New Democracy Alternatives To A Bankrupt World Order:

A New Democracy Harry Shutt,2001-11-30 The world order currently remains under the effective control of the industrialized countries of North America and Europe broadly representing the interests of the world s most powerful corporations Harry Shutt argues that political movements need to construct new alternative paths of global integration methods of economic governance that are more responsive to the public s needs and more equitable and democratic reform designed to make governments more representative

Beyond the Profits System Harry Shutt,2013-07-04 Since 2008 we have found ourselves confronted by an historic financial holocaust that world leaders have struggled to come to terms with All have willfully ignored its long term systemic causes and are thus unable to chart a way to survival As explained by Harry Shutt who was almost alone in foreseeing such a disaster in the 1990s in *The Trouble with Capitalism* their continued denial stems from a vested interest in maintaining a capitalist profits system which is not only as destructive as it was in the 1930s but as outmoded as feudalism was in 1789 Thus it can now only be sustained by an increasing reliance to official misinformation massive criminal fraud and the ever greater dependence of private corporations on state subsidy This book makes clear why the desperate resort of Western governments to extraordinary measures to try and avert economic collapse is bound to fail It also forcefully demonstrates why our only hope of reversing the tide is to abandon the traditional economic logic of endlessly expanding production in favour of responding to the aspirations of ordinary people Such a transformation argues Shutt would make possible the allocation of resources to more socially desirable ends including the assurance of basic economic security for all as a right of citizenship

The A to Z of the Non-Aligned Movement and Third World Guy Arnold,2010-04-06 During the long period when the world was divided between East and West and the Cold War threatened to turn hot with devastating consequences the Non Aligned Movement was one of the few institutions that consistently sought other outcomes not in its own interest but that of all humanity Consisting of over 100 states that are free of any formal alliances with any major power bloc the Non Aligned Movement provides aid to those countries striving to gain independence eliminate poverty and develop their economy Just what the Non Aligned Movement and Third World sought and at times achieved is set forth in this unique reference work with its over 200 cross referenced dictionary entries on important persons organizations and conferences as well as the key issues and concepts Entries are supported by an extensive chronology an introduction to the movement and a bibliography for further research

Globalisation and Sustainable Development Vladimir F. Krapivin,2007-07-05 A characteristic of the present global ecological situation is increasing instability or put another way a crisis in the civilization system the global scale of which is expressed through a deterioration of human and animal habitats The most substantial features of global ecodynamics of the late 20th and early 21st centuries include the rapid increase in world population mainly in developing countries increase in the size of the urban population considerable growth in the number of megalopolises and increase in the scales of such dangerous diseases as HIV

AIDS hepatitis tuberculosis etc With growing population size the problems of providing people with food and improving their living conditions in many regions will not only not be resolved but will become even more urgent Any possible benefit from decrease in per capita consumption as a result of increased efficiency of technologies will be outweighed by the impact of such a growth in population size Despite the predominant increase of population in developing countries their contribution to the impact on the environment will not necessarily exceed that of developed countries Key to ensuring sustainable development of the nature society system NSS is the relationship between production and consumption as mentioned at the World Summit on Sustainable Development in Johannesburg 2002 As civilization has developed so the problem of predicting the scale of expected climate change and associated change in human habitats has become more urgent

Human Rights Koen De Feyter, 2013-04-04 Koen De Feyter who has chaired Amnesty International's Working Group on economic social and cultural rights shows the many ways in which rampant market economics in today's world leads to violations of human rights He questions how far the present day international human rights system really provides effective protection against the adverse effects of globalization This accessible and thought provoking book shows both human rights activists and participants in the anti globalization movement that there is a large but hitherto untapped overlap in their agendas and real potential for a strategic alliance between them in joint campaigns around issues they share

Fairness, Globalization, and Public Institutions Jim Dator, Richard C. Pratt, Yongseok Seo, 2018-03-31 Who benefits from the interconnected processes often referred to as globalization Is it a relatively few people with most others either being harmed or at least not helped Are the good things that globalization produces whatever they are widely shared What processes lead us in one direction or another This book examines a key dimension of globalization its fairness It investigates the meaning of and role fairness plays when public institutions are faced with the challenges and opportunities of globalization Here a distinguished group of contributors including both academics and practitioners focuses on East and Southeast Asia but the relevance of the issues discussed extends well beyond these regions They present a broad ranging examination of the intersections between fairness globalization and public institutions Contributors Doug Allen Walt T Anderson Ron Brown Jim Dator Jingping Ding Christopher Grandy Sohail Inayatullah Yong duck Jung Martin Khor Yoshiko Kojo Le Van Anh Ivana Milojevic Ryo Oshiba Edgar A Porter Dick Pratt Fred Riggs James Rosenau Yongseok Seo Chanto Sisowath Shunichi Takekawa

Challenges of Global Business Authority, The Tony Porter, Karsten Ronit, 2011-01-02 Business is being globalized with an immense speed but are democratic practices and decision making structures keeping pace Contrary to those who see democracy as irrelevant or impossible at the global level The Challenges of Global Business Authority analyzes three dimensions of democracy participation accountability and transparency in many transnational mechanisms that seek to align global business interests with the public interest Looking beyond these mechanisms this volume seeks to explore the fundamental issues affecting the relationship between democracy and global business authority such as the structural power of business itself and the contestations over the boundary between public and private The essays in this volume provide concrete ways that business can be made more publicly accountable to allow democratic practices to take on a more permanent role in the global business world

The Trouble with Capitalism Harry Shutt, 2013-07-04 The recent collapse of the banking system and instability in the financial markets has dramatically shaken confidence in the global economic order Is the current variant of free market capitalism really sustainable The Trouble With Capitalism originally written with remarkable prescience in 1998 anticipates such a development and explains the underlying economic fragility it has revealed Rather than being merely a temporary blip in the march of capitalism Shutt argues forcefully that the on going crisis has arisen as a result of fundamental economic problems stemming from the growing redundancy of both labour and capital since the 1970s In doing so he exposes the sham of the laissez faire prospectus showing that state power and capital are increasingly being used to prop up capital while pretending that the aim is to roll back the frontiers of the state The implications of the author's startling conclusion re examined in a new foreword that the maximisation of profit must cease to be the main basis for allocating resources are profound

The Decline of Capitalism Harry Shutt, 2005 Should we be

more concerned that collapsing share values and widespread corporate failure and fraud beg some serious questions about the viability of the present world economy Harry Shutt persuasively demonstrates that the present crisis is the culmination of 30 years of deepening stagnation Faced with a long term trend of reduced demand for both capital and labor the world economy has only avoided a vast recession through growing reliance on official subsidy and market distortion Shutt points out that regulatory reform can only work by limiting profitability but that a more sustainable model is unacceptable to ruling elites He outlines an agenda for fundamental changes based on the premise that the primacy of private profit is no longer compatible with the priorities of modern democracies
