StarBriefs 2001 ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions **PC Mag** ,1986-06-24 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology 9.78E+12 Alain Klarsfeld,Lize A.E. The Spiralling of the Securitisation of Migration in the European Union Valeria Bello,Sarah Léonard,2023-03-31 This book investigates how migration has been transformed into a security threat in Europe It argues that this process has taken place through a self fulfilling spiralling process which involves different actors and their specific narratives practices and policies The book examines how situations stemming from the so called migration crisis in the European Union EU have been dealt with by governments and non governmental organisations It also considers how actors treating migration as an ordinary phenomenon rather than a threat and sharing inclusive narratives can create the conditions for decelerating and eventually stopping securitisation processes Some chapters examine the spiralling of the securitisation of migration in depth by analysing increases in securitisation as well as cases characterised by resistance Others focus on examining the consequences of socially constructing migration as a crisis for the EU s relations with third countries In sum this book shows that there is a wide range of motives for which states and societies would benefit from a change in migration politics and move from the current management of a crisis to a more positive governance of human mobility It will be of interest to researchers and advanced students of sociology politics international relations social and cultural anthropology human geography and social work This book was originally published as a special issue of the Journal of Ethnic and Migration Studies
