Carpenter,2001-08-30 The future of mass media may appear unpredictable and too complex to fathom but Mass Media in 2025 takes a scholarly theoretical approach to identifying trends and explaining their possibilities Noted contributors approach a variety of media with a solid grounding in the history of each and an eye for which may be vulnerable and which may thrive in the new technological age Trends such as interactivity and niche building will affect everything from the newspaper to public relations and this collection of essays provides a fascinating guide to where the next decades may take us Regardless of the visual aural or printed form Mass Media in 2025 illustrates the degree to which older media will have to incorporate the level of interaction and specialization offered by newer media if they are to survive These effects can already be seen in the proliferation of television channels in the ironic bent of advertising in the rise of infotainment in news organizations This book shows not only how all of this has come to be but also more importantly where it will go

pace of the development of ICT in China has precipitated much speculation about political change and democratisation This book explores the reality of ICT in China showing clearly that whilst China remains a one party state with an ever present and sophisticated regime of censorship substantial social and political changes have taken place It considers the ICT revolution in all its aspects outlining the dominant trends the impact on other countries of China as an ICT exporter strategies of government censorship and use of ICT for propaganda the implications of censorship for Chinese governance the political implications of internet culture and blogging and the role of domestic and foreign NGOs Overall this book is a vital resource for anyone seeking to understand a rapidly transforming China both today and in the years to come
