Seditions Heidegger And The Limit Of Modernity:

Seditions Heribert Boeder, 1997-01-01 This is the first book length work by Heribert Boeder to appear in English The essays brought together here several of which are to be found only in this volume bear witness to a new perspective on metaphysics modernity and so called postmodernity The seditiousness of Boeder s undertaking lies in his twofold intention to explicate what has been thought in metaphysics modernity and postmodernity as self contained rational totalities as history world and speech respectively and by means of those explications to recover dwelling as it has been made visible in the configurations of wisdom for example in Homer Paul and Holderlin He approaches each of these totalities by way of Heidegger s thought which marks the limit of modernity and as such is pivotal to Boeder s enterprise [The New Yearbook for Phenomenology and Phenomenological Philosophy](#) Burt Hopkins, Steven Crowell, 2020-10-07 The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl s groundbreaking work and the extension of this work by such figures as Scheler Heidegger Sartre Levinas Merleau Ponty and Gadamer **Heidegger and the Issue of Space** Alejandro A. Vallega, 2010-11 As the only full length treatment in English of spatiality in Martin Heidegger s work this book makes an important contribution to Heidegger studies as well as to research on the history of philosophy More generally it advances our understanding of philosophy in terms of its exilic character a sense of alterity that becomes apparent when one fully engages the temporality or finitude essential to conceptual determinations By focusing on Heidegger s treatment of the classical difficulty of giving conceptual articulation to spatiality the author discusses how Heidegger s thought is caught up in and enacts the temporality it uncovers in *Being and Time* and in his later writings Ultimately when understood in this manner thought is an exilic experience a determination of being that in each case comes to pass in a loss of first principles and origins and simultaneously as an opening to conceptual figurations yet to come The discussion engages such main historical figures as Plato Aristotle Descartes Kant and indirectly Husserl as well as contemporary European and American Continental thought *The Emergency of Being* Richard Polt, 2013-07-12 The heart of history for Heidegger is not a sequence of occurrences but the eruption of significance at critical junctures that bring us into our own by making all being including our being into an urgent issue In emergency being emerges from *The Emergency of Being* The esoteric *Contributions to Philosophy* often considered Martin Heidegger s second main work after *Being and Time* is crucial to any interpretation of his thought Here Heidegger proposes that being takes place as appropriation Richard Polt s independent minded account of the *Contributions* interprets appropriation as an event of emergency that demands to be thought in a future subjunctive mode Polt explores the roots of appropriation in Heidegger s earlier philosophy Heidegger s search for a way of thinking suited to appropriation and the implications of appropriation for time space human existence and beings as a whole In his concluding chapter Polt reflects critically on the difficulties of the radically antirationalist and antimodern thought of the *Contributions* Polt s original reading

neither reduces this challenging text to familiar concepts nor refutes it but engages it in a confrontation an encounter that respects a way of thinking by struggling with it He describes this most private work of Heidegger s philosophy as a dissonant symphony that imperfectly weaves together its moments into a vast fugue under the leitmotif of appropriation This fugue is seeded with possibilities that are waiting for us its listeners to develop them Some are dead ends viruses that can lead only to a monolithic monotonous misunderstanding of history Others are embryonic insights that promise to deepen our thought and perhaps our lives if we find the right way to make them our own Expanded Painting Mark Titmarsh,2017-08-24 The relevance of painting has been questioned many times over the last century by the arrival of photography installation art and digital technologies But rather than accept the death of painting Mark Titmarsh traces a paradoxical interface between this art form and its opposing forces to define a new practice known as expanded painting giving the term historical context theoretical structure and an important place in contemporary practice As the formal boundaries tumble the being of painting expands to become a kind of total art incorporating all other media including sculpture video and performance Painting is considered from three different perspectives ethnology art theory and ontology From an ethnological point of view painting is one of any number of activities that takes place within a culture In art theory terms painting is understood to produce objects of interest for humanities disciplines Yet painting as a medium often challenges both its object and image status expanding and creating hybrid works between painting objects screen media and text Ontologically painting is understood as an object of aesthetic discourse that in turn reflects historical states of being Thus Expanded Painting delivers a new kind of saying a post aesthetic discourse that is attuned to an uncanny tension between the presence and absence of painting Belief and Its Neutralization Marcus Brainard,2012-02-01 Presenting the first step by step commentary on Husserl s Ideas I Marcus Brainard s Belief and Its Neutralization provides an introduction not only to this central work but also to the whole of transcendental phenomenology Brainard offers a clear and lively account of each key element in Ideas I along with a novel reading of Husserl one which may well cause scholars to reconsider many long standing views on his thought especially on the role of belief the effect and scope of the epoch and the significance of the universal neutrality modification

Heidegger and Kabbalah Elliot R. Wolfson, 2019-10-01 While many scholars have noted Martin Heidegger's indebtedness to Christian mystical sources as well as his affinity with Taoism and Buddhism Elliot R Wolfson expands connections between Heidegger's thought and kabbalistic material By arguing that the Jewish esoteric tradition impacted Heidegger Wolfson presents an alternative way of understanding the history of Western philosophy Wolfson's comparison between Heidegger and kabbalah sheds light on key concepts such as hermeneutics temporality language and being and nothingness while yielding surprising reflections on their common philosophical ground Given Heidegger's involvement with National Socialism and his use of antisemitic language these innovative readings are all the more remarkable for their juxtaposition of incongruent fields of discourse Wolfson's entanglement with Heidegger and kabbalah not only enhances understandings of both but more profoundly serves as an ethical corrective to their respective ethnocentrism and essentialism Wolfson masterfully illustrates the redemptive capacity of thought to illuminate common ground in seemingly disparate philosophical traditions

The Time of Life William McNeill, 2012-02-01 The Time of Life explores Heidegger's rethinking of ethics and of the ethical in terms of an understanding of the original Greek notion of *thos* Engaging the ethical in Heidegger's thought in relation to Aristotle Michel Foucault and Friedrich Hlderlin William McNeill examines the way in which Heidegger's thought shifts our understanding of ethics away from a set of theoretically constructed norms principles or rules governing practice toward an understanding of the ethical as our concrete way of Being in the world Central to this study is the consideration of the ethical in relation to time the time of biological life the time of human life as biographical and historical the temporality of human action and the historicity of human thought In addition this book critically examines the predicament of ethical responsibility in a scientific technological era considering how the world of modern science and technology call upon us to rethink the nature of ethical responsibilities

Phenomenology or Deconstruction? Christopher Watkin, 2009-03-03 Phenomenology or Deconstruction challenges traditional understandings of the relationship between phenomenology and

deconstruction through new readings of the work of Maurice Merleau Ponty Paul Ricur and Jean Luc Nancy A constant dialogue with Jacques Derrida s engagement with phenomenological themes provides the impetus to establishing a new understanding of being and presence that exposes significant blindspots inherent in traditional readings of both phenomenology and deconstruction In reproducing neither a stock phenomenological reaction to deconstruction nor the routine deconstructive reading of phenomenology Christopher Watkin provides a fresh assessment of the possibilities for the future of phenomenology along with a new reading of the deconstructive legacy Through detailed studies of the philosophy of Merleau Ponty Ricur and Nancy he shows how a phenomenological tradition much wider and richer than Husserlian or Heideggerean thought alone can take account of Derrida s critique of ontology and yet still hold a commitment to the ontological This new reading of being and presence fundamentally re draws our understanding of the relation of deconstruction and phenomenology and provides the first sustained discussion of the possibilities and problems for any future deconstructive phenomenology
