New Dimensions in Transnational Crime Donal E. J. MacNamara, Philip John Stead, 1982 The New Dimension of International Terrorism Stefan M. Aubrey, 2004 The events of September 11 2001 confronted the United States and the rest of the World with the reality of a new dimension of international terrorism This new dimension did not start nor end with the attacks against the World Trade Center or the Pentagon but began in the 1990s This study examines the new dimension of international terrorism contrasting it with the classical terrorism the predominantly left wing terrorist movements of the 1960s 1980s in Europe which were a subset of the bipolar geo political arena The author establishes the relationship of radical Islamist movements to the terrorist groups of the new dimension principally focusing on Al Qaeda in providing the motivation for committing catastrophic terrorist acts looks at the shadowy world of terrorist financing and makes suggestions regarding international counter terrorist strategies Organized Crime: A Compilation of U.N. The existence of the UN Convention against Transnational Organised Crime and its Protocols demonstrates the necessity to comprehend this subject in a systematic way. Synthesizing the various sources of law that form this area of growing academic and practical importance, *International Law and Transnational Organised Crime* provides readers with a thorough understanding of the key concepts and legal instruments in international law governing transnational organised crime. The volume analyses transnational organised crime in consideration of the most relevant subareas of international law such as international human rights and the law of armed conflict. Written by internationally recognized scholars in international and criminal law as well as respected high level practitioners, this book is a useful tool for lawyers, public agents and academics seeking straightforward and comprehensive access to a complex and significant topic.

The United Nations and Transnational Organized Crime Ernesto Savona, Phil Williams, 2012-12-06 Transnational organized crime poses a serious threat to the international community. This volume, the product of a UN conference, discusses the dangers of transnational organized crime and identifies forms of regional, national and international co-operation for its prevention and control, including intelligence networks, preventive strategies, extradition treaties, criminalizing participation in criminal organizations and the elaboration of an international convention. The reduction and subsequent containment of transnational organized crime require governments not only to recognize the seriousness of the challenge but also to allocate resources commensurate with this challenge. The authors warn that should the international community fail to do this, the prospects for democratic government and the rule of law will be gloomy.

Histories of Transnational Criminal Law Neil Boister, Sabine Gless, Florian Jeßberger, 2021-08-02 This edited collection provides an in depth account of the history of key developments in transnational criminal law. While the history of international criminal law is now a much written about topic, the origins of most modern transnational criminal laws are not well understood. *Histories of Transnational Criminal Law* provides for the first time a set of legal histories of state efforts to combat and cooperate against transnational crime. With contributions from a group of world leading experts, this edited volume traverses a range of topics beginning with the normative, intellectual and institutional histories of transnational criminal law. It then moves to the histories of specific transnational crimes ranging across eras from piracy to cybercrime and finishes by examining jurisdiction, modes of liability, different forms of procedural cooperation and the predicament of the individual in transnational criminal law. The book highlights specific issues and how they have been resolved in the loose assemblage of norms, institutions and practices that constitutes transnational criminal law.

Yearbook of Transnational History Thomas Adam, 2019-07-19 The *Yearbook of Transnational History* is dedicated to disseminating pioneering research in the field of transnational history. This second volume provides readers with articles on topics such as transnational marriages, exile, soccer and missionaries as well as on the campaigns in Communist countries for freeing the American civil rights activist Angela Davis. These articles highlight the movement of ideas, people, policies and practices across various cultures and societies and explore the relations, connections

and spaces created by these movements The articles in this volume explore interconnected historical phenomena in Asia North and South America and Europe from the late seventeenth century to the late twentieth century These articles make clear that historical phenomena such as soccer and exile cannot be contained and explained within just one national setting This volume also offers a theoretical article that provides insights into the concept of intercultural transfer studies and its relationship to comparative and global history and an article that surveys the state of research in the field of transnational crime

The Oxford Handbook of the International Law of Global Security Robin Geiß, Nils Melzer, James Gerard Devaney, 2021 A unique overview of the relationship between international law and global security Major areas of coverage include armed conflict human rights the environment and technology Book jacket
