

Security Design Considerations

► Performance

- Security solutions cannot become bottlenecks on the network. Security appliances must provide low latency and high throughput.

► User Transparency

- Security appliances should not require reconfiguration of routers, gateways, or end-user devices

► Centralize management and administration

- Security solutions should provide centralized management and control, including: SNMP, MIB, audit and syslog

► Regulatory compliance

- Security solutions must be able to support the every evolving Federal and State government regulations, e.g., HIPAA

► Resiliency

- Security solutions must be available 7/24 with the ability to update security policies on the fly
