Lookin In The Mirror:

In the Looking Glass Rebecca K. Shrum, 2017-08-30 An utterly fascinating reading of the multiple uses and meanings of mirrors among European Americans African Americans and Native Americans Journal of Social History What did it mean Rebecca K Shrum asks for people long accustomed to associating reflective surfaces with ritual and magic to become as familiar with how they looked as they were with the appearance of other people Fragmentary histories tantalize us with how early Americans people of Native European and African descent interacted with mirrors Shrum argues that mirrors became objects through which white men asserted their claims to modernity emphasizing mirrors as fulcrums of truth that enabled them to know and master themselves and their world In claiming that mirrors revealed and substantiated their own enlightenment and rationality white men sought to differentiate how they used mirrors from not only white women but also from Native Americans and African Americans who had long claimed ownership of and the right to determine the meaning of mirrors for themselves Mirrors thus played an important role in the construction of early American racial and gender hierarchies Drawing from archival research as well as archaeological studies probate inventories trade records and visual sources Shrum also assesses extant mirrors in museum collections through a material culture lens Focusing on how mirrors were acquired in America and by whom as well as the profound influence mirrors had both individually and collectively on the groups that embraced them In the Looking Glass is a piece of innovative textual and visual scholarship A superb reflection of the many meanings held by an object usually taken for granted Highly recommended Choice **Munsey's Magazine** ,1920 *Catalog of Copyright Entries* Library of Congress. Facing the Other: Novel Theories and Methods in Face Perception Research Davide Rivolta, Aina Puce, Mark A Williams, 2016-04-08 We rely heavily on faces during social interactions Humans possess the ability to recognise thousands of people very quickly and accurately without effort The serious social difficulties that follow abnormalities of the face recognition system i e prosopagnosia strongly underline the importance of typical face skills in our everyday life Over the last fifty years research on prosopagnosia along with research in the healthy population has provided insights into the cognitive and neural features behind typical face recognition This has also been achieved thanks to non invasive neuroimaging techniques such as functional Magnetic Resonance Imaging fMRI Electroencephalography EEG Magnetoencephalography MEG Diffusion Tensor Imaging DTI and Transcranial Magnetic Stimulation TMS However there is still much debate about the cognitive and neural mechanisms of face perception In the current Research Topic we plan to gather experimental works opinions commentaries mini reviews and reviews that focus on new or novel theories and methods in face perception research Where is the field at the moment Do we need to re think the experimental procedures we have adopted so far Again what kind of techniques or combination of them and analysis methods will be important in the future From the experimental point of view we encourage both behavioural and neuroimaging contributions e g fMRI EEG MEG DTI and TMS Despite the main emphasis on face perception memory and identification we will also consider original works that focus on other aspects of face processing such as expression recognition attractiveness judgments and face imagery In addition animal investigations and experimental manipulations that alter face recognition abilities in typical human subjects e g hypnosis are also welcome Overall we are proposing a Research Topic that looks at face processing using different perspectives and welcome contributions from different domains such as psychology neurology neuroscience cognitive science and philosophy The current Research Topic evolved over the desire to acknowledge the relatively recent loss of three giants in the field Drs Shlomo Bentin Truett Allison and Andy Calder We dedicate this Research Topic to them and their pioneering studies

May Swenson: Collected Poems (LOA #239) May Swenson, 2013-04-04 Often compared to the works of E. E. Cummings and Elizabeth Bishop, these poems are a free-ranging exploration of outer and inner worlds of nature and the human mind. In celebration of the centenary of May Swenson's birth, The Library of America presents a one-volume edition of all of the poems that Swenson published in her lifetime from her first collection *Another Animal* 1954 to the innovative shaped poems of *Iconographs* 1970 to her final work *In Other Words* 1987 as well as a selection of previously uncollected work. The collection reveals the sweeping compass of Swenson's curiosity: nature poems display her keen observation of wildlife; exuberant and erotic love poems celebrate beauty and passion; place poems record her travels to the American Southwest, France and Italy and her residence in New York City and Sea Cliff, Long Island; verse analyses investigate baseball, wave motion, the DNA molecule, bronco busting, James Bond movies and the first walk on the moon. Swenson was an inveterate reviser: poems in earlier volumes were frequently reworked for inclusion in later volumes such as *To Mix with Time* 1963 and *New and Selected Things Taking Place* 1978. While preserving the order of publication, this volume presents the author's final or definitive version. Substantive textual variants and title changes are detailed in the notes to the volume. LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation's literary heritage by publishing and keeping permanently in print America's best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings and ribbon markers, and are printed on premium acid-free paper that will last for centuries.
