Seeing The Invisible In Late Antiquity And The Early Middle Ages:

Seeing the Invisible in Late Antiquity and the Early Middle Ages Giselle de Nie, Karl Frederick Morrison, Marco Mostert, 2005 Limiting itself to the vital centuries when the late Roman West reshaped itself into a first Europe the conference explored the dominant conception of human nature in that era that human existence was both body in the visible world of material things and soul in the invisible world of spirit This was a legacy of pre Christian elements handed down from Greek philosophy and Hebrew Scriptures Assimilating it to indigenous cultures in the Roman West many alien to the ancient Mediterranean world precipitated sea changes in the understanding of human psychology Ensuing frictions sparked extraordinary expressions of creativity in words and visual images It also created dangerously subversive disequilibriums in the collective mentality within elites and between them and majority cultures The papers in this volume investigate numerous configurations of a new culture taking shape in that volatile environment They contribute to continuing debates about the cognitive co ordination of words and pictorial images and to cross disciplinary dialogues in such disparate fields as art history religious literature mysticism and cultural anthropology

The Corporeal Imagination Patricia Cox Miller, 2012-02-28 With few exceptions the scholarship on religion in late antiquity has emphasized its tendencies toward transcendence abstraction and spirit at the expense of matter In *The Corporeal Imagination* Patricia Cox Miller argues instead that ancient Christianity took a material turn between the fourth and seventh centuries During this period Miller contends there occurred a major shift in the ways in which the human being was oriented in relation to the divine a shift that reconfigured the relationship between materiality and meaning in a positive direction *The Corporeal Imagination* is a groundbreaking investigation into the theological poetics of material substance in late ancient Christian texts From hagiographies to literary descriptions of sacred paintings to treatises on relics and theurgy Miller examines a wide variety of ancient texts to reveal how Christian writers increasingly described the matter of the world as invested with divine power By appealing to the reader's sensory imagination Christian texts endowed phenomena like relics saints bodies in hagiography and saints presence in icons with a visual and tactile presence The book draws on a variety of contemporary theoretical models to elucidate the significance of all these materials in ancient religious life and imagination

Envisioning Experience in Late Antiquity and the Middle Ages Giselle de Nie, 2016-05-06 Our imagination reveals our experience of ourselves and our world The late philosopher of science and poetry Gaston Bachelard introduced the notion that each image that comes to mind spontaneously is a visual representation of the cognitive and affective pattern that is moving us at the time often unconsciously When such a mental image inspires a picture or text it evokes in the mind of the reader or beholder a replication of the internal pattern that originally inspired the artist or writer Thus mental images are rarely empty fantasies Whereas intellectual concepts are conscious constructions of abstracted relations mental images evoked by texts and pictures often point like dreams to pre verbal experience that patterns itself through multiplying associations and analogies

These mental images can also manifest their own limits pointing indirectly to experiences beyond what can be expressed and communicated. The six essays in this volume seek to uncover the dynamic patterns in verbal and pictorial images and to evaluate their potentialities and limitations. Thematically ordered according to their specific focus, the essays begin with material images and move on to increasing degrees of immateriality. The subjects treated are verbal descriptions of an icon and of a statue, imaginative visions and auditions evoked by material depictions, verbal imagery describing imagined sculptures and scenes as compared with drawings of a moving historical pageant, drawings of symbolic figures representing subtle relationships between verbal expositions that cannot be syntactically represented, dream images that precipitate actual healing and aural patterns in a sounded text that are experienced as images of affective dynamisms.

Death and Rebirth in Late Antiquity Lee M. Jefferson, 2022-08-16. Death and rebirth was of vital importance to early Christians in late antiquity. In late antiquity, death was all encompassing. Mortality rates were high; plague and disease in urban areas struck at will, and one lived on the knife's edge regarding one's health. Religion filled a crucial role in this environment, offering an option for those who sought cure and comfort. Following death, the inhumed were memorialized, providing solace to family members through sculpture, painting, and epigraphy. This book offers a sustained interdisciplinary treatment of death and rebirth, a theme that early Christians and scholars found important. By analysing the theme of death and rebirth through various lenses, the contributors deepen our understanding of the early Christian funerary and liturgical practices as well as their engagement with other groups in the Empire.

Once Out of Nature Andrea Nightingale, 2011-06-01. *Once Out of Nature* offers an original interpretation of Augustine's theory of time and embodiment. Andrea Nightingale draws on philosophy, sociology, literary theory, and social history to analyze Augustine's conception of temporality, eternity, and the human and transhuman condition. In Nightingale's view, the notion of embodiment illuminates a set of problems much larger than the body itself: it captures the human experience of being an embodied soul dwelling on earth. In Augustine's writings, humans live both in and out of nature: exiled from Eden and punished by mortality, they are resident aliens on earth. While the human body is subject to earthly time, the human mind is governed by what Nightingale calls psychic time. For the human psyche, always stretches away from the present moment where the physical body persists into memories and expectations. As Nightingale explains, while the body is present in the here and now, the psyche cannot experience self-presence. Thus, for Augustine, the human being dwells in two distinct time zones: in earthly time and in psychic time. The human self then is a moving target. Adam, Eve, and the resurrected saints, by contrast, live outside of time and nature; these transhumans dwell in an everlasting present. Nightingale connects Augustine's views to contemporary debates about transhumans and suggests that Augustine's thought reflects our own ambivalent relationship with our bodies and the earth. *Once Out of Nature* offers a compelling invitation to ponder the boundaries of the human.

