New Families No Families The Transformation Of The American Home:

New Families, No Families? Frances K. Goldscheider, Linda J. Waite, 1991-01-01 *Handbook of the Sociology of Gender* Janet Saltzman Chafetz, 2006-11-22 During the past three decades feminist scholars have successfully demonstrated the ubiquity and omnirelevance of gender as a sociocultural construction in virtually all human collectivities past and present Intrapsychic interactional and collective social processes are gendered as are micro meso and macro social structures Gender shapes and is shaped in all arenas of social life from the most mundane practices of everyday life to those of the most powerful corporate actors Contemporary understandings of gender emanate from a large community of primarily feminist scholars that spans the gamut of learned disciplines and also includes non academic activist thinkers However while incorporating some cross disciplinary material this volume focuses specifically on socio logical theories and research concerning gender which are discussed across the full array of social processes structures and institutions As editor I have explicitly tried to shape the contributions to this volume along several lines that reflect my long standing views about sociology in general and gender sociology in particular First I asked authors to include cross national and historical material as much as possible This request reflects my belief that understanding and evaluating the here and now and working realistically for a better future can only be accomplished from a comparative perspective Too often American sociology has been both tempero and ethnocentric Second I have asked authors to be sensitive to within gender differences along class racial ethnic sexual preference and age cohort lines Contemporary Introduction to Sociology Jeffrey C. Alexander, Kenneth Thompson, Laura Desfor Edles, 2016-01-08 The first edition of A Contemporary Introduction to Sociology was the first truly new introductory sociology textbook in decades Written by two leading sociologists at the cutting edge of theory and research the text reflected the idioms and interests of contemporary American life and global social issues The second edition continues to invite students to reflect upon their lives within the context of the combustible leap from modern to postmodern life The authors show how culture is central to understanding many world problems as they challenge readers to confront the risks and potentialities of a postmodern era in which the futures of both the physical and social environment seem uncertain As culture rapidly changes in the 21st century the authors have broadened their analysis to cover developments in social media and new data on gender and transgender issues **Situating Feminism** Sondra Farganis, 1994-06-07 Feminist theory has undergone continuous evolution since its recognized establishment in 1963 Sondra Farganis s insightful volume revisits feminist philosophy s turbulent beginnings and explores the myriad political and social factors influencing its development during the past three decades The author also considers the interaction between feminism and the greater women s movement discussing not only the commonalities but the differences among women of various cultures and experiences Finally she recounts four of the most controversial women centered court cases of recent years identifying elements of feminist theory and how they affected or were affected by the social and political context in

which they occurred Inspiring new directions in critical thought and theoretical advancement Situating Feminism will prove an essential resource for students and professionals in the areas of women s and culture studies political science social work communication and psychology Sondra Farganis does not shy away from rigorous arguments or moral issues dealing directly with the relationship of postmodernism and feminism and the concerns that the former undermines the latter She capably moves among writers like Berger and Luckman Freire Habermas and Butler Ultimately the strength of this book is its ability to present a wide range of feminist political and social theories in a coherent fashion while demonstrating its application to actual real life situations Affilia Sondra Farganis has written a concise study on the situation of feminist thought in relation to contemporary social controversies She analyzes the Nussbaum domestic violence and victimization Baby M motherhood and surrogacy Sears employment and affirmative action and Hill Thomas race and sexual harassment cases in a broad theoretical context Farganis outlines major themes and conflicts within feminist thought illustrating how these played out in the resolution of the cases Choice

Perspectives on Ecclesiology and Ethnography Pete Ward, 2012-03-15 Within the disciplines of religious studies systematic theology and practical theology there exists a divide between empirical and theological analyses of the church Each volume in the cross disciplinary series Studies in Ecclesiology and Ethnography attempts to address this gap by exploring the methodological and substantive issues that arise from both theological and empirical studies of the church s practices and social reality Perspectives on Ecclesiology and Ethnography the inaugural volume in the series proposes that if theology is to regain its relevance to the church today theologians must utilize ethnographical tools in order to provide more accurate disciplined research that is situated in real contexts Using ethnography in its broadest sense encompassing any form of qualitative research this volume proposes that the church is both theological and social cultural which implies the need for a methodological shift for researchers in theology Contributions from twelve scholar practitioners lead the way forward Contributors Luke Bretherton Paul S Fiddes Nicholas M Healy Mary McClintock Fulkerson Alister E McGrath Richard R Osmer Elizabeth Phillips Christian Scharen John Swinton Pete Ward Clare Watkins John Webster

Marriage and Cohabitation Arland Thornton, William G. Axinn, Yu Xie, 2008-09-15 In an era when half of marriages end in divorce cohabitation has become more commonplace and those who do get married are doing so at an older age So why do people marry when they do And why do some couples choose to cohabit A team of expert family sociologists examines these timely questions in Marriage and Cohabitation the result of their research over the last decade on the issue of union formation Situating their argument in the context of the Western world s 500 year history of marriage the authors reveal what factors encourage marriage and cohabitation in a contemporary society where the end of adolescence is no longer signaled by entry into the marital home While some people still choose to marry young others elect to cohabit with varying degrees of commitment or intentions of eventual marriage The authors controversial findings suggest that family history religious affiliation values projected education lifetime earnings and career aspirations all tip the scales in

favor of either cohabitation or marriage This book lends new insight into young adult relationship patterns and will be of interest to sociologists historians and demographers alike The Changing Transition to Adulthood Francis Goldscheider,Calvin Goldscheider,1999-06-14 This book places changes in leaving and returning home in the context of the major events of 20th century America The authors examine the reasons children ultimately leave home to live on their own and how the pattern has changed throughout the 20th century Using data from the National Survey of Families and Households Goldscheider and Goldscheider have constructed these patterns for when children leave home and what the most important criteria for doing so are to different groups in America including men women Blacks Hispanics Whites and different religious groups and social classes **Handbook of the Life Course** Jeylan T. Mortimer,Michael J. Shanahan,2007-12-14 This comprehensive handbook provides an overview of key theoretical perspectives concepts and methodological approaches that while applied to diverse phenomena are united in their general approach to the study of lives across age phases In surveying the wide terrain of life course studies with dual emphases on theory and empirical research this important reference work presents probative concepts and methods and identifies promising avenues for future research
