the first comprehensive history of architectural practice and the emergence of prefabricated housing in the Eastern Bloc. Through discussions of individual architects and projects as well as building typologies, professional associations, and institutional organization, it opens a rare window into the cultural and economic life of Eastern Europe during the early postwar period.

Kindergarten Architecture Mark Dudek, 2014-01-09 This fully illustrated guide to the planning and design of pre-school facilities for children is supported by a broad range of case studies drawn from around the world. Both new buildings and adapted premises are covered. Essays on social development and childcare put the projects in context. Based on extensive research, *Kindergarten Architecture* offers the designer a unique survey of the best designs in kindergarten architecture. Two new kindergarten buildings are added to the case study section, and the author provides guidance on the practical implications of recent changes to pre-school education. Contains two new case studies: 1. Corning Child Development Centre, New York; and 2. Børnecenter De Fire Årstider, Copenhagen.

America's Communal Utopias Donald E. Pitzer, 2010-01-20 From the Shakers to the Branch Davidians, America's communal utopians have captured the popular imagination. Seventeen original essays here demonstrate the relevance of such groups to the mainstream of American social, religious, and economic life. The contributors examine the beliefs and practices of the most prominent utopian communities founded before 1965, including the long-overlooked Catholic monastic communities and Jewish agricultural colonies. Also featured are the Ephrata Baptists, Moravians, Shakers, Harmonists, Hutterites, Inspirationists of Amana, Mormons, Owenites, Fourierists, Icarians, Janssionists, Theosophists, Cyrus Teed's Koreshans, and Father Divine's Peace Mission. Based on a new conceptual framework known as developmental communalism, the book examines these utopian movements throughout the course of their development, before, during, and after their communal period. Each chapter includes a brief chronology giving basic information about the group discussed. An appendix presents the most complete list of American utopian communities ever published. The contributors are Jonathan G. Andelson, Karl J. R. Arndt, Pearl W. Bartelt, Priscilla J. Brewer, Donald F. Durnbaugh, Lawrence Foster, Carl J. Guarneri, Robert V. Hine, Gertrude E. Huntington, James E. Landing, Dean L. May, Lawrence J. McCrank, J. Gordon Melton, Donald E. Pitzer, Robert P. Sutton, Jon Wagner, and Robert S. Weisbrodt.
