The Mathematics Teacher, 1925

The Man Who Loved Only Numbers Paul Hoffman, 2024-05-07 A funny marvelously readable portrait of one of the most brilliant and eccentric men in history The Seattle Times Paul Erdos was an amazing and prolific mathematician whose life as a world wandering numerical nomad was legendary He published almost 1500 scholarly papers before his death in 1996 and he probably thought more about math problems than anyone in history Like a traveling salesman offering his thoughts as wares Erdos would show up on the doorstep of one mathematician or another and announce My brain is open After working through a problem he'd move on to the next place the next solution Hoffman's book like Sylvia Nasar's biography of John Nash A Beautiful Mind reveals a genius's life that transcended the merely quirky But Erdos's brand of madness was joyful unlike Nash's despairing schizophrenia Erdos never tried to dilute his obsessive passion for numbers with ordinary emotional interactions thus avoiding hurting the people around him as Nash did Oliver Sacks writes of Erdos A mathematical genius of the first order Paul Erdos was totally obsessed with his subject he thought and wrote mathematics for nineteen hours a day until the day he died He traveled constantly living out of a plastic bag and had no interest in food sex companionship art all that is usually indispensable to a human life The Man Who Loved Only Numbers is easy to love despite his strangeness It's hard not to have affection for someone who referred to children as epsilons from the Greek letter used to represent small quantities in mathematics a man whose epitaph for himself read Finally I am becoming stupider no more and whose only really necessary tool to do his work was a quiet and open mind Hoffman who followed and spoke with Erdos over the last 10 years of his life introduces us to an undeniably odd yet pure and joyful man who loved numbers more than he loved God whom he referred to as SF for Supreme Fascist He was often misunderstood and he certainly annoyed people sometimes but Paul Erdos is no doubt missed Therese Littleton

In Their Own Way Thomas Armstrong, 2000-08-07 Does your child have a favorite subject activity or hobby Children learn in multiple ways and educator Thomas Armstrong has shown hundreds of thousands of parents and teachers how to locate those unique areas in each of our children where learning and creativity seem to flow with special vigor In this fully updated classic on multiple intelligences Armstrong sheds new light on the eight ways to bloom or the eight kinds of multiple intelligences While everyone possesses all eight intelligences Armstrong delineates how to discover your child's particular areas of strength among them The book shatters the conventional wisdom that brands our students as underachievers unmotivated or as suffering from learning disabilities attention deficit hyperactivity disorder or other learning diseases Armstrong explains how these flawed labels often overlook students who are in possession of a distinctive combination of multiple intelligences and demonstrates how to help them acquire knowledge and skills according to their sometimes extraordinary aptitudes Filled with resources for the home and classroom this new edition of In Their Own Way offers inspiration for every learning situation

Masters of the Games Joseph Epstein, 2015-01-09 In this collection his twenty fifth book Joseph Epstein departs from writing about literature and culture to indulge his fondness for the world of sport in all its forms In these essays and stories on such subjects as saving Joe DiMaggio's reputation from the clutches of an iconoclastic biographer marveling at the skills of Michael Jordan shaking free of an addiction to radio sports talk shows or contemplating the changing nature of the games he grew up with and played as a boy Epstein turns writing about sports into an art at once penetrating and highly amusing

A Banner Handbook for Homeschoolers Elinor Miller, 2009-09 Intuitive and constructive ideas for educating children whether or not one is homeschooling *Of Literature and Knowledge* Peter Swirski, 2007-02-12 *Of Literature and Knowledge* looks like an important advance in this new and very important subject literature is about to become even more interesting Edward O Wilson Pellegrino University Professor Harvard University Framed by the theory of evolution this colourful and engaging volume presents a new understanding of the mechanisms by which we transfer information from narrative make believe to real life Ranging across game theory and philosophy of science as well as poetics and aesthetics Peter Swirski explains how literary fictions perform as a systematic tool of enquiry driven by thought experiments Crucially he argues for a continuum between the cognitive tools employed by scientists philosophers and scholars or writers of fiction The result is a provocative study of our talent and propensity for creating imaginary worlds different from the world we know yet invaluable to our understanding of it *Of Literature and Knowledge* is a noteworthy challenge to contemporary critical

theory arguing that by bridging the gap between literature and science we might not only reinvigorate literary studies but above all further our understanding of literature User-Friendly Math for Parents Catheryne Draper, 2017-06-08 User Friendly Numbers in Math for Parents shares stories of students reasoning thinking and sometimes misunderstandings about numbers stories that provide the opportunity to see math differently Most of the students are visual spatial creative daydreamers who may miss the details in math a characteristic of visual spatial learners Through these stories parents will see mathematics through their child's eyes both the clarity and the confusion Armed with this new sight and therefore insight parents will be able to talk differently with their child about the number language of math By seeing numbers through new eyes children and parents can take control of the math language and therefore the mathematics This book focuses more on the why reasons behind math number relationships explained in plain English and with images that show number relationships By including more images and fewer formulas readers especially the visual spatial learners have a better chance of understanding how number organizers apply to different number types Recognizing connections among number formats significantly reduces the impatience frustration and heartache around homework Cumulated Index to the Books, 1999
