Darkness Nina Edwards,2018-09-15 Darkness divides and enlivens opinion Some are afraid of the dark or at least prefer to avoid it and there are many who dislike what it appears to stand for Others are drawn to this strange domain delighting in its uncertainties lured by all the associations of folklore and legend by the call of the mysterious and of the unknown The history of our attitudes toward darkness toward what we cannot quite make out in all its physical and metaphorical manifestations challenges the very notion of a world that we can fully comprehend In this book Nina Edwards explores darkness as both a physical feature and cultural image through themes of sight blindness consciousness dreams fear of the dark night blindness and the in between states of dusk or fog twilight and dawn those points or periods of obscurity and clarification Taking us across the ages from the dungeons of Gothic novels to the concrete bunkers of Nordic Noir TV shows Edwards interrogates the full sweep of humanity's attempts to harness and suppress the dark first through our ability to control fire and later illuminate the world with electricity She explores how the idea of darkness pervades art literature religion and our everyday language Ultimately Edwards reveals how darkness whether a shifting concept or palpable physical presence has fed our imaginations

Revelation Dr. Boyd O. Gray,2013-08 Since the Bible was first written the book of Revelation has provided readers with a

glimpse of what is to come But even as the world rapidly fulfills the ancient Scripture many still avoid its obscure symbolic language which often lends itself to fanatical interpretation In Looking into the Revelation a seasoned pastor uses various version of the Bible to provide a clear explanation of biblical texts relating to the end of the world as we know it Dr Boyd Gray a minister with more than thirty years of experience offers a comprehensive study from the premillennial view based on his opinion that the masses are either not ready for the return of Christ or have dismissed it as myth altogether As Dr Gray works his way through Scripture detailing the truths of John the Apostle and the predicted tribulations of the Antichrist he demonstrates through his interpretations that God s Word is the truth a message he hopes will motivate sinners to heed the Lord s gracious call to salvation Looking into the Revelation shares a careful examination of biblical text that seeks to encourage people of all faiths to reexamine their lives and their beliefs and to fall in love with the Lord Jesus Christ

Lane Tolley,Nam Vu,Jonathan J. Foley IV,2025-01-02 Polariton chemistry has emerged in roughly the last decade as a new way of using light to control chemical reactions as well as other properties and processes involving atoms and molecules It has been a delight to experimentalists and to theorists alike to see this field grow new interfaces between chemistry physics optics nanofabrication materials science and engineering and more While the field has been motivated by potential applications the potential to achieve unprecedented selectivity and efficiency in chemical transformations access to new chemical products possible ways to reimagine catalysis and realizing new platforms for quantum information it has also been motivated by the beautiful ideas

theories and phenomenology that have captured the imagination of researchers The authors find this particularly appealing as the field necessitates the marriage between two things they find deeply fascinating the quantum theory of light and of matter in this case cavity quantum electrodynamics and molecular quantum mechanics CQED They also have found it both challenging and rewarding to deepen their knowledge and understanding of these two theories and as a group primarily composed of chemists this work has often required them to grapple with the fact that there exist very few introductory resources aimed at chemists that cover CQED The concepts and formalism of CQED are not part of the lingua franca of physical chemistry courses at the undergraduate level for sure and rarely at the graduate level The authors main motivation for this digital primer was to create a resource that could introduce these concepts in language that is familiar to chemists and within a context that chemists can appreciate They also wanted to provide working code implementing several different models and comparing their results the authors believe the implementation can be quite complementary to the formalism and can help build intuition about them more quickly In principle it can also give students a jump start to performing real calculations and simulations To that end students are encouraged to work through the manipulations actively and to attempt to implement their own versions of the code
