New Communitarian Thinking Persons Virtues Institutions And Communities:

New Communitarian Thinking Amitai Etzioni, 1995 Communitarian thought is at the heart of a fierce debate in political theory about the justice efficacy and the future of liberalism and liberal societies These essays bring communitarian thinking to bear on such contentious issues as abortion homosexuality free speech and personal autonomy **Rebuilding Communities in an Age of Individualism** Paul Hopper, 2017-07-05 As modern societies become increasingly individualistic this fascinating book examines how we can maintain and revive local communities and community life It demonstrates how the major developments and processes of our time notably globalization post industrialism and de traditionalization contribute to this individualism to the detriment of community life The author examines how community is a necessary and important component of human life and discusses possible ways in which to arrest its decline In this regard strategies geared to fostering trust and social capital are outlined as the basis for reinvigorating community life The volume provides a coherent and distinct analysis of community as well as offering concrete policy prescriptions to counter the excessive individualism of our times In both the nature and scope of its analysis it offers a unique contribution to an extremely important issue in the contemporary period one that increasingly preoccupies politicians academics and ordinary citizens

Anarchism in Local Governance Stephen Condit, 2019-06-28 Through accounts of his experience as a local politician and elected once holder Stephen Condit examines in *Anarchism in Local Governance* how his anarchist convictions may have contributed to the administration of his community in a way that empowers citizens towards self governance and prefiguration of communal anarchist ideals The hypothesis is that municipal governance and anarchist thought and praxis can both benefit by this kind of encounter Condit also investigates the emergence of anarchism through citizen participation in civil society as a reality to which the municipality is accountable *The Liberal State and the Politics of Virtue* Ludvig Beckman, Beckman government Uppsala University seeks to reconcile the politics of virtue with the liberal principle of a neutral state He analyzes the concepts of liberalism and tolerance especially as they are used in the theories of Rawls and Dworkin He then considers the various aspects of state neutrality and the role of rights within a liberal state In the end he challenges the skeptical justification of the neutral state stressing the differences between skepticism and critical thought c

Book News Inc **Communitarianism** Henry Tam, 2025-05-01 This thoroughly revised and updated edition of Henry Tam's *Communitarianism* brings different strands of communitarian thought together into a critical synthesis at the centre of which is the ideal of inclusive communities based on the three principles of mutual responsibility cooperative enquiry and citizen participation Tam shows how communitarian ideas can be applied in practice addressing key problems in social economic and political life with case studies from the state business and voluntary sectors to demonstrate how we can more effectively respond to the major problems facing society With key pedagogical features including a timeline of the emergence of key communitarian ideas diagrams illustrating conceptual differences relating to communitarian authoritarian and individualist

thinking and a selection of global case studies and further readings this is the authoritative guide to the theory and practice of Communitarianism *Negotiating the Good Life* Mark A. Young, 2017-07-05 For centuries philosophers have wrestled with the dichotomy between individual freedom on the one hand and collective solidarity on the other Yet today there is a growing realization that this template is fundamentally flawed In this book Mark Young embraces and advocates a more holistic concept of freedom one which is not merely defined negatively but which positively provides the preconditions for individuals to actively exercise their autonomy and to flourish as human beings in the process Young posits the idea of freedom in community and traces its origin back to Aristotle Taking as his premise that humans are deeply social beings who live their lives intricately interwoven with each other he examines what type of political community is relevant for us in this post Classical post Enlightenment and indeed post Existential world Identifying the failure of traditional statist models of politics Young instead argues for a civil society a globally interlinked and free set of liberal communities as the best context for nourishing human flourishing In this way we can achieve a proper setting for Eudaimonia in a modern sense

Developing Communities for the Future 5ed Susan Kenny, Phil Connors, 2016-09-01 Developing Communities for the Future provides a comprehensive introduction to the theory processes and practices of community development It offers insights into the challenges and dilemmas of this demanding field and considers the ways in which it can empower citizens Engaging case studies illustrate how community development practitioners operate in everyday situations This new edition highlights cutting edge issues and new technologies that are influencing practice It demonstrates the dynamic nature of the field and how practitioners can help communities respond to the current challenges they face **Responsibilities: A Critical Legal Defence of Human Rights** Ian Turner, 2025-11-11 For many human rights have become a panacea for the injustices of society globalisation poverty discrimination climate change etc But has this rights inflation been a prima facie good Has the rise in human rights merely propounded a self centred individualism exacerbating the marginalisation of large swathes of society who are already socially excluded Rightly human rights have been the subject of a multitude of criticisms from a range of critical perspectives Marxism critical legal studies communitarianism feminism critical race theory etc However this unique study pushes back against this tide of anti rights providing an original defence of human rights from the perspective of a progressive political community of rights holders and duty bearers Possessing rights might place a rights holder at the centre of their moral universe to the exclusion of all others but that holder of rights cannot expect others to bear the duty of their rights without exercising the same obligation to the rights of others in return So far from emphasising isolation and self interest responsibilities arising from the exercise of rights engender a keen sense of solidarity a principle integral to critical legal theory The book will be of interest to academics and researchers working in the areas of Human Rights Constitutional Law and Legal and Political Theory Gladly to Learn and Gladly to Teach Ernest L.
