Looking At Art Landscape And Nature:

Looking at Nature, Looking at Art Dundee (Scotland). Museums & Art Galleries Department, 1991 **Political Landscape** Martin Warnke, 2013-06-01 We all know what the political landscape is and politicians and journalists never tire of referring to it But in this ingenious and original book Martin Warnke takes that well worn metaphor literally and uses it to reveal just how politicized the real landscape of continental Europe has been for centuries The author finds his evidence of humanity's intervention in nature in the form of monuments and milestones gardens roads and border crossings in landscape paintings and maps even in fact in the anthropomorphic interpretations once given to formations of hills and rocks The Political Landscape is underpinned with a fascinating array of examples and illustrations many of which will be new even to experts in the art of landscape and related disciplines **Looking at the Landscapes** The J. Paul Getty Museum, 2007-12-31 In this daylong symposium a group of international experts and scholars of nineteenth century art gathered to discuss Courbet's landscape oeuvre and debate his contribution to the history of modern painting in conjunction with the exhibition Courbet and the Modern Landscape The preface by Mary Morton and five papers presented here comprise the J Paul Getty Museum's first online only publication **Nature and Culture** Barbara Novak, 2007-02-12 In this richly illustrated volume featuring more than fifty black and white illustrations and a beautiful eight page color insert Barbara Novak describes how for fifty extraordinary years American society drew from the idea of Nature its most cherished ideals Between 1825 and 1875 all kinds of Americans artists writers scientists as well as everyday citizens believed that God in Nature could resolve human contradictions and that nature itself confirmed the American destiny Using diaries and letters of the artists as well as quotes from literary texts journals and periodicals Novak illuminates the range of ideas projected onto the American landscape by painters such as Thomas Cole Albert Bierstadt Frederic Edwin Church Asher B Durand Fitz H Lane and Martin J Heade and writers such as Ralph Waldo Emerson Henry David Thoreau and Frederich Wilhelm von Schelling Now with a new preface this spectacular volume captures a vast cultural panorama It beautifully demonstrates how the idea of nature served not only as a vehicle for artistic creation but as its ideal form An impressive achievement Barbara Rose The New York Times Book Review An admirable blend of ambition elan and hard research Not just an art book it bears on some of the deepest fantasies of American culture as a whole Robert Hughes Time Magazine *Nature and Culture : American Landscape and Painting, 1825-1875, With a New Preface* Barbara Novak Altschul Professor of Art History Barnard College and Columbia University (Emerita), 2007-01-05 In this richly illustrated volume featuring more than fifty black and white illustrations and a beautiful eight page color insert Barbara Novak describes how for fifty extraordinary years American society drew from the idea of Nature its most cherished ideals Between 1825 and 1875 all kinds of Americans artists writers scientists as well as everyday citizens believed that God in Nature could resolve human contradictions and that nature itself confirmed the American destiny Using diaries and letters of the artists as well as quotes from literary texts

Landscape and Nature in Scandinavian Art MaryClaire Pappas,Tonje Haugland Sørensen,2025-04-16 This edited volume foregrounds new and vital scholarship shaping Scandinavian art historical research on the representations of the natural world Contributors deconstruct the interlinking of people and land through critical readings of the Scandinavian representation of nature bringing to the fore how the traditional focus on the landscape as a manifestation of temperament has tended to obfuscate critical approaches to the representation of the landscape Making interdisciplinary connections this volume redresses the imbalance in scholarship on the region that often emphasizes teleological national narratives and instead situates encounters with nature and the landscape in relationship to more interdisciplinary perspectives Each chapter serves as a specific case study on topics ranging from circumpolar exploration and colonial practices deconstructing National Romanticism myths and contemporary artistic responses to the history of the politics of land The book will be of interest to scholars working in art history visual culture nature studies and environmental history

Culture, Technology, and the Creation of America's National Parks Richard A. Grusin,2004-04-22 Richard Grusin s innovative study investigates how the establishment of national parks participated in the production of American national identity after the Civil War The creation of America s national parks is usually seen as an uncomplicated act of environmental preservation Grusin argues instead that parks must be understood as complex cultural technologies for the reproduction of nature as landscape art He explores the origins of America s three major parks Yosemite Yellowstone and Grand Canyon in relation to other forms of landscape representation including photography mapping travel writing and fiction

Landscape, Natural Beauty and the Arts Salim Kemal,Ivan Gaskell,1993 Landscape Natural Beauty and the Arts offers probing studies of the complex structure of aesthetic responses to nature Each chapter refines and expands the terms of discussion and together they enrich the debate with insights from art history literary criticism geography and philosophy To explore the interrelation between our conceptions of nature beauty and art the contributors consider the social construction of nature the determination of our appreciation by artistic media and the duality of nature s determining in gardening Showing that natural beauty is impregnated with concepts derived from the arts

and from particular accounts of nature the volume occasions questions of the distinction and relation between art and nature generally and culminates in a set of philosophical studies of the role of scientific understanding engagement and emotion in the aesthetic appreciation of nature

