New Development Agenda:

Delusions of Development T. Carroll, 2010-09-22 Investigates the World Bank's promotion of market led development in the underdeveloped world and the impact that this promotion has upon citizenship This book looks at this subject using case studies drawn from Southeast Asia one of the world's most diverse regions **From Rio+20 to a New Development**

Agenda Felix Dodds, Jorge Laguna-Celis, Liz Thompson, 2014-01-21 Twenty years after the United Nations Conference on Environment and Development The Earth Summit the Rio 20 conference in 2012 brought life back to sustainable development by putting it at the centre of a new global development partnership one in which sustainable development is the basis for eradicating poverty upholding human development and transforming economies Written by practitioners and participants involved in the multilateral process of negotiations this book presents a unique insider analysis of not only what happened and why but also where the outcomes might impact in the future particularly in the UN development agenda beyond 2015 The book throws light on the changing nature of multilateralism and questions frequent assumptions on how policy is defined within the UN It shows that Rio 20 was more than an international meeting it represented a culminating point of decades of successes and failures and a watershed moment for seminal concepts ideas and partnerships including the Green Economy zero tolerance on land degradation the introduction of Sustainable Development Goals the creation of national measurements of consumption production and well being that are intended to go beyond GDP the introduction of national green accounting and the commitment of billions of dollars for sustainable development partnerships including Sustainable Energy for All The authors conclude by mapping out a new agenda for development in 2015 when the current Millennium Development Goals framework is due to expire An agenda that will restore faith in the UN and inspire a global response to the demographic economic and environmental challenges that will define our future in the decades to come

People, Planet, and Progress Beyond 2015, 2016-12-15 Second in the series of TERI's annual flagship publication on global sustainable development People Planet and Progress Beyond 2015 examines six critical issues of the Planet climate change ozone layer depletion loss of biodiversity desertification unsustainable use of natural resources and environmental pollution and six crucial issues of the People food security and safety health and well being education and learning sustainable habitat energy for all and social justice and equity reviews the Progress made by various regions and countries of the world on each of these issues and analyses the challenges and opportunities ahead particularly in the contexts of post 2015 global development agendas ushered by the Paris Climate Agreement UN Sustainable Development Goals and Sendai Framework for Disaster Risk Reduction The analysis is supported by primary data from authentic sources on a wide range of indicators that make the volume an invaluable resource material on contemporary discourses on global development *The Institutional Topology of International Regime Complexes* Benjamin Daßler, 2023-09-12 The implicit topology of international institutional complexes varies greatly across policy areas In some areas the lion's share of everyday policy cooperation is

shaped by a single institution with alternative and more regional institutions operating in its shadow In other policy fields institutional structures appear to be different seeing a range of non hierarchical decentralized alternative institutions The Institutional Topology of International Regime Complexes Mapping Inter Institutional Structures in Global Governance provides a systematic conceptualization and explanation of the evolution of these varying institutional topologies underlying regime complexes across five issue areas of Global Governance Intellectual Property Protection Tax Avoidance Financial Stability Development Aid and Energy Governance By providing an empirically grounded network based conceptualization and mapping of institutional topologies as well as a theoretical explanation for their variation across policy space and time the book offers a comprehensive analysis of both the empirical manifestation of inter institutional structures across various policy fields of Global Governance and the issue specific factors that shape the varying institutional trajectories spurring decentralization Da ler combines quantitative network analyses with qualitative case studies to trace institutional decentralization processes across five highly relevant issue areas of Global Governance This volume shows how the nature of issue specific cooperation problems translates into disparate structures among multilateral institutions occupying the same regime complex In light of growing concerns about the future trajectories of Global Governance in times of heightened geopolitical tensions Da ler offers a fresh perspective to comparatively capture the profoundly varying institutional landscapes across different issue areas and their associated challenges and benefits of multilateral cooperation

Brown,Gavin Yamey,Sarah Wamala,2014-06-03 The Handbook of Global Health Policy provides a definitive source of the key areas in the field It examines the ethical and practical dimensions of new and current policy models and their effect on the future development of global health and policy Maps out key debates and policy structures involved in all areas of global health policy Isolates and examines new policy initiatives in global health policy Provides an examination of these initiatives that captures both the ethical critical as well as practical empirical dimensions involved with global health policy global health policy formation and its implications Confronts the theoretical and practical questions of who gets what and why and how when and where Captures the views of a wide array of scholars and practitioners including from low and middle income countries to ensure an inclusive view of current policy debates

From Agriculture to Agricolology Professor Dani Wadada Nabudere,Mapungubwe Institute for Strategic Reflection (MISTRA),2013-07-01 In this meditation respected Ugandan academic Dani Wadada Nabudere traces the roots of the global economic crisis and warns of the threat that the decline of Western nations poses to the African continent the final frontier for those in search of new lands and resources to exploit As a deterrent to what he sees as the encroachment of super profiteers looking to Africa for the land to increase their profits in industrial agriculture Nabudere advocates for what he terms community sites of knowledge that is the use of indigenous tools and knowledge to revitalize the lives of Africa's

people The book puts forth the belief that any dependence on imported knowledge and material instruments will only lead to the entrenchment of colonial stereotypes and that indigenous knowledge is imbued with the roots of complex ecosystems that require the inputs of a diversity of expertise and experiences and that are capable of producing the knowledge necessary for the residents of the African continent to reclaim the future Global Social Policy in the Making Bob Deacon, 2013-07-03

The global economic crisis continue to dominate headlines yet measures to build a social floor under the global economy and reform global governance have received little attention In 2012 the Social Protection Floor was adopted as a global social policy measure ensuring that all could have access to essential health care and income security over their lifespan This book by the world's leading authority on global social policy examines why and how the Social Protection Floor became ILO UN and G20 policy and how the World Bank and IMF took steps to lay its foundation Bob Deacon explains this development in terms of four influences firstly shifts in the global social structure secondly processes inside international institutions thirdly global actors sometimes individuals using their positions to make change and fourthly shifting discourses about social protection This much needed contribution to the field of global social policy will be of interest to students of international relations international organization and development studies and should be read by international civil servants in global agencies

The United Nations under Ban Ki-moon Marcel Jesenský, 2019-02-13 This book chronicles the story of the United Nations under Secretary General Ban Ki moon in the decade 2007-2016 Marcel Jesensk provides a compelling account of the organization's activities and Ban Ki moon's role in reconciling the aims principles and prerogatives of his office the organization and its Charter with the demands interests and power of the member states Today as never before the concept of the post World War II multilateral framework of international relations tries to harmonize the claims for its reform and re evaluation with growing demands to manage the globalized world This work invaluable for readers interested in global governance multilateral diplomacy the United Nations and international relations presents its subject in historical context and provides answers to assist its understanding
