Nutritional And Environmental Influences On The Eye:

Nutritional and Environmental Influences on the Eye Allen Taylor, 2021-05-30 Significant advancements in nutrition's impact on the eye have occurred faster than any volume can document until now. This book gives the background and rationale regarding the physiological damage caused by biological oxidants as well as the rationale for the protective roles for nutrient antioxidants and how they affect the risk for cataracts. This volume also contains information on how to quantitatively assess age-related diseases of the eye including cataracts and age-related maculopathy. Smoking and light exposure as factors for age-related eye diseases as well as the utility of potential anticataract pharmaceuticals is discussed.

Molecular Nutrition Janos Zemleni, Hannelore Daniel, 2003 Molecular nutrition, the study of interactions between nutrients and various intracellular and extracellular molecules, is one of the most rapidly developing fields in nutritional science. Ultimately, molecular nutrition research will reveal how nutrients may affect fundamental processes such as DNA repair, cell proliferation, and apoptosis. This book is the only single complete volume available reviewing the field of molecular nutrition. It contains contributions from leading international experts and reviews the most important and latest research from various areas of molecular nutrition.

Preventive Nutrition Adrienne Bendich, Richard J. Deckelbaum, 2010-04-19 In this major revision and expansion of a highly respected reference work, the authors have created the most comprehensive and up-to-date review of the nutritional strategies available for the prevention of disease and the promotion of health through nutrition. This new edition combines fully updated versions of the best chapters of the first two editions with updated critical chapters from the much-praised Primary and Secondary Preventive Nutrition and adds 16 new chapters. Here, practicing health professionals will find all new reviews of lycopene, tomatoes, and prostate cancer; soy and cancer prevention; the effects of dietary supplement use on prescription drugs, osteoarthritis, osteoporosis, and cardiovascular disease; balanced data-driven reviews of the effects of antioxidant supplements on health outcomes; and more. By synthesizing the latest data and integrating it into the broad body of existing information, this book provides in-depth guidance on nutrition and the prevention of cancer, cardiovascular disease, bone diseases, obesity, and diabetes, and on achieving optimal pregnancies and birth outcomes.

Nutrition and the Eye Albert J. Augustin, 2005-01-01 This volume contains a basic research section focusing on the major compounds of nutrition and food supplements as well as a clinical research section providing up-to-date information on the results of recent clinical studies. Written for clinicians as well as basic vision scientists, this volume is an essential contribution to the research activities, especially in eye diseases leading to blindness such as diabetic retinopathy and age-related macular degeneration.

Nutrition and Aging I. H. Rosenberg, A. Sastre, 2002-07 Humanity is aging. In the last century, life expectancy has increased by as much as 25 years, the greatest increase in 5 000 years of history. As a consequence, the elderly constitute today the fastest growing segment of the world's population. This new situation creates many social problems and challenges to health care which both the developed as well as the developing countries will have to

cope with The present publication shows that scientific progress has reached a level where nutritional interventions may play a decisive part in the prevention of degenerative conditions of age improvement of quality of life and impact on health care burden and resources Topics deal with such different aspects as the influence of prenatal and early infant nutrition on the future aged individual and effects of energetic restriction on longevity Further contributions include studies on mitochondrial alterations digestive problems specific metabolic deviations mediated by insulin bone degradation structural changes neuromuscular dysfunctions mental state of the elderly as well as the response of the immune system to nutrient intake Finally the book offers a review of requirements appropriate to meet the age related public health challenges of the 21st century Nutritionists endocrinologists nurses and general health professionals concerned with aging processes geriatric patients and or public health will find this book a useful source of essential knowledge Redox-Genome Interactions in Health and Disease Jörgen Fuchs,Maurizio Podda,Lester Packer,2003-09-12 At the nexus of advances in molecular genetics and findings in redox biology this volume elaborates on the dynamics governing cellular redox states and aggregates the body of evidence linking oxidative stress and redox modulation with a host of monogenetic and polygenetic diseases
