Seeing Red:

Seeing Red Kirsten Karchmer, 2019-11-12 A world renowned women's health expert reveals a bold practical and data driven handbook for menstrual periods that provides an easy to navigate roadmap for improving your reproductive health and your everyday quality of life We've been lied to about periods PMS cramping bloating migraines irritability and anxiety may be extremely common but contrary to popular belief they aren't normal And they certainly aren't just part of being a woman despite the fact that this is what we've been told time and time again by friends family and even doctors After dedicating her entire clinical career to deconstructing the menstrual cycle women's health expert Kirsten Karchmer knows better During her more than twenty years of research and treating thousands of patients Karchmer found that most period problems women experience even the most painful ones are totally correctable and more surprisingly reflective of overall health and fertility In this forthright spirited and all encompassing guide Karchmer draws on her decades worth of experience as a women's health expert to break down the myths so many women have been led to believe about their periods For the more than 82 million women in the world who suffer from menstrual conditions Seeing Red explains the importance of a healthy menstrual cycle and how to achieve it and why it is important to the women's movement Menstrual cycles are not a curse but an instrument providing women with one of the most valuable regularly occurring and free diagnostic tools they have giving them access to unprecedented health and power

Bill Russell was not the first African American to play professional basketball but he was its first black superstar. From the moment he stepped onto the court of the Boston Garden in 1956, Russell began to transform the sport in a fundamental way, making him more than any of his contemporaries. The Jackie Robinson of basketball. In *King of the Court*, Aram Goudsouzian provides a vivid and engrossing chronicle of the life and career of this brilliant champion and courageous racial pioneer. Russell's leaping, wide-ranging defense altered the game's texture. His teams provided models of racial integration in the 1950s and 1960s, and in 1966 he became the first black coach of any major professional team sport. Yet like no athlete before him, Russell challenged the politics of sport. Instead of displaying appreciative deference, he decried racist institutions, embraced his African roots, and challenged the nonviolent tenets of the civil rights movement. This beautifully written book, sophisticated, nuanced, and insightful, reveals a singular individual who expressed the dreams of Martin Luther King Jr. while echoing the warnings of Malcolm X. *Bioluminescence* Marc Zimmer, 2015-08-01

What do giant squids, mantis shrimp, and fireflies have in common? These animals, along with a wide range of creatures, are able to give off light; this is called bioluminescence. Different species use different chemistries to bioluminesce, and they produce their light for a variety of reasons, including communication, hunting, and self-defense. Bioluminescence is a unique and fascinating adaptation found in the animal kingdom. Surprisingly, about half of all known phyla, a classification for animals that share the same body type, contain some bioluminescent species. Scientists don't yet understand all facets of bioluminescence, but they have managed to harness the glow and use it in a myriad of ways. One of the most important applications involves using bioluminescence as a microscope in medical studies. For example, laboratory scientists can create fluorescent malaria parasites to track the path by which the disease is spread from a mosquito to the animal it bites. Bioluminescent proteins are also helping researchers learn more about cancer, HIV, and other viruses and complex neurological processes. In fact, bioluminescent proteins are so useful to twenty-first-century medicine that two groups of scientists, one in 2008 and the other in 2014, were awarded the Nobel Prize in Chemistry for their work with these proteins and related technologies. Even artists and fashion designers use bioluminescence in their work to create glowing, light-sensitive paintings and clothing lines. Author Marc Zimmer, a world-renowned specialist in fluorescent proteins, takes readers on a glowing journey into the frontiers of bioluminescence. **David Levy's Guide to Variable Stars**