A Corpus of Rembrandt Paintings V Ernst van de Wetering, 2013-12-12 This volume is the fifth volume of *A Corpus of Rembrandt Paintings* a project devoted to all Rembrandt's paintings This is the work of The Rembrandt Research Project consisting of a group of scholars led since 1993 by Professor Ernst van de Wetering The project began in 1968 with the aim of separating Rembrandt's own paintings from the vast number of Rembrandtesque paintings made by his many apprentices and followers Having opted for a chronological approach to the cataloguing of Rembrandt's paintings from 1625 till 1642 in the first three volumes it was decided in 1993 to adopt a thematic approach for further volumes This was largely to facilitate the recognition of different hands The new approach yielded much more information not only about Rembrandt's working methods but also about the function and meaning of his works This expanded field of view meant that etchings and drawings with similar themes also needed to be included In 2005 Volume IV appeared devoted to Rembrandt's self portraits in painting etching and drawing Volume V consists of a catalogue and analysis of the so called small scale history and genre paintings That theme was chosen because this type of complex work shows a variety of full length protagonists acting in different narrative settings For this reason in the 17th century painting etching or drawing biblical and mythological scenes was looked upon as an artist's greatest challenge The choice of this theme proved to be highly fruitful in several ways Small scale history pieces reveal Rembrandt's artistic ambitions most clearly They also offer the authors a much more accurate view of the daily routine in Rembrandt's studio his apprentices mostly copied this type of work or used it as a starting point for their own As a result it was easier to distinguish the works by the master himself from those of his pupils All aspects of the skills necessary to create a pictorial illusion play a part in the creation of small figured history paintings These aspects were referred to as the basis of the noble art of painting in Rembrandt's days Two seventeenth century painter theoreticians discussed these principles systematically

in two books which up till now have only sporadically been consulted in the context of 17th century studio practice Karel van Mander wrote his *Grond der edel vry schilder const* Basis of the Art of Painting in 1604 and Samuel van Hoogstraten produced his *Inleyding tot de hooge schoole der schilder konst* Academy of Painting in 1678 Van Hoogstraten was a pupil of Rembrandt between 1642 and 48 Comparing the two books and considering them in relation to Rembrandt's oeuvre gradually reveals his original views on painting and how these had developed during his career Thus the authors of this new Volume of A Corpus have gained an unexpected and profound insight into Rembrandt's ideas and approach to his art The basic aspects of painting included the following topics function and methods of drawing human proportions various positions poses and gestures of figures ways of arranging a scene's protagonists in a composition facial expressions of a variety of emotions light shadows and reflected light landscape and animals draperies and articles of clothing methods of painting and various characteristics and uses of colours The way these basic aspects were selected and dealt with presumed that the more practical side to the art of painting would be learned by the apprentice in the daily routine of his master's studio With the development of art history in the nineteenth century the basic aspects of the art of painting listed above acquired the vague label of style However the seventeenth century categorization of the basic aspects provides a much more acute means of probing the views and criteria for judging a painting by Rembrandt and his contemporaries than the concept of style Volume V in the series A Corpus of Rembrandt Paintings breaks new ground from the point of view of art history not only in its approach to Rembrandt as an artist but more particularly to his thinking about painting Moreover a detailed comparison of Rembrandt's works and those by his apprentices who based their works on his led to a profound and detailed understanding of Rembrandt's views on pictorial quality In art historical literature quality usually does not feature prominently since it is regarded as being too subjective This comparative approach together with the analysis of seventeenth century categories of thought about painting have given the research on Rembrandt a new impetus at the same time allowing us to see more clearly through seventeenth century eyes That is why the new volume of the Corpus is an important publication not only for art historians but also for all who want to fully enjoy the numerous works of art that date back to the Dutch Golden Age now scattered in museums around the world

"Art, Technology and Nature " Camilla Skovbjerg Paldam, 2017-07-05 Since 1900 the connections between art and technology with nature have become increasingly inextricable Through a selection of innovative readings by international scholars this book presents the first investigation of the intersections between art technology and nature in post medieval times Transdisciplinary in approach this volume's 14 essays explore art technology and nature's shifting constellations that are discernible at the micro level and as part of a larger chronological pattern Included are subjects ranging from Renaissance wooden dolls science in the Italian art academies and artisanal epistemologies in the followers of Leonardo to Surrealism and its precursors in Mannerist grotesques and the Wunderkammer eighteenth century plant printing the climate and its artistic presentations from Constable to Olafur Eliasson

and the hermeneutics of bioart In their comprehensive introduction editors Camilla Skovbjerg Paldam and Jacob Wamberg trace the Kantian heritage of radically separating art and technology and inserting both at a distance to nature suggesting this was a transient chapter in history Thus they argue the present renegotiation between art technology and nature is reminiscent of the ancient and medieval periods in which art and technology were categorized as aspects of a common area of cultivated products and their methods the Latin *ars* the Greek *techne* an area moreover supposed to imitate the creative forces of nature

