Advances in Organizational Justice Jerald Greenberg, 2002-03-01 This is a state of the science book about organizational justice which is the study of people's perception of fairness in organizations The volume's contributors all acknowledged leaders in this burgeoning field present new theoretical positions clarify existing paradigms and identify future areas of application The first chapter provides a comprehensive framework that integrates and synthesizes key concepts in the field distributive justice procedural justice and retributive justice The second chapter is a full theoretical analysis of how people use fairness judgments as means of guiding their reactions to organizations and their authorities The subsequent two chapters examine the conceptual interrelationships between various forms of organizational justice First we are given a definitive review and analysis of interactional justice that critically assesses the evidence bearing on its validity The next chapter argues that previous research has underemphasized important similarities between distributive and procedural justice and suggests new research directions for establishing these similarities The three following chapters focus on the social and interpersonal antecedents of justice judgments the influence that expectations of justice and injustice can have on work related attitudes and behavior the construction of a model of the determinants and consequences of normative beliefs about justice in organizations that emphasizes the role of cross cultural norms and the potential impact of diversity and multiculturalism on the viability of organizations The book's final chapter identifies seven canons of organizational justice and warns that in the absence of additional conceptual refinement these canons may operate as loose cannons that threaten the existence of justice as a viable construct in the organizational sciences

that the sovereign states dominance of the international system is rapidly coming to an end as multinational ethnic regional and religious groups to name a few increasingly affect the course of global affairs In the absence of a clear enemy the military faces an identity crisis In the postmodern atmosphere of this multicentric global order authority is fragmented and the exercise of any one authority is subject to greater scrutiny and challenge The military has become more accepting of a variety of values life styles and attitudes toward its tasks At the same time support for the military s mission is difficult to win requiring endless justification The authors believe that the principal missions for the military in these new times are peacekeeping peacemaking and humanitarian assistance They examine the prospects for successful operations in these areas taking into account the cultural lag between world structures that favor increased multinational peacekeeping forces and individual nations that supply token resources to support such efforts This volume provides a sophisticated and thought provoking perspective on the future role of the military in the coming decades It is sure to enrich the vigorous debate surrounding these issues

The Good Life Chronicles D. J. Breaking the Fear Barrier Tom Rieger, 2011-08-23 This book takes the reader through a journey of how fear of loss progressively creates barriers and bureaucracy that inevitably cause companies to fail and what leaders need to do to overcome these seemingly impenetrable walls The greatest threat to an organization s success is not always the competition Often it is what a company does to itself Because of fear companies become plagued with barriers and bureaucracy that limit success crush employees and infuse frustration and a sense of futility across the enterprise It starts with a narrowing of focus which leads to the first level of bureaucracy parochialism Parochialism exists when managers and departments begin to view the world through the filter of their own little silo and build walls made of rules and policies to protect their turf As businesses grow and become more complex the second level of bureaucracy is reached territorialism While parochialism is about protecting a department from outsiders territorialism is about controlling those inside the silo The third and final level of bureaucracy is empire building which is a response to perceived threats to a department s ability to be self sufficient These barriers cost organizations a fortune in inefficiency turnover waste and demoralization Tearing down these barriers is difficult but it can be done Parochialism can be eliminated by resetting rules and policies and refocusing on the ultimate mission of the organization Territorialism can be eliminated by

creating true empowerment along with appropriate levels of accountability Empire building can be addressed through shared goals and a set of guiding principles that help act as a referee in decision making But that s not enough Managers must also create a culture of courage to enable employees to take advantage of these new freedoms and accountabilities Courage killers must be rooted out and dealt with swiftly and strongly Finally leaders must refocus on mission success rather than just checking off their part of the process manage reference points and engage employees By doing all these things an organization can become fearless and unstoppable **Along the Domestic-Foreign Frontier** James N.
