

A Leisure Activities Curricular Component for Severely Handicapped Youth: Why and How

Luanna M. Voeltz and James A. Apffel

The present paper presents a rationale for including a leisure time activities curriculum component in educational programming for severely handicapped children and youth. The importance of play and the constructive use of leisure time for both nonhandicapped and handicapped persons is stressed, and a review of the literature provides documentation of the multiple positive effects of a leisure repertoire upon the adaptive behavior and community adjustment of the severely handicapped. A brief description of a model demonstration project to develop an innovative leisure curriculum component is introduced, emphasizing the scope, content and purpose of such training. Finally, selection criteria which might be useful to guide future teacher and care-giver decisions in the leisure domain are presented, and the role of parents and community care-givers in cooperative planning for leisure education is emphasized.

The ability to play—to occupy oneself constructively and pleasurably during free time—appears to develop vicariously in most persons. Children seem to naturally engage in explorations of persons and materials in their environment, with the quality of those interactions increasing in complexity as the child matures. Yet, we undoubtedly underestimate the extent to which children learn and are taught to play. The various social systems to which children are exposed present numerous opportunities for leisure activities and socialization experiences associated with play. Parents clearly recognize the necessity of engaging the infant in play, and structured programs during the early childhood period carefully incorporate the time and opportunity for play and social interaction. To some extent, our historical hesitation to structure academic experiences for the very young child reflects a philosophical bias that learning in a systematic fashion must follow the kinds of exploratory interactions with the environment which are characterized as play.

Literature Review ,1986 **Exceptional Children** Ronald L. Taylor, Les Sternberg, 2012-12-06 Exceptional Children Integrating Research and Teaching provides a comprehensive introduction to the constantly changing area of special education The book is research based and its title reflects our opinion regarding the important link between research and classroom practice There is one feature of Exceptional Children Integrating Research and Teaching that warrants attention and perhaps justification it was written specifically to address the graduate student or sophisticated undergraduate student market As such the book is written at a higher level and with a greater concept density than typical introductory special education texts We feel that this type of book is very much needed and will be received favorably by the special education community There are also several unique features of Exceptional Children Integrating Research and Teaching that we feel will be quite valuable First we have emphasized the area of teaching practices and not simply included basic facts about definitions characteristics and causes Although some introductory texts include information about teaching considerations that area is not discussed as in depth as it is in our text We feel that it is important that readers not only understand the educational needs of exceptional children but also can identify the best educational practices to meet those needs Social

Behavior in Autism Eric Schopler, Gary B. Mesibov, 2013-11-11 An important component of Division TEACCH's mandate from the Department of Psychiatry of the University of North Carolina School of Medicine and the North Carolina State Legislature is to conduct research aimed toward improving the understanding of developmental disabilities such as autism and to train the professionals who will be needed to work with this challenging population. An important mechanism to help meet these goals is our annual conference on topics of special importance for the understanding and treatment of autism and related disorders. As with the preceding books in this series entitled *Current Issues in Autism*, this most recent volume is based on one of these conferences. The books are not however simply published proceedings of conference papers. Instead, certain conference participants were asked to develop chapters around their presentations and other national and international experts whose work is beyond the scope of the conference but related to the conference theme were asked to contribute manuscripts as well. These volumes are intended to provide the most current knowledge and professional practice available to us at this time.

Leisure Education: A Cross-National View Atara Sivan, Robert A. Stebbins, 2016-04-08 Leisure education plays a central role in both the field of leisure studies and the pursuit of leisure itself. Everywhere in the modern world the most effective use of free time for individuals comes with knowing about the many leisure activities available to them and the rewards and costs that accompany their interest in each. It is through leisure education in one form or another that they gain such knowledge. Yet as important as this educational process is, its study is only beginning to take off in non-Western societies where however it cannot be assumed to be the same as in the West. This book contains several comparisons of Western and non-Western practices in leisure education. Knowing these practices contributes ultimately to a deep understanding of the nature of the huge variety of leisure activities enjoyed across the planet and of the reasons why people go in for the ones they do. This book was based on a special issue published in the *World Leisure Journal*.

Promoting Self-determination in Students with Developmental Disabilities Michael L. Wehmeyer, 2007-04-14 Affordable and complete, this book provides evidence-based strategies to promote self-determination and is the first volume to combine both theory and practice in this area. Because self-determination is a key issue for students with moderate and severe disabilities, this is an ideal resource for middle and secondary special educators, school psychologists, and other school practitioners.
