Business Ethics and Care in Organizations Marianna Fotaki, Gazi Islam, Anne Antoni, 2019-12-06 Care is a human ability we all need for growing and flourishing It implies considering the needs and interests of others and the quality of how we relate to each other is often defined by care While the value of care in private life is widely recognized its role in the public sphere is contested and subject to political debates In work organizations instrumentality frequently overrides considerations for colleagues and co workers well being while relationships are often sacrificed in the service of performance and meeting organizational targets The questions this volume attempts to address concerns the organizational conditions that make care flourish and how a caring organization functions in practice Specifically we examine what it means to care for each other and what enhances caring behaviours in organizations The volume ultimately focuses on how caring relations can contribute to making organizations better places In

this perspective care involves the recognition of and the limitations of work as a key aspect of personal and social identity Because care exceeds the sphere of individual intimacy the book will also centre on the necessity for building caring institutions through a political process that considers the needs contributions and prospects of many different actors This book aims to contribute to academic discussions on care in organizations care work business and organizational ethics diversity caring leadership well being in organizations and research ethics Managers consultants policy makers and students will find reflections about the goodness of care in organizations and guidance about the ethical and practical difficulties of pursuing the project of building caring organizations

Windows XP Home Edition David Pogue,2002 This complete reference covers the entire Windows XP Home operating system in an easy to read all in one handbook

Broken Movement John W. Krakauer,S. Thomas Carmichael,2017-11-03 An account of the neurobiology of motor recovery in the arm and hand after stroke by two experts in the field Stroke is a leading cause of disability in adults and recovery is often difficult with existing rehabilitation therapies largely ineffective In Broken Movement John Krakauer and S Thomas Carmichael both experts in the field provide an account of the neurobiology of motor recovery in the arm and hand after stroke They cover topics that range from behavior to physiology to cellular and molecular biology Broken Movement is the only accessible single volume work that covers motor control and motor learning as they apply to stroke recovery and combines them with motor cortical physiology and molecular biology The authors cast a critical eye at current frameworks and practices offer new recommendations for promoting recovery and propose new research directions for the study of brain repair Krakauer and Carmichael discuss such subjects as the behavioral phenotype of hand and arm paresis in human and non human primates the physiology and anatomy of the motor system after stroke mechanisms of spontaneous recovery the time course of early recovery the challenges of chronic stroke and pharmacological and stem cell therapies They argue for a new approach in which patients are subjected to higher doses and intensities of rehabilitation in a more dynamic and enriching environment early after stroke Finally they review the potential of four areas to improve motor recovery video gaming and virtual reality invasive brain stimulation re opening the sensitive period after stroke and the application of precision medicine
