New International Financial Architecture and Korean Perspectives Tae-jun Kim,2001 **New International Financial Architecture and Korean Perspectives** ,2001 New International Financial Architecture and Korean Perspectives Tae-jun Kim,2001 **The Asian Financial Crisis: New International Financial Architecture** Shalendra Sharma,2003-10-03 The Asian financial crisis of 1997 98 shook the foundations of the global economy What began as a localized currency crisis soon engulfed the entire Asian region What went wrong and how did the Asian economies long considered miracles respond How did the United States Japan and other G 7 countries react to the crisis What role did the IMF play Why did China remain conspicuously insulated from the turmoil raging in its midst What lessons can be learnt from the crisis by other emerging economies This book provides answers to all the above questions and more It gives a comprehensive account of how the international economic order operates examines its strengths and weaknesses and what needs to be done to fix it The book will be vital to students of economics international political economy Asian and development studies *The IMF and its Critics* David Vines,Christopher L. Gilbert,2004-02-26 The IMF is the first economic institution in line to protect countries from the effects of financial crises and to insulate the world economy from possible systemic risk However many argue that the IMF is insufficiently equipped to do this job while others argue almost the opposite the IMF s well intentioned actions induce other countries to take risks which increase their exposure from both universities and the multilateral agencies combines rigourous economic analysis with insider perspectives on key policy debates It analyses the Asian and Argentine financial crises of the late 1990s issues of policy ownership the more general quest for financial stability and governance of the IMF It is an essential reference for anyone interested in the role of international financial institutions in our globalised economy *Reforming the International Financial Architecture* Il SaKong,2000 *The Politics of the New International Financial Architecture* Susanne Soederberg,2004-11 This is a critique of the attempts of the G7 industrialized countries to rewrite the rules of international finance It includes case studies on capital controls from Chile and Malaysia and is aimed at scholars and students of international political economy and development and reform activists **New International Financial Architecture** Nouriel Roubini,Marc Uzan,2005 **The IMF and East Asia** Gordon De Brouwer,2002 **The Dynamics of Asian Economic Development** Hitoshi Hirakawa,Ferdinand C. Maquito,2024-12-10 One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world s attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms

and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US China trade war and China s Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not only perceives the structural change of the global economy as a structural change from a US centric global economy of the twentieth century to a China centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China s BRI has prompted the investment competition between Japan and the US which has made even stronger the possibility of giving birth to a new economic frontier in Afro Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and overseas policies of attention drawer China
