 of the Mathematics Classroom Colette Laborde,Marie-Jeanne Perrin-Glorian,Anna Sierpinska,2005-10-14 New research in
 mathematics education deals with the complexity of the mathematics classroom The classroom teaching situation constitutes
 a pertinent unit of analysis for research into the ternary didactic relationship which binds teachers students and
 mathematical knowledge The classroom is considered as a complex didactic system which offers the researcher an
 opportunity to gauge the boundaries of the freedom that is left with regard to choices about the knowledge to be taught and
 the ways of organizing the students learning while giving rise to the study of interrelations between three main elements of
 the teaching process the mathematical content to be taught and learned management of the various time dimensions and
 activity of the teacher who prepares and manages the class to the benefit of the students knowledge and the teachers own
 experience This volume reprinted from Educational Studies in Mathematics Volume 59 focuses on classroom situations as a
 unit of analysis the work of the teacher and is strongly anchored in original theoretical frameworks The contributions are
 formulated from the perspective of one or more theoretical frameworks but they are tackled by means of empirical
 investigations Learning to Teach Mathematics, Second Edition Maria Goulding,2013-12-19 First Published in 2005
