Made in Italy Grace Lees-Maffei, Kjetil Fallan, 2013-11-21 Goods made or designed in Italy enjoy a profile which far outstrips the country's modest manufacturing output Italy's glorious design heritage and reputation for style and innovation has added value to products made in Italy Since 1945 Italian design has commanded an increasing amount of attention from design journalists critics and consumers But is Italian design a victim of its own celebrity Made in Italy brings together leading design historians to explore this question discussing both the history and significance of design from Italy and its international influence Addressing a wide range of Italian design fields including car design graphic design industrial and interior design and ceramics well known designers such as Alberto Rosselli and Ettore Sottsass Jr and iconic brands such as Olivetti Vespa and Alessi the book explores the historical cultural and social influences that shaped Italian design and how these iconic designs have contributed to the modern canon of Italian inspired goods

Italy: the New Domestic Landscape Museum of Modern Art (New York, N.Y.), 1972 During the last decade the emergence of Italy as the dominant force in design has had a profound influence in Europe and the Americas The phenomenon is important not

only because of the high quality and diversity of the forms produced but also because it has generated a lively debate on the sociocultural implications of product design raising questions of vital concern to designers throughout the world For many designers the aesthetic quality of individual objects intended for private consumption have become irrelevant in the face of such pressing problems as poverty urban decay and the pollution of the environment now encountered in all industrialized countries Consequently they are increasingly shifting the focus of their attention from the well designed object to man's total environment seeing the designer's function as one that can mold patterns of behavior by creating new settings for freer more adaptable lifestyles Some however despairing of effecting social change through design regard their task as essentially a political one They therefore abstain from the physical designing of either objects or environments and channel their energies into the staging of events and the issuing of polemical statements Their approach thus parallels that of many artists in other mediums who view their art in primarily conceptual terms This publication issued in conjunction with a major exhibition at The Museum of Modern Art is the first to deal comprehensively with these challenging developments Over 150 objects of Italian design of the past ten years have been selected for the show and are all reproduced in color and black and white as are the dozen environments by well known Italian designers specially commissioned for the occasion and the two awarded prizes in a concurrent competition for young designers under thirty five sponsored by the Museum Each environment is accompanied by a statement in which the individual or group responsible for the project clarifies his position regarding the present and future role of design In addition to essays by Emilio Ambasz Curator of Design at the Museum of Modern Art and director of the exhibition the book contains contributions by a number of outstanding Italian critics and art historians Together these comprise the first historical survey of contemporary Italian design and a critical analysis of its intellectual and formal positions within the context of international design today Publisher's description

Textiles, Identity and Innovation: In Touch Gianni Montagna, Manuela Cristina Paulo Carvalho Figueiredo, 2020-05-19 D_Tex is proposed as a hub around which it is possible to look at textiles in their different forms in order to better understand study adapt and project them for the future It is intended to build a flow of ideas and concepts so that participants can arrive at new ideas and

concepts and work them in their own way adapting them to their objectives and research D_Tex is intended as a space for sharing and building knowledge around textile material in order to propose new understandings and explorations Present in all areas of knowledge the textile material bets on renewed social readings and its evolutions to constantly reinvent itself and enable innovative cultural and aesthetic dimensions and unexpected applications to solve questions and promote new knowledge D_Tex proposes to promote discussion and knowledge in the different areas where textiles with all their characteristics can ensure an important contribution combining material and immaterial knowledge innovative and traditional techniques technological and innovative materials and methods but also new organization and service models different concepts and views on teaching With the renewed idea of the intrinsic interdisciplinarity of design and sharing with different areas that support each other the research and practice of textiles was proposed by the D_TEX Textile Design Conference 2019 held June 19 21 2019 at the Lisbon School of Architecture of the University of Lisbon Portugal under the theme In Touch where as broadly understood as possible different areas of textiles were regarded as needing to keep in touch with each other and end users in order to promote and share the best they can offer for the welfare of their users and consumers