Perceptions of the Body and Sacred Space in Late Antiquity and Byzantium Jelena Bogdanovic, 2018-04-09. *Perceptions of the Body and Sacred Space in Late Antiquity and Byzantium*

seeks to reveal Christian understanding of the body and sacred space in the medieval Mediterranean Case studies examine encounters with the holy through the perspective of the human body and sensory dimensions of sacred space and discuss the dynamics of perception when experiencing what was constructed represented and understood as sacred The comparative analysis investigates viewers recognitions of the sacred in specific locations or segments of space with an emphasis on the experiential and conceptual relationships between sacred spaces and human bodies This volume thus reassesses the empowering aspects of space time and human agency in religious contexts By focusing on investigations of human endeavors towards experiential and visual expressions that shape perceptions of holiness this study ultimately aims to present a better understanding of the corporeality of sacred art and architecture The research points to how early Christians and Byzantines teleologically viewed the divine source of the sacred in terms of its ability to bring together but never fully dissolve the distinctions between the human and divine realms The revealed mechanisms of iconic perception and noetic contemplation have the potential to shape knowledge of the meanings of the sacred as well as to improve our understanding of the liminality of the profane and the sacred

Prudentius, Spain, and Late Antique Christianity Paula Hershkowitz, 2017-01-05 This book provides an innovative approach to the Hispano Roman Christian poet Prudentius and his poetry It is a breakthrough in Prudentian scholarship which unifies the differing disciplines of history archaeology literature and art history in arguing that Prudentius and his envisaged Spanish audience cannot be fully understood in isolation from their environment in late fourth and early fifth century Spain Paula Hershkowitz focuses on Prudentius Peristephanon his collection of verses celebrating the deaths of martyrs and places these poems within the context of Prudentius world uniquely employing material visual and textual remains as evidence for its religious social and cultural affiliations It also draws on this material evidence to contextualise Prudentius awareness of the significance of the visual as a means of promoting beliefs against the background of this crucial formative period in religious history when many of his Spanish audience were not yet fully committed to the Christian faith

Art, Architecture, and the Moving Viewer, c. 300-1500 CE , 2022-04-19 Premodern architecture and built environments were fluid spaces whose configurations and meanings were constantly adapting and changing The production of transitory meaning transpired whenever a body or object moved through these dynamic spaces Whether spanning the short duration of a procession or the centuries of a building s longue dur e a body or object in motion created in the moment narratives that unfolded through time and space The authors in this volume forge new approaches to architectural studies by focusing on the interaction between monuments artworks and their viewers at different points in space and time Contributors are Christopher A Born Elizabeth Carson Pastan Nicole Corrigan Gillian B Elliott Barbara Franz Anne Heath Philip Jacks Divya Kumar Dumas Brigitte Kurmann Schwarz Ashley J Laverock Susan Leibacher Ward Elodie Leschot Meghan Mattsson McGinnis Michael Sizer Kelly Thor and Laura J Whatley

The Traditio Legis: Anatomy of an Image Robert Couzin, 2015-04-30 This monograph engages in a close reading of the traditio legis highlighting its novelty and complexity to

early Christian viewers The image is analyzed as a conflation of two distinct forms of representation each constructed of unusual and potentially multivalent elements *The Beginnings of the Cult of Relics* Robert Wiśniewski, 2019 Christians have often admired and venerated the martyrs who died for their faith but for a long time thought that the bodies of martyrs should remain undisturbed in their graves Initially the Christian attitude towards the bones of the dead saint or not was that of respectful distance The *Beginnings of the Cult of Relics* examines how this attitude changed in the mid fourth century Robert Wiśniewski investigates how Christians began to believe in the power of relics first over demons then over physical diseases and enemies He considers how the faithful sought to reveal hidden knowledge at the tombs of saints and why they buried the dead close to them An essential element of this new belief was a strong conviction that the power of relics was transferred in a physical way and so the following chapters study relics as material objects Wiśniewski analyses how contact with relics operated and how close it was Did people touch kiss or look at the very bones or just at tombs and reliquaries which contained them When did the custom of dividing relics begin Finally the book deals with discussions and polemics concerning relics and attempts to find out the strength of the opposition which this new phenomenon had to face both within and outside Christianity on its way to become an essential element of medieval religiosity
