

TRAPPIST-1 is an ultracool
dwarf star, in the Aquarius
constellation, approximately
39 light years from earth
(234,000,000,000,000 miles).
It is very dim and small in stellar
terms at just eight per cent
of the mass of our Sun - only
marginally bigger than Jupiter.

All seven planets could have
moons on their surfaces. But
there are three candidates
which have the perfect
conditions for life, lying
within the 'Goldilocks zone',
where it is neither
too hot nor cold.

HOW IT WAS FOUND

The planets were
discovered by
NASA's Spitzer Space
Telescope (pictured above) and ground
telescopes in Chile,
Morocco, Hawaii,
South Africa and the
Liverpool John
 Moores University
Telescope on La
Palma in the Canary
Islands. (pictured right) Estimated
mass and orbits were
based on 'flares' in the
light from their
parent star as they
passed in front of it.

The Liverpool Telescope (LT) is
robotically controlled. The
mounting structure is 38 feet tall
and 20 feet wide. It weighs
around 26 tons. Built around a
60 ft diameter mirror
designed to collect and direct
light towards instruments. The
telescope is protected from the
elements by a shelter that works
like a clam shell. Unlike most
telescopes, the LT is capable of
observing without any human
intervention. After sunset, it
looks at 'weather' conditions and,
if suitable, the telescope will
open up and work its way
through the 'dew' of observations
sent to it during the daytime.

The Enigmatic Space Pasquale De Marco, 2025-07-24 The vast expanse of space has captivated the imaginations of humankind for centuries From the earliest astronomers who gazed up at the night sky wondering about the twinkling stars above to the modern day scientists who probe the depths of the cosmos with powerful telescopes the allure of space has never diminished In this book we will embark on a journey to explore the wonders of the universe from the familiar planets of our solar system to the distant galaxies that lie billions of light years away We will learn about the history of space exploration the latest scientific discoveries and the impact of space on our lives Along the way we will encounter some of the greatest mysteries of the universe What is dark matter How did the universe begin Is there life beyond Earth These are just a few of the questions that have puzzled scientists for centuries As we explore these mysteries we will also consider the impact of space on our planet and its people Space exploration has brought us new technologies new insights into our place in the universe and a renewed sense of wonder and curiosity But space also poses challenges The space race between the United States and the Soviet Union during the Cold War brought the world to the brink of nuclear war Today the militarization of space is once again a growing concern Despite the challenges the allure of space remains Humans are a spacefaring species and we are destined to explore the cosmos This book is a celebration of our achievements in space and a look ahead to the challenges and opportunities that lie ahead We hope you enjoy this journey through the wonders of the universe If you like this book write a review

Mysteries of Space CAN BARTU H., 2024-01-01 In the vast expanse of the cosmos humanity's fascination with the stars has driven us to explore the unknown to reach for the heavens and to push the boundaries of our knowledge and imagination It is within this spirit of wonder and curiosity that the book *Mysteries of Space Science Technology and Adventure* is born As we embark on this literary journey we find ourselves venturing into the captivating realms of space exploration interstellar mysteries and the potential for life beyond our pale blue dot This book serves as a guide illuminating the extraordinary achievements and profound questions that have shaped our understanding of the cosmos Chapter by chapter we traverse the annals of space history from the earliest observations of celestial wonders by ancient astronomers to the audacious missions that have sent humanity soaring among the stars We explore the fascinating tapestry of our universe's evolution from the birth of galaxies and stars to the cataclysmic forces that shape celestial phenomena Venturing further we contemplate the paradoxical question of our cosmic loneliness the enigmatic Fermi Paradox and the tantalizing search for extraterrestrial intelligence We delve into the prospects of interplanetary human settlements where humanity's ingenuity and determination to establish colonies beyond Earth are met with both excitement and challenges Amidst these endeavors we encounter the visionary concept of space mining a future where celestial bodies provide a bounty

of resources to sustain our exploration and shape the destiny of our species We also glimpse the advent of commercial space travel and space tourism where the wonders of space are no longer confined to the realm of astronauts but made accessible to adventurers from all walks of life Throughout these pages we find that the pursuit of space exploration is not merely an endeavor of science and technology but an odyssey that resonates with the very essence of human curiosity unity and resilience It is a journey that reminds us of our boundless potential and the limitless possibilities that await us among the stars As we turn each page we invite you to embark on a voyage that transcends the boundaries of our world where the wonders of the universe unfold before our eyes Let us marvel at the cosmic ballet of galaxies witness the birth and death of stars and contemplate the profound mysteries that continue to elude us With every revelation and every question left unanswered Mysteries of Space Science Technology and Adventure reminds us that the pursuit of knowledge is an unending quest a testament to our ceaseless curiosity and an enduring testament to the indomitable spirit of human exploration May this book inspire you to look to the skies with awe and wonder to dream beyond the horizons and to join in the timeless journey of humanity as we continue our odyssey into the infinite depths of space Safe travels fellow explorers

Dewdney,Philip Crosby,2024-06-21 The Square Kilometre Array SKA is a grand vision project to build the most sensitive radio telescope in the world This open access book tells the story of its development a story of transformational science innovative engineering and global collaboration Its journey has been long and complex reflecting the many issues faced in creating an affordable design choosing a site and developing a viable global organisation starting from a simple working group of far sighted and persistent astronomers in 1993 The book begins with the emergence of the SKA concept and the first working group It traces the development of global scientific and engineering collaborations and ever more comprehensive governance structures for the SKA the involvement and roles of funding agencies and governments and the long political site selection process This occurred alongside efforts to overcome technical barriers and the difficult process of selecting technology It follows these themes up to the point in 2012 when the project had just transitioned from a collaboration to a legal entity and the dual site decision was made a pivotal moment when it was clear the SKA arrays would be built The book is based on the authors personal experience at the leading edge of the project over many years as well as access to hitherto unpublished material from project archives interviews and presentations from many of the key players at a specially convened conference It has a Foreword written by John Womersley former Chair of the Agencies SKA Group and SKA Organisation Board The book is

intended for an audience ranging from funding agencies and governments involved in major research infrastructures to historians of science and professional researchers studying mega projects to the astronomy and physics communities in general and interested lay readers *Communicating in the Third Space* Karin Ikas, Gerhard Wagner, 2008-10-05

Communicating in the Third Space aims to clarify Homi K Bhabha's theory of the third space of enunciation by reconstructing its philosophical sociological geographical and political meaning with attention to the special advantages and ambiguities that arise as it is applied in practical as well as theoretical contexts The idea of third space conceives the encounter of two distinct and unequal social groups as taking place in a special third space of enunciation where culture is disseminated and displaced from the interacting groups making way for the invention of a hybrid identity whereby these two groups conceive themselves to partake in a common identity relating to shared space and common dialogue The essays collected in *Communicating in the Third Space* including a preface by Bhabha himself brilliantly introduce readers to this exciting topic in Cultural and Post Colonial theory and offers insightful elaboration and critique of the meaning and relevance of life in the third space With a preface by Homi K Bhabha *The Farthest Reaches of Space* Barrett
