Strategic Management in Public Organizations: European Practices and Perspectives offers the first wide ranging survey and assessment of strategic management practices at various levels of government and public service in European countries. It shows that strategic management is much more than a management tool imported from the private sector; it has become a key element of public management reforms and European governments at all levels are developing strategic state characteristics. Written by leading European experts on strategic management in the public sector and in government, this book presents evaluations and analysis based on empirical investigations. The book covers strategic management at different levels of government, explores the roles of different players and incorporates theory and practice with opening and concluding chapters by the editors that provide an overview of strategic management in the public services and a cross societal discussion of practices, reforms and lessons. It reflects not only developments in strategic management practices in the European public sector but also the increasing importance of strategic capabilities for the modernization of public governance. This book is ideal for students in postgraduate management courses: MPA, MSc or MBA in Europe and elsewhere.

**Leadership and Strategic Management** Paolo Boccardelli, Federica Brunetta, 2024-05-01. Managers are facing unprecedented complexity, volatility and ambiguity quickly adapting their decision making, leadership vision and strategies. Megatrends and forces of change have profound implications

for business models processes and organizational structures calling into question current paradigms and designing future change. Additionally, unprecedented disruptions unforecastable in their nature have increased the need for resilience and strategic flexibility. The book aims at tackling the potential interrelations among environmental transformations, strategic decisions, and leadership to better understand the role of external and internal factors on the effectiveness of managers. The book defines change, its extent, nature, and characteristics. Then it focuses on decision making, the role of potential cognitive biases, and how the interaction with the perception of determined environmental events affects the way in which decision makers decide to implement specific strategies. Finally, in the light of waves of strategic change, it reviews theories on leadership and transformation by looking at the role and traits of leaders. Since environmental transformations have the potential to disrupt not only strategies but also decision making processes and leadership, the book provides a review on the issue and proposes an integrative framework which can be useful for both scholars and managers, especially in the fields of decision making and strategy.