A History of China in the 20th Century Lü Peng, 2023-08-14 This book provides readers with rich context and detailed description leading to new perspectives on major historical events in China Positioned as a thought leader and highly acclaimed arts professional in China the author is able to give a historical account of China's twentieth century that is richly informed by its valent fields of political economy and cultural studies Western readers' knowledge of China's twentieth century remains based on pioneering research of modern scholars such as Fairbank and Jonathan Spence In recent years however it is rare to see a complete history of China spanning the nineteenth and twentieth centuries which also includes the first two decades of the twenty first century This book contributes new narrative and perspective to this span of history Now as the Sino US trade conflict makes dramatic impact on a post COVID global economy readers have the need for a fresh understanding of how China came to be what it is today The author's groundbreaking work provides new insight provided by newly uncovered sources explaining how China came to be what it is today from a cultural and sociological perspective in a historical mode

Environmental Philosophy Christopher Belshaw, 2014-12-18 This introduction to the philosophy of the environment examines current debates on how we should think about the natural world and our place within it The subject is examined from a determinedly analytic philosophical perspective focusing on questions of value but taking in attendant issues in epistemology and metaphysics as well The book begins by considering the nature extent and origin of the environmental problems with which we need to be concerned Chapters go on to consider familiar strategies for dealing with environmental problems and then consider what sort of things are of direct moral concern examining in turn at animals non sentient life forms natural but non living things and deep ecology The final part of the book investigates notions of value natural beauty and the place of human beings in the scheme of things

Clark Hulings and the Art of Work James D. Balestrieri, 2024-11-01 This book is a backpack manifesto It tells the story of a realist painter at a time when realism was not in vogue If you know Clark Hulings 1922-2011 this book presents him anew highlighting the beauty of his paintings and the thought and empathy behind them If you're new to Hulings this book introduces you to a working artist whose subject was work agricultural village and market work daily life in ancient places grappling with modernity in unique ways For artists this book will invigorate your practice as it discusses the education and process of a painter whose effort and work ethic took him to the summit of realist technique For the art historian this book secures Hulings's place in the continuum of European and American realism as portrait painter illustrator and fine artist and in light of key aspects of modernism that he adapted to his

art **Placing Nature** Joan Nassauer, 2013-02-22 Landscape ecology is a widely influential approach to looking at ecological function at the scale of landscapes and accepting that human beings powerfully affect landscape pattern and function. It goes beyond investigation of pristine environments to consider ecological questions that are raised by patterns of farming, forestry, towns and cities. *Placing Nature* is a groundbreaking volume in the field of landscape ecology, the result of collaborative work among experts in ecology, philosophy, art, literature, geography, landscape architecture, and history. Contributors asked each other: What is our appropriate role in nature? How are assumptions of Western culture and ingrained traditions placed in a new context of ecological knowledge? In this book, they consider the goals and strategies needed to bring human-dominated landscapes into intentional relationships with nature, articulating widely varied approaches to the task. In the essays, novelist Jane Smiley, ecologist Eville Gorham, and historian Curt Meine each examine the urgent realities of fitting together ecological function and culture; philosopher Marcia Eaton and landscape architect Joan Nassauer each suggest ways to use the culture of nature to bring ecological health into settled landscapes; urban geographer Judith Martin and urban historian Sam Bass Warner; geographer and landscape architect Deborah Karasov; and ecologist William Romme each explore the dynamics of land development decisions for their landscape ecological effects. Artist Chris Faust's photographs juxtapose the crass and mundane details of land use with the poetic power of ecological pattern. Every possible future landscape is the embodiment of some human choice. *Placing Nature* provides important insight for those who make such choices: ecologists, ecosystem managers, watershed managers, conservation biologists, land developers, designers, planners, and for all who wish to promote the ecological health of their communities. *The Soil of the South*, 1853 *Aesthetics and Nature* Glenn Parsons, 2023-11-02 The appreciation of nature and natural beauty demands our attention as environmental issues become ever more urgent. In this timely introduction, Glenn Parsons provides an overview of philosophical work on the aesthetics of nature, identifying key conceptual questions, clarifying central theories, and analyzing the ethical ramifications of our experience of natural beauty. Outlining five major approaches to understanding the aesthetic value of nature, this second edition explores the aesthetic appreciation of nature as it occurs in wilderness, in gardens, and in the context of appreciating environmental art. Now updated to cover recent developments in the field, it includes a new chapter on the sublime, the picturesque, and the beautiful. Expanded discussion of empirical and evolutionary accounts of nature appreciation, as well as the appreciation of the environment in non-Western cultures. A new chapter on the aesthetic appreciation of animals. An in-depth analysis of the appreciation of nature through cinema and photography. Discussion of the relation between environmental appreciation and climate change. Combining a clear and engaging style with a sophisticated treatment of a fascinating subject, *Aesthetics and Nature* explores the aesthetic dimension of humanity's relationship with our physical surroundings. This is a must-read for anyone who cares about nature and the future of our environment.
