to more economically developed urban regions With this migration came new challenges in a rapidly changing society Researchers have extensively studied the rural to urban human movement social changes inequality and its impact on individuals and society as a whole This volume provides a new perspective on this issue It forges a link between internal migration inequality social exclusion and crime in the context of China through qualitative research into the impact of this phenomenon on individuals lives Using a series of case studies drawn from interviews with inmates men and women in a large Chinese prison it focuses on migrant offenders subjective experiences and analyses issues from the rarely heard perspectives of migrant lawbreakers themselves The research demonstrates how factors including the hukou system rural urban class and gender inequalities prejudices against rural migrants and other structural problems often lead to migrant offending The author argues that to mitigate the effects of criminalisation the root causes of these problems should be examined emphasizing radical reforms to the hukou policy cultural change in urban society to welcome newcomers positive programs to integrate migrant workers into urban societies and improve their opportunities rather than inflicting harsher penalties or reducing migration While the research is based in China it has clear implications for other regions of the world which are experiencing similar tensions related to national and international migration This work will be of interest to researchers in criminology and criminal justice particularly with an interest in Asia as well as those in related fields such as sociology law and social justice

Routledge Handbook of International Criminology Cindy J. Smith, Sheldon X. Zhang, Rosemary Barberet, 2011-05-03

The Routledge Handbook of International Criminology brings together the latest thinking and findings from a diverse group of both senior and promising young scholars from around the globe. This collaborative project articulates a new way of thinking about criminology that extends existing perspectives in understanding crime and social control across borders, jurisdictions and cultures and facilitates the development of an overarching framework that is truly international. The book is divided into three parts in which three distinct yet overlapping types of crime are analyzed: international crime, transnational crime, and national crime. Each of these perspectives is then articulated through a number of chapters which cover theory and methods, international and transnational crime analyses, and case studies of criminology and criminal justice in relevant nations. In addition, questions placed at the end of each chapter encourage greater reflection on the issues raised and will encourage young scholars to move the field of inquiry forward. This handbook is an excellent reference tool for undergraduate and graduate students with particular interests in research methods, international criminology, and making comparisons across countries.

Throughout his academic career, Professor Ernesto U. Savona has investigated complex crimes ranging from organized crime to economic crime to money laundering. In his work, he has tried to bring together academics, policy makers, and practitioners to bring understanding to crime problems and innovative solutions. His passion towards the practical application of the findings of scientific research led him to found Transcrime in 1994, which is today among the most important criminological think tanks in Europe. This important book is aimed at scholars studying criminal policy and research, particularly in the areas of criminal networks, organized crime, white collar crime, the history of criminology.
