Segmented Worlds And Self Group Life And Individual Consciousness:

Segmented Worlds and Self Yi-fu Tuan, 1982 *The European Dream* Jeremy Rifkin, 2013-04-19 The American Dream is in decline Americans are increasingly overworked underpaid and squeezed for time But there is an alternative the European Dream a more leisurely healthy prosperous and sustainable way of life Europe's lifestyle is not only desirable argues Jeremy Rifkin but may be crucial to sustaining prosperity in the new era With the dawn of the European Union Europe has become an economic superpower in its own right its GDP now surpasses that of the United States Europe has achieved newfound dominance not by single mindedness driving up stock prices expanding working hours and pressing every household into a double wage earner conundrum Instead the New Europe relies on market networks that place cooperation above competition promotes a new sense of citizenship that extols the well being of the whole person and the community rather than the dominant individual and recognizes the necessity of deep play and leisure to create a better more productive and healthier workforce From the medieval era to modernity Rifkin delves deeply into the history of Europe and eventually America to show how the continent has succeeded in slowly and steadily developing a more adaptive sensible way of working and living In *The European Dream* Rifkin posits a dawning truth that only the most jingoistic can ignore Europe's flexible communitarian model of society business and citizenship is better suited to the challenges of the twenty first century Indeed the European Dream may come to define the new century as the American Dream defined the century now past http://www.loc.gov/catdir/enhancements/fy0720/2004047935_d.html Segmented Worlds and Self Yi-fu Tuan, **Evolutionary**

Competence M. Montuori, 2023-07-31 *Escapism* Yi-Fu Tuan, 2000-10-31 Acclaimed cultural geographer Yi Fu Tuan considers humanity's enduring desire to escape reality and embrace alternatives such as love culture and Disneyland In prehistoric times our ancestors began building shelters and planting crops in order to escape from nature's harsh realities Today we flee urban dangers for the safer reconfigured world of suburban lawns and parks According to geographer Yi Fu Tuan people have always sought to escape in one way or another sometimes foolishly often creatively and ingeniously Glass tower cities suburbs shopping malls Disneyland all are among the most recent monuments in our efforts to escape the constraints and uncertainties of life ultimately those imposed by nature What cultural product Tuan asks is not escape In his new book the capstone of a celebrated career Tuan shows that escapism is an inescapable component of human thought and culture Discourses of Disease Howard Y. F. Choy, 2016-05-18 The meanings of disease have undergone such drastic changes with the introduction of modern Western medicine into China during the last two hundred years that new discourses have been invented to theorize illness redefine health and reconstruct classes and genders As a consequence medical literature is rewritten with histories of hygiene studies of psychopathology and stories of cancer disabilities and pandemics This edited volume includes studies of discourses about both bodily and psychiatric illness in modern China bringing together ground breaking scholarships that reconfigure the fields of history literature film psychology anthropology and gender

Communication in Eastern Europe Fred L. Casmir, 2012-12-06 This volume represents a clear attempt to learn something from the events in Eastern European countries It does not start with simplistic or old assumptions based on convenient Western communication models but instead takes a new approach If chaos theory could fundamentally change how physicists looked at order in the universe then it may be of value for communication scholars to attempt to understand the diversity of chaos or order in the human universe rather than attempt to force existing models on it for their own explanatory purposes This book is not merely based on the study of select groups of university students or on laboratory settings created in the minds of social scientists It seeks to understand some of the real world including the historical backgrounds and the theoretical assumptions brought to studies of intercultural conflicts Using personal and professional insights developed during firsthand contacts with existing situations chapter authors illustrate some of the realities by using the complexity of changes in Eastern European states during the final decade of the 20th century From education to business from the role of women to the role of mass media from the impact of political systems to the impact of history communication between those who are culturally diverse though they may have been arbitrarily forced to live under the same political roof is the theme of these scholarly studies The editor's reason for developing this volume of original essays is his belief that diversity rather than assumed similarity or even sameness based on the use of inadequate terminology is necessary for learning from contemporary human experiences He further believes that diversity and the significant roles of cultural values as well as of history need to become key concepts in the model with which to begin when it comes to the study of various aspects of intercultural communication It is therefore vital that scholars who represent various points of view and backgrounds contribute to that process After all understanding what is happening in the world is centrally anchored in or related to effective and successful intercultural communication between scholars who have different academic and personal backgrounds
